

New JN0-336 Dumps Pdf & Free JN0-336 Test Questions

What's more, part of that ExamDiscuss JN0-336 dumps now are free: <https://drive.google.com/open?id=1DH3YnEatkn6YfpveDSf6b1-HcOhFnEi8>

It is apparent that a majority of people who are preparing for the JN0-336 exam would unavoidably feel nervous as the exam approaching. If you are still worried about the coming exam, since you have clicked into this website, you can just take it easy now, I can assure you that our company will present the antidote for you--our JN0-336 Learning Materials. Our company has spent more than 10 years on compiling study materials for the exam in this field, and now we are delighted to be here to share our study materials with all of the candidates for the exam in this field.

With the Juniper JN0-336 PDF questions file, you can prepare for the Juniper JN0-336 test on the go since the format is portable and works with all smart devices. The Juniper JN0-336 probable exam questions in PDF save you time so that you do not have to go through sleepless nights owing to a tight daily routine.

Free JN0-336 Test Questions & Exam JN0-336 Sample

It is very necessary for a lot of people to attach high importance to the JN0-336 exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable JN0-336 Study Materials can help people pass the exam in a relaxed state.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q63-Q68):

NEW QUESTION # 63

What are three capabilities of AppQoS? (Choose three.)

- A. re-write DSCP values
- B. assign a forwarding class
- C. rate-limit traffic
- D. reserve bandwidth
- E. re-write the TTL

Answer: A,B,C

Explanation:

AppQoS can modify the DSCP (Differentiated Services Code Point) values in IP packet headers. This is crucial for defining the level of service for each packet, influencing how network devices prioritize traffic.

It can assign traffic to specific forwarding classes. This feature allows network administrators to group different types of traffic (e.g., VoIP, streaming, bulk data) into categories that are treated differently based on predefined network policies, ensuring that critical applications receive the necessary bandwidth and priority.

AppQoS is capable of rate-limiting traffic, which involves setting a maximum bandwidth limit for certain types of traffic. This ensures that no single application or service consumes more bandwidth than allocated, thus preventing network congestion and ensuring fair bandwidth distribution among all applications.

These features are essential for managing network performance and ensuring that critical applications receive the necessary resources to function effectively. AppQoS does not inherently include capabilities to re-write TTL (Time To Live) values or reserve bandwidth as primary functions, but it manages bandwidth usage through rate limiting and priority settings.

NEW QUESTION # 64

You want to set up JSA to collect network traffic flows from network devices on your network.

Which two statements are correct when performing this task? (Choose two.)

- A. Statistical sampling increases processor utilization
- **B. Statistical sampling decreases event correlation accuracy.**
- C. BGP FlowSpec is used to collect traffic flows from Junos OS devices.
- **D. Superflows reduce traffic licensing requirements.**

Answer: B,D

Explanation:

Statistical sampling involves collecting a representative subset of data rather than examining all traffic.

While this method decreases processor utilization by reducing the volume of data that must be analyzed and stored, it can also lead to decreased accuracy in event correlation because not all events are captured.

Superflows in JSA are aggregated flow records that represent summaries of multiple flow records. This aggregation reduces the number of flows that need to be processed and stored, which can help in managing licensing requirements related to the volume of traffic being analyzed, especially in environments with high traffic volumes.

NEW QUESTION # 65

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- **A. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.**
- B. The fab interface enables configuration synchronization.
- C. Heartbeat signals sent on the fab interface monitor the health of the control plane link.
- **D. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.**

Answer: A,D

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

NEW QUESTION # 66

Which two statements about the DNS ALG are correct? (Choose two.)

- A. The DNS ALG supports VPN tunnels.
- B. The DNS ALG performs DNS doctoring.
- C. The DNS ALG does not support NAT.
- D. The DNS ALG supports DDNS.

Answer: A,B

Explanation:

The DNS Application Layer Gateway (ALG) is designed to manage and facilitate the successful passage of DNS traffic through a network device such as a firewall or NAT. Here are the correct statements regarding DNS ALG:

The DNS ALG performs DNS doctoring.

DNS doctoring is indeed a function of the DNS ALG where it modifies the payload of DNS responses to ensure that the information is aligned with the NAT policy. For example, it can rewrite the IP addresses in DNS responses to match the internal or external NAT'd IP address that the client should use.

The DNS ALG supports VPN tunnels.

DNS ALG can function across VPN tunnels by managing DNS traffic that traverses the tunnel, ensuring that the DNS queries and responses are correctly handled in environments where IP address translation occurs due to the VPN.

NEW QUESTION # 67

On which three Hypervisors is vSRX supported? (Choose three.)

- A. Citrix Hypervisor
- B. VMware ESXi
- C. Oracle VM
- D. KVM
- E. Hyper-V

Answer: B,D,E

Explanation:

vSRX is a virtual firewall that runs as a software instance on a hypervisor. A hypervisor is a software layer that allows multiple virtual machines to run on a single physical host. vSRX supports three hypervisors: VMware ESXi, Hyper-V, and KVM. VMware ESXi is a hypervisor that runs on x86 servers and supports various operating systems and applications. Hyper-V is a hypervisor that runs on Windows Server and supports Windows and Linux virtual machines. KVM (Kernel-based Virtual Machine) is a hypervisor that runs on Linux and supports Linux, Windows, and other operating systems.

NEW QUESTION # 68

.....

If you are going to prepare for the JN0-336 exam in order to get the related certification and improve yourself, you are bound to be very luck. With the joint efforts of all parties, our company has designed the very convenient and useful JN0-336 study materials. More importantly, the practices have proven that the study materials from our company have helped a lot of people achieve their goal and get the related certification. The JN0-336 Study Materials of our company is the study tool which best suits these people who long to pass the JN0-336 exam and get the related certification.

Free JN0-336 Test Questions: <https://www.examdiscuss.com/Juniper/exam/JN0-336/>

Firstly, the high quality and high pass rate of Free JN0-336 Test Questions - Security, Specialist (JNCIS-SEC) valid training material can ensure you pass with 100% guarantee, ExamDiscuss Free JN0-336 Test Questions has become the first choice among Free JN0-336 Test Questions students and professionals, especially for people who want to excel fast in their organizations, This is the reason that our JN0-336 study guide assures you of a guaranteed success in the exam.

If your career has benefited from a teacher or education **New JN0-336 Dumps Pdf** program, then why not help to pass the torch to the next generation, Topics covered include hardening systems and networks, detecting JN0-336 and handling break-ins or other

types of attack, and designing effective security policies.

Valid JN0-336 Exam Practice Material: Security, Specialist (JNCIS-SEC) and Training Study Guide - ExamDiscuss

Firstly, the high quality and high pass rate of Exam JN0-336 Sample Security, Specialist (JNCIS-SEC) valid training material can ensure you pass with 100% guarantee, ExamDiscuss has become the first choice among JNCIS-SEC students Exam Dumps JN0-336 Zip and professionals, especially for people who want to excel fast in their organizations.

This is the reason that our JN0-336 Study Guide assures you of a guaranteed success in the exam, We offer you free demo for you to try before buying JN0-336 exam dumps, so that you can know the format of the complete version.

A little attention to these study materials New JN0-336 Dumps Pdf will improve your ability to get through Security, Specialist (JNCIS-SEC) test questions with high pass rate.
