

Latest SSE-Engineer Exam Pdf - Simulations SSE-Engineer Pdf

BONUS!!! Download part of DumpsMaterials SSE-Engineer dumps for free: <https://drive.google.com/open?id=1qmpcXTApg1NyriyJU4ShadBOqxkfoBeh>

The Technological environment is changing rapidly because of new technological advancements and innovations. It's become mandatory to study and apply new techniques. Palo Alto Networks SSE-Engineer dumps certification will help you to adapt to the demands of the current world. SSE-Engineer Exam Dumps will assist you in obtaining better employment opportunities compared to your competitors. A DumpsMaterials will not only increase your knowledge but it will polish your skills as well to proceed successfully in the world of Palo Alto Networks.

Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Prisma Access Administration and Operation: This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.
Topic 2	<ul style="list-style-type: none"> Prisma Access Services: This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.

Topic 3	<ul style="list-style-type: none"> • Prisma Access Troubleshooting: This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.
Topic 4	<ul style="list-style-type: none"> • Prisma Access Planning and Deployment: This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.

Free PDF Palo Alto Networks - SSE-Engineer - Palo Alto Networks Security Service Edge Engineer –Valid Latest Exam Pdf

Achieving success in the Palo Alto Networks SSE-Engineer certification exam opens doors to lucrative job opportunities and career advancements. The Palo Alto Networks Security Service Edge Engineer (SSE-Engineer) credential is highly valuable in today's industry. However, many candidates face the frustration of exam failure and wasted time and resources by relying on outdated Palo Alto Networks SSE-Engineer Practice Questions. To save both time and money, it is crucial to prepare with the most up-to-date and reliable SSE-Engineer exam questions.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q40-Q45):

NEW QUESTION # 40

A customer using Prisma Access (Managed by Panorama) wants to monitor traffic patterns across all remote networks and use Strata Logging Service to gather insights on network usage. An engineer notices that some network data is missing from the Application Command Center (ACC).

What should the engineer do to ensure complete data visibility?

- A. Verify that the Panorama web interface has been configured to aggregate logs from both the Panorama data and RN-SPNs.
- B. Reconfigure the Prisma Access remote networks to log directly to Panorama instead of using Strata Logging Service.
- C. Enable the Use Data for Pre-Defined Reports' setting in the Logging and Reporting configuration on Panorama.
- **D. Ensure that log forwarding profiles are applied to all Prisma Access policies and directed to Strata Logging Service.**

Answer: D

Explanation:

For complete data visibility in Prisma Access (Managed by Panorama), log forwarding profiles must be applied to all security policies to ensure that traffic logs are correctly sent to Strata Logging Service. If log forwarding is missing or misconfigured, some traffic data may not appear in the Application Command Center (ACC), leading to incomplete insights. Verifying and correctly assigning log forwarding ensures that all relevant network activity is captured and available for analysis.

NEW QUESTION # 41

Strata Logging Service is configured to forward logs to an external syslog server; however, a month later, there is a disruption on the syslog server.

Which action will send the missing logs to the external syslog server?

- A. Delete the affected syslog server profile and create a new one.
- B. Export the logs from Strata Logging Service, and then manually import them to the syslog server.
- C. Configure a replay profile with the affected time range and associate it with the affected syslog server profile.
- D. Configure a log filter under the syslog server profile with the affected time range.

Answer: C

Explanation:

The Strata Logging Service allows log replay, which enables resending logs that were not successfully forwarded to an external syslog server due to disruptions. By configuring a replay profile with the affected time range and associating it with the syslog server profile, Prisma Access will resend the missing logs, ensuring that all relevant data is restored in the external logging system. This approach is the most efficient and automated way to recover missing logs.

NEW QUESTION # 42

In an Explicit Proxy deployment where no agent can be used on the endpoint, which authentication method is supported with mobile users?

- A. SAML
- B. LDAP
- C. SSO
- D. Kerberos

Answer: A

Explanation:

In an Explicit Proxy deployment where no agent can be used on the endpoint, SAML (Security Assertion Markup Language) is the supported authentication method for mobile users. SAML allows authentication via an Identity Provider (IdP) without requiring an agent on the endpoint, making it ideal for web-based authentication in cloud and remote access environments. It enables Single Sign-On (SSO) and secure authentication without direct integration with LDAP or Kerberos, which typically require an agent or local network presence.

NEW QUESTION # 43

Based on the image below, which two statements describe the reason and action required to resolve the errors? (Choose two.)

The screenshot shows the Palo Alto Networks Log Viewer interface. The search filter is set to 'Error Message LIKE "Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt"'. The results table shows multiple entries for 'google.com' with the error message 'Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt'. A watermark 'dumpsmaterials.com' is visible across the image.

Time Generated	Server Name Indication	Error Message
2024-11-06 17:13:57	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 16:52:08	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 16:28:14	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 14:37:59	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 13:24:58	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 13:12:55	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 12:45:13	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 11:41:47	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt
2024-11-06 11:36:27	google.com	Received fatal alert BadCertificate from client, CA Issuer URL: http://certificates.godaddy.com/repository/psig2.crt

- A. Create a do not decrypt rule for the hostname "certificates.godaddy.com"
- B. Create a do not decrypt rule for the hostname "google.com"
- C. The server has pinned certificates.
- D. The client is misconfigured.

Answer: B,C

Explanation:

The error messages indicate that Prisma Access is encountering certificate issues while attempting to decrypt traffic to "google.com." This suggests that the server has pinned certificates, meaning it does not allow man-in-the-middle (MITM) decryption by Prisma Access. Since pinned certificates prevent traffic decryption, a solution is to create a "do not decrypt" rule for the hostname "google.com." This will allow traffic to flow without triggering certificate errors while maintaining secure communication with Google's servers.

NEW QUESTION # 44

Which Cloud Identity Engine capability will create a Security policy that uses Entra ID attributes as the source identification?

- A. Attribute Group Mapping
- B. Entra ID Group Attribute
- C. Cloud Dynamic User Group
- D. Entra ID Cloud Group

Answer: C

Explanation:

The Cloud Dynamic User Group capability in Cloud Identity Engine enables the creation of Security policies that use Entra ID (formerly Azure AD) attributes for user identification. This allows Prisma Access to dynamically apply user-based security rules based on real-time Entra ID attributes, ensuring that access policies adapt to user changes such as group membership, device compliance, or role updates.

NEW QUESTION # 45

.....

Good product can was welcomed by many users, because they are the most effective learning tool, to help users in the shortest possible time to master enough knowledge points, so as to pass the qualification test, and our SSE-Engineer study materials have always been synonymous with excellence. Our SSE-Engineer Study Materials can help users achieve their goals easily, regardless of whether you want to pass various qualifying examinations, our products can provide you with the learning materials you want.
