

Category-7A-General-and-Household-Pest-Control Free Learning Cram & Frequent Category-7A-General-and-Household-Pest-Control Updates

Our professional experts are very excellent on the compiling the content of the Category-7A-General-and-Household-Pest-Control exam questions and design the displays. Moreover, they impart you information in the format of the Category-7A-General-and-Household-Pest-Control questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge, but also you find the opportunity to practice real exam scenario. We have three versions of the Category-7A-General-and-Household-Pest-Control Training Materials: the PDF, Software and APP online. And the Software version can simulate the real exam.

If you are a college student, you can learn and use online resources through the student learning platform over the Category-7A-General-and-Household-Pest-Control study materials. And for an office worker, the Category-7A-General-and-Household-Pest-Control study engine is designed to their different learning arrangement as well, such extensive audience greatly improved the core competitiveness of our Category-7A-General-and-Household-Pest-Control practice quiz, which is according to their aptitude, on-demand, maximum to provide users with better suited to their specific circumstances.

100% Pass OCPE - Latest Category-7A-General-and-Household-Pest-Control Free Learning Cram

The PracticeMaterial Pesticide Applicator Category 7A General and Household Pest Control Exam (Category-7A-General-and-

Household-Pest-Control) PDF dumps file work with all devices and operating system. You can easily install Pesticide Applicator Category 7A General and Household Pest Control Exam (Category-7A-General-and-Household-Pest-Control) exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start Pesticide Applicator Category 7A General and Household Pest Control Exam (Category-7A-General-and-Household-Pest-Control) exam dumps preparation without wasting further time. Whereas the other two PracticeMaterial OCPE Category-7A-General-and-Household-Pest-Control Practice Test software is concerned, both are the mock Pesticide Applicator Category 7A General and Household Pest Control Exam (Category-7A-General-and-Household-Pest-Control) exam that will give you a real-time Category-7A-General-and-Household-Pest-Control practice exam environment for preparation.

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

For an outdoor high-volume perimeter application for earwigs, mixing ____ fl. oz. in 22 gallons and applied in a volume of 2 gallons per 1000 sq. ft. will give you the suggested application rate of 0.27 fl. oz. per 1000 sq. ft.

- A. 0
- B. 1
- C. 2

Answer: A

Explanation:

To achieve the suggested application rate of 0.27 fl. oz. per 1000 sq. ft. using a high-volume perimeter application, we need to calculate the total amount of TEMPRID SC needed for the 22 gallons of solution. The application rate is given as 2 gallons per 1000 sq. ft., so 22 gallons will cover:

A math equation and numbers AI-generated content may be incorrect.

$$\text{Area covered} = \frac{22 \text{ gallons}}{2 \text{ gallons per 1000 sq. ft.}} = 11,000 \text{ sq. ft.}$$

The total amount of TEMPRID needed for 11,000 sq. ft. at 0.27 fl. oz. per 1000 sq. ft. is:

$$\text{Total TEMPRID} = 0.27 \text{ fl. oz.} \times 11,000 \text{ sq. ft.} = 2.97 \text{ fl. oz.}$$

Since 2.97 fl. oz. is closest to 3 fl. oz., Option A(3) seems correct at first glance. However, the question asks for the exact amount to achieve 0.27 fl. oz. per 1000 sq. ft., and the options include 6 fl. oz., which suggests a possible error in the question's phrasing or a higher rate. The TEMPRID SC label specifies a maximum outdoor rate of 0.54 fl. oz. per 1000 sq. ft. for perimeter applications. If we assume the intended rate was 0.54 fl. oz. per 1000 sq. ft. (a common rate for outdoor use), the calculation becomes:

$$\text{Total TEMPRID} = 0.54 \text{ fl. oz.} \times 11 = 5.94 \text{ fl. oz.}$$

This rounds to 6 fl. oz., matching Option C. Given the options and the context of TEMPRID's label, Option C (6 fl. oz.) is the correct answer, assuming the question intended the standard outdoor rate of 0.54 fl. oz. per 1000 sq. ft., not 0.27 fl. oz.

NEW QUESTION # 23

For pesticide applications performed on school property, the commercial pesticide applicator is:

- A. Required to notify the School IPM Coordinator as well as the students, faculty, and staff
- B. Required to provide pesticide application information to the School IPM Coordinator if requested but not conduct the notification
- C. Required to notify students, faculty, and staff as schools are not required to notify students, faculty, and staff

Answer: A

Explanation:

Under the New Jersey School IPM Act (N.J.A.C. 7:30-13), commercial pesticide applicators must notify the School IPM Coordinator and students, faculty, and staff of pesticide applications on school property. This includes advance notice (at least 72 hours prior) and posting signs at the application site.

The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 4: IPM in Schools) aligns with these requirements. Option A is incorrect because schools are also required to notify, but the applicator has a direct responsibility. Option C is incorrect, as notification is mandatory, not optional.

NEW QUESTION # 24

___ toxicity has become an important issue to pesticide applicators based on their repeated use or exposure to pesticides.

- A. Periodic
- B. Acute
- C. Chronic

Answer: C

Explanation:

Chronic toxicity refers to the adverse effects of long-term, repeated exposure to a pesticide, which is a significant concern for applicators who handle pesticides regularly. This can lead to health issues like cancer, neurological disorders, or reproductive problems, as noted in the General Pest Management:

Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety). Option B (acute toxicity) refers to effects from a single, high-dose exposure, which is less relevant to repeated use.

Option C (periodic) is not a recognized term in toxicology.

NEW QUESTION # 25

The EPA approves the label for a pesticide. The State of New Jersey:

- A. Can modify a pesticide's use allowing for additional uses or higher rates of application
- B. Cannot change the use thereof in any way
- C. Can put additional restrictions on the way it can be used

Answer: C

Explanation:

The EPA approves pesticide labels under FIFRA, setting federal standards for use. However, states like New Jersey have the authority to impose stricter regulations if needed to protect local environments or public health. According to NJDEP Pesticide Control Program guidelines, the state can add restrictions, such as limiting application rates, requiring additional safety measures, or restricting use in certain areas (e.g., near schools or water bodies). Option A is incorrect because states can impose additional rules. Option B is incorrect because states cannot expand uses or increase rates beyond the EPA-approved label without a special local need (SLN) registration under Section 24(c) of FIFRA, which is not the same as a general modification. Option C aligns with New Jersey's authority to enforce stricter standards.

NEW QUESTION # 26

For an indoor application of TEMPRID for bed bugs, ___ application rate.

- A. Use the 0.15% per gallon of water
- B. Use 0.54% per gallon of water
- C. Do not exceed the 0.075% per gallon of water

Answer: A

Explanation:

The TEMPRID SC label specifies that for indoor bed bug applications, the recommended concentration is 0.15% per gallon of water (equivalent to 16 mL per gallon) to ensure efficacy against resistant bed bug populations. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) aligns with label instructions for effective treatment. Option A (0.075%) is the rate for general pests like roaches, not bed bugs. Option C (0.54%) exceeds the label rate and is incorrect.

NEW QUESTION # 27

.....

If you choose to buy the PracticeMaterial's raining plan, we can make ensure you to 100% pass your first time to attend OCPE Certification Category-7A-General-and-Household-Pest-Control Exam. If you fail the exam, we will give a full refund to you.
