

# CNX-001 Dumps For Exam4Free - Best

What's more, part of that Exam4Free CNX-001 dumps now are free: <https://drive.google.com/open?id=1K-ItkmRG1ZjOv7t8FNE4BQ79vgSgO2hv>

Exam4Free has designed a CompTIA CNX-001 pdf dumps format that is easy to use. Anyone can download CompTIA CloudNetX Certification Exam CNX-001 pdf questions file and use it from any location or at any time. CompTIA PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual CompTIA CloudNetX Certification Exam CNX-001 Exam Questions in this CompTIA CloudNetX Certification Exam CNX-001 pdf dumps file.

## CompTIA CNX-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Network Architecture Design:</b> This section of the exam measures the skills of Network Architects and covers the ability to design scalable, secure, and efficient network architectures. It focuses on understanding design principles, selecting appropriate network components, and aligning architecture decisions with organizational needs. Candidates are expected to demonstrate a solid grasp of topology planning, high-availability configurations, and integration of cloud and on-premise systems to ensure reliability and performance.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Network Security:</b> This section of the exam measures the skills of Security Engineers and covers core practices for protecting network infrastructure. It includes applying firewall rules, implementing access control measures, and designing secure segmentation strategies. The content emphasizes threat mitigation techniques, secure configuration of networking devices, and adherence to compliance frameworks, preparing professionals to safeguard both internal and external network assets effectively.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Network Operations, Monitoring, and Performance:</b> This section of the exam measures skills of Network Operations Specialists and covers day-to-day operational management of network environments. It involves configuring monitoring tools, analyzing performance data, and responding to alerts. Candidates are evaluated on their ability to maintain network health, optimize throughput, and ensure consistent uptime by applying best practices for proactive performance tuning and operations management.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Network Troubleshooting:</b> This section of the exam measures the skills of Network Support Engineers and covers diagnosing and resolving connectivity and performance issues across various network layers. It focuses on identifying root causes, using diagnostic tools, and applying systematic troubleshooting methodologies. The goal is to ensure that professionals can minimize downtime, restore service quickly, and prevent recurring problems by maintaining a resilient and stable network environment.</li> </ul>

## CompTIA CNX-001 Latest Dumps Ebook - CNX-001 Practice Exam Fee

It is browser-based; therefore no need to install it, and you can start practicing for the CompTIA CNX-001 exam by creating the CompTIA CloudNetX Certification Exam (CNX-001) practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual CompTIA CloudNetX Certification Exam (CNX-001) exam. Exam4Free CNX-001 web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

## CompTIA CloudNetX Certification Exam Sample Questions (Q35-Q40):

### NEW QUESTION # 35

A network architect needs to design a new network to connect multiple private data centers. The network must:

- \* Provide privacy for all traffic between locations
- \* Use preexisting internet connections
- \* Use intelligent steering of application traffic over the best path

Which of the following best meets these requirements?

- A. MPLS connections
- **B. SD-WAN**
- C. ExpressRoute
- D. Site-to-site VPN

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

SD-WAN (Software-Defined Wide Area Network) enables private, encrypted connections over public internet links and supports policy-based routing for application-aware traffic steering. It offers centralized management, redundancy, and automatic path selection - all aligned with the stated requirements.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Software-Defined Networking and WAN Optimization":

"SD-WAN uses secure tunnels over the public internet, supports dynamic path selection, and provides application-aware routing making it ideal for multi-site enterprise connectivity without dedicated links." Other options:

- \* A. MPLS requires dedicated circuits and is costly.
- \* C. Site-to-site VPN provides security but lacks intelligent traffic steering.
- \* D. ExpressRoute is a private connection to Azure, not suited for general internet-based multi-site connectivity.

### NEW QUESTION # 36

A cloud network engineer needs to enable network flow analysis in the VPC so headers and payload of captured data can be inspected. Which of the following should the engineer use for this task?

- A. Application monitoring
- B. Network flows
- **C. Traffic mirroring**
- D. Syslog service

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Traffic mirroring allows a copy of network traffic - including headers and payloads - to be sent to an analysis tool or appliance for deep packet inspection. This is essential for security analysis, network troubleshooting, and performance diagnostics in cloud environments.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Packet Capture and Network Flow Monitoring": "Traffic mirroring enables the capture of full packet data, including payloads, for forensic or performance analysis within cloud networks." Other options:

- \* A. Application monitoring focuses on app-level metrics, not packet inspection.
- \* B. Syslog is log-based, not for inspecting packets.
- \* D. Network flows (e.g., NetFlow, VPC flow logs) provide metadata (source, destination, size) but not full packet content.

### NEW QUESTION # 37

A network engineer identified several failed log-in attempts to the VPN from a user's account. When the engineer inquired, the user mentioned the IT help desk called and asked them to change their password.

Which of the following types of attacks occurred?

- A. Evil twin
- **B. Social engineering**
- C. On-path
- D. Initialization vector

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This scenario describes a classic example of social engineering. An attacker impersonated the help desk and convinced the user to change their password, likely to one the attacker controlled. Social engineering attacks manipulate human behavior to bypass technical security measures.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Social Engineering Threats":

"Social engineering involves manipulating individuals to perform actions or divulge confidential information, such as passwords, often by impersonating trusted entities like IT support." Other options:

- \* A. Initialization vector relates to encryption vulnerabilities.
- \* B. On-path (formerly man-in-the-middle) requires network interception, which is not described here.
- \* C. Evil twin is a rogue Wi-Fi AP attack, not applicable to this VPN login context.

### NEW QUESTION # 38

After a company migrated all services to the cloud, the security auditor discovers many users have administrator roles on different services. The company needs a solution that:

- \* Protects the services on the cloud
- \* Limits access to administrative roles
- \* Creates a policy to approve requests for administrative roles on critical services within a limited time
- \* Forces password rotation for administrative roles
- \* Audits usage of administrative roles

Which of the following is the best way to meet the company's requirements?

- **A. Privileged access management**
- B. Access control list
- C. Conditional access
- D. Session-based token

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Privileged Access Management (PAM) is the optimal solution to control, audit, and secure administrative access to systems and services. PAM enables role-based approval workflows, time-limited access, auditing, and credential rotation, fully aligning with the requirements.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Identity and Access Controls":

"Privileged Access Management allows fine-grained control over administrator-level access, supports just-in-time access provisioning, password rotation, and audit logging." Other options:

- \* B. Session-based tokens allow temporary access but do not enforce policies or auditing.
- \* C. Conditional access provides policy enforcement based on context but lacks full PAM features.
- \* D. ACLs control access to resources but don't manage privilege workflows or audits.

### NEW QUESTION # 39

A partner is migrating a client from on premises to a hybrid cloud. Given the following project status information, the initial project timeline estimates need to be revised:

Phase	Initial estimate	Current status
Discovery	1 month	2 months
Design	2 weeks	1 month
Implementation	6 months	9 months
Knowledge transfer	2 months	3 months

Which of the following documents needs to be revised to best reflect the current status of the project?

- A. BIA
- B. SLA
- C. SOW
- D. WBS

**Answer: D**

Explanation:

The Work Breakdown Structure is where each project phase and its duration are documented in detail. Since the estimated timelines for discovery, design, implementation, and knowledge transfer have all slipped, you update the WBS to reflect the new, actual phase durations.

### NEW QUESTION # 40

.....

There are three versions for CNX-001 exam braindumps, all three have free demo for you to have a try. CNX-001 PDF materials are printable, and instant download. CNX-001 Soft taes engine offer you the realest test environment for you, it supports MS operating system and has two modes for practice, it can also change the order of the CNX-001 Training Materials, so that you can perform well in the real exam. CNX-001 Online test engine have the test history and performance review.
