질문 # 159

Universal containers recently migrated legacy contracts and subscriptions into salesforce in order to facilitate amendments and renewals in CPQ. however, sales user sare getting the 'attempt to de-reference a null object' error when amending the legacy contract. what is the most likely cause for the error?

- A. Legacy subscription data are missing a lookup to a source quote line record
- B. Amendment of legacy contract and subscription data requires asset-based renewal method
- **C. Required fields are missing or incorrectly populated on the legacy contract and subscription data**
- D. Migrated contracts and subscriptions cannot be amended using salesforce CPQ

정답: C

설명:

The error 'attempt to de-reference a null object' typically occurs when there is an attempt to access a field or method on an object that has not been initialized or has been assigned a null value. In the context of Salesforce Revenue Cloud, when amending legacy contracts and subscriptions, this error can occur if required fields are missing or incorrectly populated on the legacy contract and subscription data. This could be due to incorrect data migration or manual data entry errors. It's important to ensure that all required fields are correctly populated when migrating legacy data to Salesforce CPQ.

질문 # 163

Universal Containers wants to design a multi-leveled approval matrix to have more control on sales reps applying discounts on quotes. Which three considerations should UC Keep in mind when designing their Solution?

- A. Document the discount approval levels for each approver.
- B. Give sales reps flexibility to apply any discount.
- C. Print out the approval matrix into cards that the sales reps can carry around.
- D. Identify backup approvers in case the primary approver is out of the office.
- E. Define the discount threshold or limit allowed for the sales reps

정답: A,D,E

설명:

To design a multi-leveled approval matrix for controlling discounts on quotes, Universal Containers should consider the following: Identify backup approvers in case the primary approver is out of the office. This will ensure that the approval process is not delayed or stalled due to the unavailability of the primary approver. Backup approvers can be assigned using the Delegated Approver feature in Salesforce, which allows users to delegate their approval authority to another user for a specific period of time. 1 Define the discount threshold or limit allowed for the sales reps. This will help to enforce the pricing policies and prevent excessive or unauthorized discounts. The discount threshold or limit can be defined using the Approval Thresholds feature in Salesforce CPQ, which allows setting up different approval rules based on the discount percentage, amount, or margin. 2 Document the discount approval levels for each approver. This will help to clarify the roles and responsibilities of each approver and the criteria for approving or rejecting a quote. The discount approval levels can be documented using the Approval Processes feature in Salesforce, which allows creating a sequence of steps and actions that an approval request must go through. 3 References:
