UiPath UiPath-ABAv1 Questions To Gain Brilliant Result [2026]

Choosing our UiPath-ABAv1 real dumps as your study guide means you choose a smart and fast way to get succeed in the certification exam. There are accurate UiPath-ABAv1 test answers and some explanations along with the exam questions that will boost your confidence to solve the difficulty of UiPath-ABAv1 Practice Test. You will enjoy great benefits if you buy our UiPath-ABAv1 braindumps now and free update your study materials one-year.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q49-Q54):

NEW QUESTION # 49

What are 2 key features of UiPath Automation Hub?

- A. Pipeline Management. Process & Documentation Bank"
- B. Process Identification, Command Line Interface
- C. Process & Documentation Bank, App creation for process discovery
- D. Integration with Task Capture. Process Graph Visualization

Answer: A

Explanation:

Two key features of UiPath Automation Hub are Pipeline Management and Process & Documentation Bank.

Pipeline Management helps in managing and prioritizing automation ideas throughout their lifecycle, while Process & Documentation Bank serves as a repository for storing and accessing process documentation and related content, facilitating better organization and accessibility. References: UiPath Documentation on Automation Hub at <https://docs.uipath.com/>.

NEW QUESTION # 50

What is the status of an action when it first shows up on the Actions page in UiPath's Action Center?

- A. Assigned
- B. Completed
- C. In Progress
- D. Unassigned

Answer: D

Explanation:

Initial Action Status in Action Center:

When an action first appears in UiPath's Action Center, it is in the Unassigned status. This indicates that no user has taken ownership of the action yet.

Why Option D is Correct:

Actions must be assigned to a specific user before they can move to an "In Progress" status. The initial state is always "Unassigned".

Why Other Options Are Incorrect:

Option A: "In Progress" occurs only after an action has been assigned and work has started.

Option B: Actions are not assigned by default; they need to be manually allocated or auto-assigned based on rules.

Option C: "Completed" status is achieved only after the action has been resolved and closed.

By starting as "Unassigned," the Action Center ensures clear responsibility allocation for task execution.

NEW QUESTION # 51

Which of the following factors most influences the complexity of a process proposed for automation?

- A. The level of automation
- B. The speed of the process
- C. The number of people involved
- D. The number of steps involved

Answer: D

Explanation:

The complexity of a process proposed for automation is most influenced by the number of steps involved. A higher number of steps typically indicates a more complex process, as it may involve multiple decision points, variations, and interactions with different systems or applications. Complexity can be defined by factors such as the number of applications/systems, the frequency of human intervention, or the number of steps required to execute the task¹. Processes with fewer steps are generally easier to automate because they are simpler and have fewer variables to manage during the automation.

References: The explanation is based on the UiPath blog post discussing factors that influence the complexity of processes for automation¹.

NEW QUESTION # 52

What is a Test Case template?

- A. Is a document that outlines only the exceptions of a particular test
- B. Is a document that outlines only the exceptions of the entire project
- C. Is a document that outlines the steps and expected results of a particular test
- D. Is a document that outlines the steps and expected results of the entire project

Answer: C

Explanation:

A Test Case template is a standardized document that outlines the steps to be performed for a test, along with the expected results for each step. It serves as a detailed guide for testing a particular functionality or feature within a project, ensuring that all necessary scenarios are covered and results are accurately recorded. This document is essential for systematically validating the functionality of the automation and identifying any discrepancies from the expected behavior.

UiPath Testing Framework

NEW QUESTION # 53

Which of the below options best applies to the role of the Business Analyst?

- A. Assists in solution design and confirms the solution
- B. Translates the business problem into a technology problem
- C. Bridges the gap between the stakeholders and the delivery team
- D. Understands the business requirements and the problem

Answer: C

Explanation:

The role of the Business Analyst best applies to bridging the gap between the stakeholders and the delivery team. This involves understanding and translating business requirements into actionable and understandable tasks for the technical team, ensuring that the automation solutions meet the business needs effectively.

NEW QUESTION # 54

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the UiPath-ABA1 study materials absolutely excellent quality and reasonable price, because the more times the user buys the UiPath-ABA1 study materials, the more discount he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the UIPath-ABA1 Study Materials, our staff will help solve them as soon as possible.
