## 100% Pass 2026 Scaled Agile Perfect Reliable SAFe-RTE Dumps Pdf

As you see, all of the three versions are helpful for you to get the SAFe-RTE certification: the PDF, Software and APP online. So there is another choice for you to purchase the comprehensive version which contains all the three formats, it is the Value Pack. Besides, the price for the Value Pack is quite favorable. And no matter which format of SAFe-RTE study engine you choose, we will give you 24/7 online service and one year's free updates on the SAFe-RTE practice questions.

## Scaled Agile SAFe Release Train Engineer Sample Questions (Q162-Q167):

### NEW QUESTION # 162

When planning for a distributed Program Increment (PI) Planning event with a large difference in time zones, what are two key preparation and facilitation focus areas for a Release Train Engineer (RTE)? (Choose two.)

- A. Split up the PI Planning event per time zone and then have the final plan review, confidence vote, and planning retrospective as one centralized meeting
- B. Arrange and test presentation audio and video connectivity in all locations
- C. Have a single RTE and technical support person that acts as a central point of communication for all locations
- D. Share the outcomes of preparation meetings with local Scrum Masters so they can arrange local rooms
- E. Adjust the PI agenda to 2.5 - 3 days, allowing for overlapping hours

Answer: B,E

### NEW QUESTION # 163

How does a Release Train Engineer view the role of functional managers on the Agile Release Train?

- A. As developers of people
- B. As a content authority for work

- C. As decision makers
- D. As problem solvers

**Answer: A**

Explanation:

According to the SAFe framework, the role of functional managers in an Agile Release Train (ART) is evolving. While they were traditionally seen as decision-makers and content authorities, in a Lean-Agile context, their role shifts towards developing people. This is aligned with the SAFe principle of empowering and developing individuals and teams to improve their capabilities and contribute to the organization's success.

The Release Train Engineer (RTE) views functional managers as crucial in growing the skills and capabilities of their people. This perspective is supported by the SAFe guidance on the evolving role of managers, which emphasizes that managers should focus on coaching, career development, and enabling the continuous improvement of their teams. The RTE, as a servant leader, facilitates this by coaching leaders, teams, and Scrum Masters in the new mindset and processes, thus supporting the functional managers in their role as developers of people<sup>12</sup>.

#### NEW QUESTION # 164

Product Management is responsible for which activity?

- A. Prioritizing the Portfolio Backlog
- B. Establishing an architectural vision for the Agile Release Release Train
- C. Defining Program Backlog content

**Answer: C**

#### NEW QUESTION # 165

Which of the Core Competencies of Business Agility includes aligning strategy with execution?

- A. Organizational Agility
- B. Agile Product Delivery
- C. Lean Portfolio Management
- D. Lean-Agile Leadership

**Answer: C**

Explanation:

The Core Competency of Business Agility that includes aligning strategy with execution is Lean Portfolio Management. This is verified by the information provided on the SAFe website, which states that Lean Portfolio Management aligns strategy and execution by applying Lean and systems thinking approaches to strategy and investment funding, Agile portfolio operations, and governance<sup>1</sup>. This competency enables organizations to align their strategy to execution, ensuring that they create and maintain a portfolio of investments that align with the enterprise's strategic objectives and meet the customer's needs. It involves collaboration between the portfolio stakeholders and Agile Release Trains (ARTs) to develop and implement the strategic themes and Lean budgets that guide the portfolio.

#### NEW QUESTION # 166

Which statement is true about using a Program Kanban system

- A. Work is pushed through the Kanban to ensure train capacity is utilized
- B. The board tracks features, dependencies and milestones
- C. WIP limits are used to provide any needed buffers
- D. All work is visualized, progress is continually tracked

**Answer: D**

Explanation:

The core principle of a Program Kanban system is the visualization and tracking of work:

\* All Work Visualized: All work items in progress are represented on the Kanban board, regardless of their nature. This provides complete transparency into what the ART is working on.

\* **Continuous Tracking:** Teams update the Kanban board consistently, reflecting the real-time progress of work. This allows anyone to see the current status at a glance.
