A team of professionals has made the product of TestsDumps after much hard work with their complete potential so the candidates can prepare for Salesforce practice test in a short time.

Salesforce Certified Slack Administrator Sample Questions (Q143-Q148):

NEW QUESTION # 143

You're an Org Owner at a financial company and administer 20 workspaces on a Slack Enterprise Grid plan. Your company is concerned about staying in compliance with government-mandated regulatory requirements across all communication tools.

What is the first step you should take to ensure that communications remain compliant for your company?

(Select the best answer.)

- **A. Meet with your compliance and legal teams to set policies for Slack at your company.**
- B. Implement eDiscovery within Slack to ensure that all communications are archived.
- C. Promote a member of your compliance team to Org Owner.
- D. Implement a 24-hour retention policy in Slack to ensure that sensitive communications are removed within a day.

Answer: A

Explanation:

Slack compliance best practices state:

"Before configuring Slack for compliance, companies should meet with legal and compliance teams to set internal communication, retention, and monitoring policies tailored to regulatory requirements." Implementing eDiscovery (D) is important later, but setting policies first ensures the correct technology choices. B and C may not align with regulatory needs without first setting clear policies. (Reference: Slack Administration Study Guide - Compliance and Legal Alignment)

-

NEW QUESTION # 144

You're an Org Admin for your company's Slack Enterprise Grid org. Your organization uses an identity provider (IdP) with SCIM provisioning. Today is the last day of employment for a manager at your company who is a Workspace Admin.

What is the best strategy to ensure the account is no longer active after this Workspace Admin's departure?

(Select the best answer.)

- A. Request an Org Owner deactivate the departing Workspace Admin from the Org Admin dashboard.
- B. Deactivate the departing Workspace Admin from all Enterprise Grid workspaces from each workspace's Manage Members page.
- C. Manually delete the departing Workspace Admin from your organization's IdP.
- **D. Deactivate the Workspace Admin's account in the IdP, and automatically sync deactivated members from your organization's IdP.**

Answer: D

Explanation:

According to Slack's official SCIM documentation:

"Deactivating a user in the identity provider (IdP) automatically deactivates the user's Slack account through SCIM provisioning." This ensures the Workspace Admin is promptly deactivated across the Enterprise Grid without needing manual action in Slack itself. Options A, C, and D are manual or inefficient approaches when SCIM is available.

(Reference: Slack Administration Study Guide - SCIM Provisioning and Lifecycle Management)

-

NEW QUESTION # 145

The Customer Support team for Large Inc is now using Slack to access the tools and information they need to help customers quickly.

As an Admin, what should you do to set them up for success? (Choose all that apply.)

- **A. Approve and install apps to integrate their support tools with Slack.**
- **B. Streamline an incident management workflow.**
- C. Allow everyone on the Customer Support team to approve and install the apps they need.
- **D. Organize and name channels in a way that makes information, procedures, and policies easier for people to find.**

Answer: A,B,D

Explanation:

Slack recommends Admins:

"Approve and install key apps to ensure security, streamline workflows (such as for incident management), and organize channels to make information discoverable." Allowing all members to approve apps (Option A) is discouraged because it can pose a security risk.

-

NEW QUESTION # 146

You're an Org Owner on a Slack Enterprise Grid plan. Due to a legal issue, you need to export all messages and files from a Slack Connect channel.

What is the best way to do this?

(Select the best answer.)

- A. Use the Audit Logs API to monitor and report on all messages and files from the channel.
- B. Use Slack's Import/Export Data tool to export all messages from the channel, and then manually download the files.
- C. Use the Discovery API to export all messages and files from the channel.
- **D. Use the Discovery API to export messages and files from the channel that were sent by your company. Then ask the partners in the Slack Connect channel to do the same.**

Answer: D

Explanation:

According to the Slack Enterprise Grid documentation:

"Org Owners and Org Admins can use the Discovery API to export messages and files sent by their organization in Slack Connect channels. Messages and files sent by external partners must be requested from the respective organizations." Because Slack Connect involves multiple organizations, each organization retains ownership of its own data.

Thus, you can only export your company's messages/files via the Discovery API; partners must export their own data.

(Reference: Slack Administration Study Guide - Security and Compliance - Discovery API and Slack Connect)

-

NEW QUESTION # 147

You've been working among a small group of experienced Slack admins.

Your company is beginning to grow exponentially, and admin responsibilities such as channel administration, legal holds, and user management are overwhelming your small team.

Your team decides to assign a few system roles to support the admin team.

Which role will be responsible for assigning admin responsibilities?

(Select the best answer.)

- A. Users Admin
- B. Channels Admin
- C. Compliance Admin
- **D. Roles Admin**

Answer: D

Explanation:

According to Slack's role management documentation:

"Roles Admins have the ability to assign and manage system roles for members across the Slack organization." Compliance Admins (A) manage legal holds and data exports. Channels Admins (C) manage channel structures. Users Admins (D) manage member profiles and deactivations. Only Roles Admins manage assignment of admin permissions.
