

Salesforce NP-Con-102 Vorbereitungsfragen & NP-Con-102 Online Prüfungen

Wenn Sie die Salesforce NP-Con-102 Zertifizierungsprüfung bestehen wollen, ist es doch kostengünstig, die Produkte von ExamFragen zu kaufen. Denn die kleine Investition wird große Gewinne erzielen. Mit den Prüfungsfragen und Antworten zur Salesforce NP-Con-102 Zertifizierungsprüfung von ExamFragen können Sie die Prüfung sicher bestehen. ExamFragen ist eine Website, die einen guten Ruf genießt und den IT-Fachleuten die Prüfungsfragen und Antworten zur Salesforce NP-Con-102 Zertifizierungsprüfung bieten.

Wenn Sie finden, dass unsere NP-Con-102 Prüfungsmaterialien Qualitätsproblem hat oder wenn Sie die Prüfung nicht bestanden haben, zahlen wir Ihnen bedingungslos die gesamte Summe zurück. Die Fragen und Antworten zur Salesforce NP-Con-102 Zertifizierungsprüfung von ExamFragen umfassen fast alle Wissensgebiete der Salesforce NP-Con-102 Zertifizierungsprüfung.

>> Salesforce NP-Con-102 Vorbereitungsfragen <<

Zertifizierung der NP-Con-102 mit umfassenden Garantien zu bestehen

Obwohl wir schon vielen Prüfungskandidaten erfolgreich geholfen, die Salesforce NP-Con-102 zu bestehen, sind wir nicht selbstgefällig, weil wir die heftige Konkurrenz im IT-Bereich wissen. Deshalb müssen wir uns immer verbessern, um nicht zu ausscheiden. Unser Team aktualisiert die Prüfungsunterlagen der Salesforce NP-Con-102 immer rechtzeitig. Damit können unsere Kunden die neueste Tendenz der Salesforce NP-Con-102 gut folgen.

Salesforce Certified Nonprofit Cloud Consultant (NPC) NP-Con-102 Prüfungsfragen mit Lösungen (Q36-Q41):

36. Frage

A nonprofit wants all Apex error messages to be sent to a specific system admin. How should the consultant configure NPSP to send error notifications only to this admin?

- A. Change the profile for all users except the specific admin to something different than system admin.
- B. Uncheck the Send Apex Warning Emails checkbox on all admins except for the specific admin.
- C. Set all users except the specific admin as disabled for receiving error notifications on the NPSP Settings tab under System Tools > Error Notifications.
- **D. Set the specific admin as the user to receive error notifications on the NPSP Settings tab under System Tools > Error Notifications.**

Antwort: D

Begründung:

In the Nonprofit Success Pack (NPSP), error handling is centralized to ensure that critical failures in background processes (like nightly rollups or asynchronous triggers) do not go unnoticed. By default, NPSP may be configured to send notifications to all System Administrators, which can lead to "notification fatigue" or sensitive technical data being sent to users who do not manage the system's backend.

To route these errors to a single, specific individual, a consultant must use the NPSP Settings interface.

Step-by-Step Configuration:

- * Navigate to NPSP Settings: Use the App Launcher to find the NPSP Settings tab.
- * Access Error Handling: In the sidebar, go to System Tools and then click on Error Notifications.
- * Edit Settings: Click the Edit button at the top of the page.
- * Change Recipient Type: Look for the field labeled Error Notifications To. By default, this might be set to "All System Administrators." Change this value to User.
- * Select the Admin: A new lookup field will appear. Search for and select the specific System Administrator who should be the point of contact for technical issues.
- * Save: Click Save.

Once this is configured, any Apex errors triggered by the NPSP framework (TDTM, Batch jobs, etc.) will generate an email sent exclusively to that selected user. This is a best practice for governance as it ensures a clear line of accountability for troubleshooting. Why other options are incorrect:

- * Option A: Standard Salesforce "Apex Warning Emails" in Setup are different from NPSP-specific framework errors.
- * Option B: There is no "disable" checkbox for individual users in the NPSP settings; the system uses a single designated recipient (User, Chatter Group, or Profile).
- * Option D: Changing profiles just to manage email notifications is an extreme and unnecessary security change that would disrupt the permissions of other administrators.

37. Frage

A nonprofit hired a consultant to restart a stalled implementation. The nonprofit identified needs by documenting its Salesforce vision and pain points and by defining specific goals with user stories. What are two components of a user story the nonprofit should consider? (Choose 2)

- A. Assign a priority to each story.
- B. Associate an epic to each story.
- C. Include configuration instructions on each story.
- D. Align each story to the implementation vision.

Antwort: A,D

Begründung:

User stories are the "building blocks" of an Agile implementation. A well-written user story follows the format: "As a [persona], I want to [action], so that [value/benefit]." To ensure a stalled project gets back on track, two critical components are alignment and prioritization.

* Vision Alignment (B): Every story must have a purpose that contributes to the overall Implementation Vision. If a nonprofit's vision is "Improving Donor Retention," but a user story is created for "Automating Facilities Management," the consultant must evaluate if that story is a distraction. Aligning stories to the vision ensures the consultant builds what the organization actually needs to succeed, rather than just what users want.

* Priority (C): In any implementation, there is limited time and budget. Assigning a priority (often using the MoSCoW method: Must have, Should have, Could have, Won't have) is essential. It allows the consultant and the nonprofit to focus on mission-critical features first, ensuring that if the project runs out of resources, the most valuable parts of the system are already delivered.

Why other options are less critical:

* Configuration Instructions (Option A): This is a mistake. User stories describe the requirement (the "What"), while technical documentation describes the solution (the "How"). Putting configuration steps in a user story makes it rigid and difficult for a developer to suggest better technical alternatives.

* Epics (Option D): While epics are useful for grouping stories, they are a structural tool for project management rather than a "component" of the story's internal logic or value definition. Alignment and Priority are what drive project success.

38. Frage

A consultant is helping a nonprofit organization set up Outcome Management. Which object should the consultant use to link Programs to Indicator Definitions?

- A. Indicator Assignment
- B. Indicator Result
- C. Indicator Performance Period

Antwort: A

Begründung:

In the Salesforce Nonprofit Cloud (NPC) architecture, the Outcome Management feature is designed to provide a standardized way for organizations to define, measure, and track their impact. To successfully implement this, a consultant must understand the hierarchical relationship between several key objects.

The process begins with the Indicator Definition, which acts as a "template" or "master metric." This object stores the logic of what is being measured (e.g., "Number of students who improved their reading level") without being tied to a specific program. To apply this metric to a specific context, Salesforce uses the Indicator Assignment object. This object serves as the essential link (a junction) between the Indicator Definition and the Program, Outcome, or Goal. By using Indicator Assignment, a consultant allows the organization to reuse the same definition across multiple different programs while keeping the tracking and reporting for each program distinct.

Step-by-Step Configuration Flow:

- * Create Indicator Definition: Define the global metric, specifying the data type and how the progress will be calculated.
- * Create the Indicator Assignment: This is the core step. Here, the consultant links the specific Program record to the Indicator Definition. This creates the specific context for measurement.
- * Establish Indicator Performance Periods: Once the assignment is made, the consultant must define the timeframes (e.g., "Q1 2025" or "Annual 2025") during which the program will be evaluated.
- * Record Indicator Results: Finally, as the program progresses, actual data points are entered into the Indicator Result object, which rolls up to the Performance Period and is contextualized by the Assignment.

Without the Indicator Assignment, the system would have no way of knowing which programs are responsible for which metrics.

This structure ensures that a nonprofit can scale its impact measurement across various departments while maintaining a single, clean library of Indicator Definitions.

39. Frage

A nonprofit organization uses Nonprofit Cloud. The organization is shifting from a traditional community-based social services organization that delivers benefits to the community to an organization that focuses on delivering financial capital to other organizations operating in the community. Which Nonprofit Cloud license is needed to manage and track applications for funding?

- A. Program Management
- **B. Grantmaking**
- C. Outcome Management

Antwort: B

Begründung:

When a nonprofit shifts its mission from direct service delivery (program management) to funding other entities, it moves into the role of a "Grantmaker." In the Salesforce Nonprofit Cloud ecosystem, this specific business process is supported by the Grantmaking module.

The Grantmaking license provides access to a specialized data model and set of features designed for the full grant lifecycle:

- * Funding Opportunities: Grantmakers use this object to define the available grants, including eligibility criteria, total funding amounts, and application deadlines.
- * Individual Applications: This is the core object for tracking incoming requests for funding. It allows the organization to manage the review process, due diligence, and scoring of applications from other nonprofits or community groups.
- * Funding Awards and Disbursements: Once an application is approved, the system tracks the Funding Award and schedules the actual payment of "financial capital" through Disbursements.
- * Grantee Portal: Grantmaking often utilizes an Experience Cloud site where applicants can submit their proposals, view their status, and submit required progress reports.

While Program Management (Option B) is used for direct services (like running a food bank), and Outcome Management (Option A) is used to measure the impact of those services, Grantmaking is the specific functional area required for "delivering financial capital" and managing funding applications. For a consultant, identifying this shift in business model is key to ensuring the organization has the correct objects- such as Budget, Funding Opportunity, and Application-available in their org.

40. Frage

A large nonprofit is a social enterprise that functions like a for-profit corporation. The funding the nonprofit tracks in Salesforce only comes from corporations. The nonprofit needs to manage Leads and track its Opportunity pipeline. Which account model should the consultant recommend?

- A. Person Account Model without NPSP
- **B. Individual Account Model in NPSP**

- C. Standard Account Model without NPSP
- D. One-to-One Account Model in NPSP

Antwort: C

Begründung:

This is a "Solution Design" question where the organization's business model dictates the architecture. While NPSP is the default for most nonprofits, it is specifically designed for Individual and Household giving.

If an organization functions like a B2B (Business-to-Business) corporation and only receives funding from other corporations:

* Simplification: They do not need the "Household" or "One-to-One" complexity of NPSP. These models are designed to "wrap" a contact in an account to support individual donations.

* Standard Sales Cloud: The Standard Account Model (where a Contact belongs directly to an Account/Corporation) is exactly how Salesforce was originally designed to work for corporate sales.

* Lead/Pipeline Management: By using Standard Salesforce (without NPSP), they get the cleanest experience for Lead conversion and Opportunity management, as all the NPSP-specific automation (like Household naming) would be unnecessary overhead for a purely corporate funding model.

Option A (Person Accounts) is also a specialty model, but it is intended for B2C (Business-to-Consumer) interactions. For a social enterprise dealing with corporations, Standard Accounts provide the best "out-of-the-box" fit.

41. Frage

.....

Die Salesforce Zertifizierungsprüfung ist jetzt eine sehr populäre Prüfung. Haben Sie diese Salesforce NP-Con-102 Zertifizierung abgelegt? Wenn nein, sollen Sie bitte schneller etwas machen. Es ist sehr wichtig für Sie, diese wichtige Zertifizierung zu besitzen. Wie Salesforce NP-Con-102 Zertifizierungsprüfung hocheffektiv vorzubereiten und nur einmal die Salesforce NP-Con-102 Prüfung zu bestehen spielt heute eine sehr übergreifende Rolle.
