

1Z0-1163-1 Relevant Answers, 1Z0-1163-1 Test Pass4sure

BONUS!!! Download part of Real4test 1Z0-1163-1 dumps for free: <https://drive.google.com/open?id=17jyVkvi2JBO934O6YryTr7lO7dPqfyFw>

We promise you will pass the exam and obtain the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 certificate successfully with our help of 1Z0-1163-1 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Besides we have high-quality 1Z0-1163-1 test guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way. On the other hand, if you fail to pass the exam with our 1Z0-1163-1 Exam Questions unfortunately, you can receive a full refund only by presenting your transcript. At the same time, if you want to continue learning, our 1Z0-1163-1 test guide will still provide free updates to you and you can have a discount more than one year. Finally our refund process is very simple. If you have any question about Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 study question, please contact us immediately.

The Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) certification test is an important part of career growth, and passing it may lead to more employment opportunities. However, preparing for the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) test may be tough, and many busy applicants have difficulty cracking it. This is where Real4test Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 real exam questions come to help you clear the test in a short time.

1Z0-1163-1 Test Pass4sure - Authentic 1Z0-1163-1 Exam Questions

In this competitive society, being good at something is able to take up a large advantage, especially in the IT industry. Gaining some IT authentication certificate is very useful. Oracle 1Z0-1163-1 is a certification exam to test the IT professional knowledge level and has a Pivotal position in the IT industry. While Oracle 1Z0-1163-1 exam is very difficult to pass, so in order to pass the Oracle certification 1Z0-1163-1 exam a lot of people spend a lot of time and effort to learn the related knowledge, but in the end most of them do not succeed. Therefore Real4test is to analyze the reasons for their failure. The conclusion is that they do not take a pertinent training course. Now Real4test experts have developed a pertinent training program for Oracle Certification 1Z0-1163-1 Exam, which can help you spend a small amount of time and money and 100% pass the exam at the same time.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 2	<ul style="list-style-type: none"> OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 3	<ul style="list-style-type: none"> OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 4	<ul style="list-style-type: none"> Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 5	<ul style="list-style-type: none"> OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 6	<ul style="list-style-type: none"> OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q23-Q28):

NEW QUESTION # 23

Which activity is fundamental to the Insight to Sourcing OMBP, ensuring effective procurement and cost optimization?

- A. Performance Monitoring, which assesses supplier ability to meet quality and service standards by utilizing audits, inspections, or performance reviews.
- B. Idea Generation, which identifies market opportunities, incorporating trend analysis and internal innovation.
- C. Spend Analysis, which involves categorizing and analyzing historical spending data to identify cost-saving opportunities and

strategic sourcing decisions.

Answer: C

Explanation:

Spend Analysis (B) is the cornerstone of the Insight to Sourcing OMBP in Oracle Fusion Cloud SCM, as it involves categorizing and analyzing historical spending data to uncover cost-saving opportunities and inform strategic sourcing decisions. By examining past expenditures-e.g., identifying that 70% of spending on raw materials comes from a single supplier-businesses can negotiate better terms, consolidate suppliers, or shift to lower-cost alternatives, optimizing procurement costs. Option A (Idea Generation) is a preliminary step focused on innovation and market trends, not the core analytical activity driving sourcing. Option C (Performance Monitoring) evaluates supplier performance post-sourcing, not the initial insight process. For instance, Spend Analysis might reveal excessive spending on expedited shipping, prompting a shift to local suppliers, directly impacting cost efficiency and procurement strategy. This data-driven approach ensures decisions are grounded in financial reality, making it fundamental to the OMBP.

NEW QUESTION # 24

Which feature in Oracle Fusion Cloud SCM provides real-time order promising based on supply and demand constraints?

- A. Supplier Portal.
- **B. Global Order Promising.**
- C. Cost Accounting.
- D. Manufacturing Execution.

Answer: B

Explanation:

Global Order Promising (A) provides real-time order promising by analyzing supply (inventory, production) and demand (orders, forecasts) constraints across the enterprise. For instance, if a customer requests 100 units and only 80 are available with a 2-day production lead time, GOP promises delivery in 2 days. Option B (Supplier Portal) supports collaboration, not promising. Option C (Manufacturing Execution) tracks production, not order commitments. Option D (Cost Accounting) handles financials. GOP enhances customer trust and planning accuracy by delivering feasible, data-driven promises.

NEW QUESTION # 25

What is a key feature of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- **A. It automates the execution of supply chain tasks across different applications, ensuring end-to-end process integration.**
- B. It only manages warehouse operations without linking to procurement or manufacturing.
- C. It provides a manual approach to tracking supply chain transactions.

Answer: A

Explanation:

The Supply Chain Orchestration (SCO) process in Oracle Fusion Cloud SCM is a pivotal feature that automates the execution of supply chain tasks across multiple applications, including procurement, manufacturing, and inventory management. It ensures seamless end-to-end process integration by coordinating activities like order fulfillment, material transfers, and production scheduling. Option A is incorrect because SCO extends beyond warehouse operations to integrate with procurement and manufacturing. Option C is also inaccurate as SCO eliminates manual tracking by leveraging automation, improving efficiency and visibility across the supply chain. This capability reduces delays and enhances coordination, aligning with Oracle's goal of a connected supply chain ecosystem.

NEW QUESTION # 26

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- A. Inventory Management.
- B. Cost Accounting.
- **C. Manufacturing Execution.**
- D. Supplier Qualification.

Answer: C

Explanation:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

NEW QUESTION # 27

What role does the Inventory Management function play in Oracle Fusion Cloud SCM?

- A. It focuses on reducing supplier costs instead of stock levels.
- **B. It ensures optimal inventory levels by tracking stock movement and availability.**
- C. It manages only supplier shipments, not warehouse stock.

Answer: B

Explanation:

Inventory Management in Oracle Fusion Cloud SCM ensures optimal inventory levels by tracking stock movement, availability, and replenishment needs across warehouses and supply chains. It monitors quantities on hand, in transit, and on order, using real-time data to prevent overstocking or stockouts. For instance, if a product's stock drops below a reorder point, the system triggers a replenishment alert. Option A is incorrect-reducing supplier costs is a procurement goal, not Inventory Management's focus, which is stock optimization. Option B is wrong as it manages warehouse stock, not just supplier shipments. This function balances inventory costs with service levels, supporting efficient operations and customer satisfaction by ensuring products are available when needed without tying up excess capital.

NEW QUESTION # 28

.....

The candidates all enjoy learning on our 1Z0-1163-1 practice exam study materials. Also, we have picked out the most important knowledge for you to learn. The difficult questions of the 1Z0-1163-1 study materials have detailed explanations such as charts, illustrations and so on. We have invested a lot of efforts to develop the 1Z0-1163-1 Training Questions. Please trust us. You absolutely can understand them after careful learning.
