## Free PDF Quiz Fantastic Huawei - H12-725\_V4.0 - HCIP-Security V4.0 Latest Exam Discount

Lead1Pass have made customizable Huawei H12-725\_V4.0 practice tests so that users can take unlimited tests and improve HCIP-Security V4.0 exam preparation day by day. These H12-725\_V4.0 practice tests are based on the real examination scenario so the students can feel the pressure and learn to deal with it. The customers can access the result of their previous given H12-725\_V4.0 Exam history and try not to make any excessive mistakes in the future. The HCIP-Security V4.0 practice tests have customizable time and H12-725\_V4.0 exam questions feature so that the students can set the time and H12-725\_V4.0 exam questions according to their needs.

Huawei H12-725\_V4.0 (HCIP-Security V4.0) Certification Exam is a professional-level certification exam for IT security professionals. H12-725\_V4.0 exam is designed to measure the candidate's knowledge and skills in the area of network security, including firewall technology, VPN technology, intrusion detection and prevention, and security management. HCIP-Security V4.0 certification is suitable for candidates with a background in network security and experience in IT security.

## Huawei HCIP-Security V4.0 Sample Questions (Q54-Q59):

### NEW QUESTION # 54

The difference between DoS attacks and DDoS attacks is that DoS attacks are usually directly initiated by attackers, whereas DDoS attacks are usually initiated by attackers controlling multiple zombies.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

- \* DoS (Denial-of-Service) # A single attacker sends excessive traffic to a target.
- \* DDoS (Distributed Denial-of-Service) # Uses multiple compromised devices (zombies or botnets) to amplify the attack.
- \* Why is this statement true?
- \* DDoS attacks originate from multiple sources (botnets), unlike DoS attacks.

HCIP-Security References:

- \* Huawei HCIP-Security Guide # DoS vs. DDoS Attacks

#### NEW QUESTION # 55

Which of the following items are recorded in the IPS service module logs of a Huawei NGFW?(Select All that Apply)

- A. Signature ID
- B. Source IP address of the attacker
- C. Signature name
- D. Attack duration

**Answer: A,B,C,D**

Explanation:

Comprehensive and Detailed Explanation:

- \* Intrusion Prevention System (IPS) logs record attack details for analysis and response.
- \* The following information is logged:
  - \* A. Signature ID # Unique identifier for the detected attack.
  - \* B. Source IP address of the attacker # Identifies the origin of the attack.
  - \* C. Attack duration # How long the attack lasted.
  - \* D. Signature name # The specific attack detected (e.g., SQL injection).
- \* All options are correct because Huawei NGFW logs complete IPS event details.

HCIP-Security References:

- \* Huawei HCIP-Security Guide # IPS Logging & Analysis

#### NEW QUESTION # 56

During deployment of Portal authentication, an authentication-free rule profile needs to be configured to ensure Portal pages can be opened on authentication terminals. To achieve this purpose, the following traffic needs to be permitted in the authentication-free rule profile: DNS resolution traffic of user terminals, traffic from user terminals for accessing Portal pages, and traffic from user terminals to the RADIUS server.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

- \* Authentication-free rules allow unauthenticated users to access essential services before login.
- \* The following traffic must be allowed before authentication:
  - \* DNS traffic # Users need to resolve domain names for the Portal page.
  - \* Portal page access # The captive portal must be reachable.
  - \* RADIUS server communication # Users must authenticate via RADIUS.
- \* Why is this statement true?
- \* Without these authentication-free rules, users would be unable to reach the Portal login page.

HCIP-Security References:

- \* Huawei HCIP-Security Guide # Portal Authentication-Free Rules

#### NEW QUESTION # 57

Which of the following statements is false about the restrictions on configuring bandwidth profiles in parent and child policies on a firewall?

- A. Both the parent and child policies must both use the same traffic limiting mode; that is, either "setting the upstream and downstream bandwidths" or "setting the overall bandwidth".
- B. The maximum bandwidth specified in a child policy cannot be greater than that specified in the parent policy.
- C. The connection limit specified in a child policy cannot be smaller than that specified in the parent policy.
- D. The parent and child policies must reference different bandwidth profiles.

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

- \* Bandwidth policies use a hierarchical structure(Parent # Child).
- \* Child policies must follow parent policies in terms of bandwidth restrictions.
- \* Why is C false?
- \* A parent and child can use the same bandwidth profile.
- \* The firewall allows inheritance of bandwidth settings.

HCIP-Security References:

- \* Huawei HCIP-Security Guide # Bandwidth Management and Policy Configuration

### NEW QUESTION # 58

Authentication rules configured on iMaster NCE-Campus support multiple matching conditions, such as matching account information, SSID information, and terminal IP address ranges, so that different authentication rules can be executed for different users.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

- \* iMaster NCE-Campus authentication supports multi-condition matching:
- \* Account information (e.g., username, password, role-based policies).
- \* SSID information (specific Wi-Fi network authentication).
- \* Terminal IP address ranges (assigns different policies based on network segments).
- \* Why is this statement true?
- \* Multiple authentication conditions can be applied simultaneously to enforce flexible access control.

HCIP-Security References:

- \* Huawei HCIP-Security Guide # iMaster NCE-Campus Authentication Policy
