CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q276-Q281):

NEW QUESTION # 276

A server administrator is configuring a new private cloud cluster so the physical storage on each host will be shared across the cluster. Which of the following best describes this configuration?

- A. Network attached storage
- B. Software-defined storage
- C. Object storage
- D. File storage

Answer: B

Explanation:

Software-defined storage (SDS) refers to the virtualized storage management system where the storage resources are abstracted and managed by software rather than being tied to physical hardware. In this case, the physical storage on each host being shared across the cluster is a characteristic of SDS, which enables centralized management of storage across multiple hosts, improving scalability and flexibility.

NEW QUESTION # 277

Which of the following is a benefit of public cloud computing?

- A. Reduces OPEX costs for application and databases
- B. Enhances fixed expenditures for hardware and software
- C. Adds flexibility and agility to enterprise architecture
- D. Contributes to the quality of user input data

Answer: A

NEW QUESTION # 278

Which of the following types of clouds is a company implementing when it provides advertisement supported virtualized services to its customers?

- A. Public
- B. Private
- C. Community
- D. Hybrid

Answer: A

NEW QUESTION # 279

The legal team is required to share legal proceedings with an outside council. The team uses SaaS fileshares. Which of the following policies will BEST state the requirements for sharing information with external parties?

- A. Identity control policy
- B. Communication policy
- C. Information security policy
- D. Resource management policy

Answer: C

Explanation:

An information security policy is a document that defines the rules and guidelines for protecting the confidentiality, integrity, and availability of data and systems in an organization. It covers topics such as data classification, access control, encryption, backup, incident response, and compliance. An information security policy is essential for ensuring that data is shared securely with external parties, especially when using SaaS fileshares that may have different security standards and features than the organization's own systems. A communication policy, a resource management policy, and an identity control policy are all related to information security, but they are not as comprehensive and specific as an information security policy.
