Salesforce Analytics-DA-201 Prüfungsplan:

Thema	Einzelheiten

Thema 1	ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.
Thema 2	SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S/4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Thema 3	Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Thema 4	ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S/4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.
Thema 5	ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.

43. Frage

Open the link to Book1 found on the desktop. Open SalesVSPProfit worksheet.
Add a distribution band on Profit to show the standard deviation from- 1 to 1.

Antwort:

Begründung:

check the steps below in explanation.

Explanation:

To add a distribution band on Profit to show the standard deviation from -1 to 1, you need to do the following steps:

- * Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the SalesVSProfit worksheet.
- * Click on the SalesVSProfit tab at the bottom of the workbook to open the worksheet. You will see a scatter plot that shows the relationship between Sales and Profit for each Sub-Category.
- * Click on the Analytics tab on the left side of the workbook to open the Analytics pane. You will see a list of analytical objects that you can drag and drop onto your worksheet.
- * Drag Distribution Band from the Analytics pane to Profit on the Rows shelf. This will add a distribution band on Profit that shows the average and confidence interval for each Sub-Category.
- * Click on the Edit button on the distribution band to open the Edit Distribution Band dialog box. You will see options to customize your distribution band.
- * Change the Band From value to -1 and the Band To value to 1. This will change the distribution band to show the standard deviation from -1 to 1, which means one standard deviation below and above the average.
- * Click OK to apply the changes. You will see that the distribution band now shows a narrower range of values for Profit.

44. Frage

You publish a dashboard that uses an extract. The extract refreshes every Monday at 10:00.

You need to ensure that the extract also refreshes on the last day of the month at 18:00.

What should you do?

- A. From Tableau Server, select Schedules, and change the priority of the existing schedule.
- B. From Tableau Server, select Schedules, find the schedule of the extract, and change the frequency to the last day of the month.
- C. From Tableau Desktop, open the Publish Workbook dialog box and configure the schedule.
- D. From Tableau Server, select the workbook, select Refresh Extracts, and then add a new extract refresh.

Antwort: D

Begründung:

To ensure that the extract also refreshes on the last day of the month at 18:00, you need to add a new extract refresh task to the workbook on Tableau Server. You can do this by selecting the workbook, selecting Refresh Extracts, and then choosing Schedule a Refresh. You can then select an existing schedule that matches your desired frequency and time, or create a new schedule with a custom frequency and time. This will add a new extract refresh task to the workbook, in addition to the existing one that refreshes every Monday at 10:00. You can also modify or delete the extract refresh tasks as needed. Antwort: A,C

46. Frage

Open the link to Book1 found on the desktop. Open the Histogram worksheet and use the Superstore data source. Create a histogram on the Quantity field by using bin size of 3.

Antwort:

Begründung:

check the steps below in explanation.

Explanation:

To create a histogram on the Quantity field by using bin size of 3, you need to do the following steps:

* Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.

* Click on the Histogram tab at the bottom of the workbook to open the Histogram worksheet. You will see a blank worksheet with no marks.

* Right-click on Quantity in the Measures pane and select Create Bins from the menu. This will open a dialog box that allows you to create bins for the Quantity field. Bins are groups of values that are treated as one unit in a histogram.

* Enter 3 in the Size of bins text box. This will set the bin size to 3, which means that each bin will contain values that are 3 units apart. For example, one bin will contain values from 0 to 2, another bin will contain values from 3 to 5, and so on.

* Click OK to create the bins. You will see a new field named Quantity (bin) in the Measures pane with a

sign next to it.

* Drag Quantity (bin) from the Measures pane to Columns on the worksheet. This will create a histogram that shows the distribution of Quantity by bins. You will see bars that represent the frequency or count of values in each bin.

* Optionally, you can adjust the width, color, and labels of the bars by using the options on the Marks card. You can also add filters, tooltips, or annotations to enhance your histogram.
