Authoritative JN0-253 - Discount Mist AI, Associate (JNCIA-MistAI) Code

ExamDiscuss exam material is best suited to busy specialized who can now learn in their seemly timings. The JN0-253 Exam dumps have been gratified in the PDF format which can certainly be retrieved on all the digital devices, including; Smartphone, Laptop, and Tablets. There will be no additional installation required for JN0-253 certification exam preparation material. Also, this PDF can also be got printed. And all the information you will seize from JN0-253 Exam PDF can be verified on the Practice software, which has numerous self-learning and self-assessment features to test their learning. Our software exam offers you statistical reports which will upkeep the students to find their weak areas and work on them.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which Juniper Mist feature tracks the location of important devices and objects within a building?

- A. User Engagement
- **B. Asset Visibility**
- C. Wireless Assurance
- D. IoT Assurance

Answer: B

Explanation:

The Juniper Mist Asset Visibility service provides real-time tracking and visibility for important devices and objects within indoor environments such as hospitals, offices, or warehouses. It uses Bluetooth Low Energy (BLE) technology and Mist vBLE-enabled access points to determine the precise location of tagged assets.

According to the Juniper Mist Location Services Guide, the feature is defined as:

"Asset Visibility leverages virtual Bluetooth LE technology and BLE tags to locate and track assets on floor plans in real time, providing actionable location-based intelligence." Key functionalities include:

* Tracking BLE-tagged assets such as medical equipment, IT devices, or inventory.

* Displaying live location information on floor maps.

* Integrating with external asset management or workflow systems.

While User Engagement focuses on customer-facing location experiences (e.g., navigation or proximity marketing), Asset Visibility is designed specifically for internal asset monitoring and operational efficiency.

Therefore, the correct answer is C. Asset Visibility.

NEW QUESTION # 32

Mist cloud supports single sign-on in which two scenarios? (Choose two.)

- A. Wi-Fi guest login access
- B. admin login to the Mist portal
- C. account login used for NETCONF
- D. account login used for the RESTful API

Answer: C,D

NEW QUESTION # 33

What are three methods for requesting authentication in the Juniper Mist API? (Choose three.)

- A. Use an HTTPS login with a user name and password.
- B. Use OAuth2 linked to an OAuth provider.
- C. Enable basic authentication with a token.
- D. Use RADIUS certificates.
- E. Enable MFA with Okta Verify.

Answer: A,B,C

Explanation:

The three valid methods for requesting authentication with the Juniper Mist API are:

Use an HTTPS login with a user name and password: The Mist API accepts HTTPS requests where credentials are provided directly for session/token generation and user administration.

Use OAuth2 linked to an OAuth provider: "Juniper Mist APIs offer authentication via OAuth2 with various OAuth-compatible identity providers, such as Okta, for secure and federated access."

Enable basic authentication with a token: Mist APIs accept programmatic requests using tokens (API tokens or bearer tokens) for automation, scripting, and integration—each token mapping to specific scopes and user permissions.

Enabling MFA with Okta Verify enhances user portal security but is not an API authentication mechanism.

RADIUS certificates are used for infrastructure 802.1X authentication, not for API access.

NEW QUESTION # 34

Which statement describes Marvis Actions?

- A. It is a dashboard that describes user actions.
- B. It is a dashboard that highlights actionable items.
- C. It is a dashboard that lists the actions taken by wireless users.
- D. It is a dashboard that details actions taken by the Marvis AI.

Answer: B

Explanation:

Marvis Actions is a component of the Mist AI platform that provides a dashboard highlighting actionable items. This dashboard is designed to offer insights and recommendations based on the analysis performed by Marvis AI.

The focus of Marvis Actions is to present users with clear, actionable steps that can improve network performance, resolve issues, and enhance the overall user experience. By consolidating relevant information and suggested actions, Marvis Actions helps network administrators efficiently address network challenges and optimize operations.

NEW QUESTION # 35

What does the "Exceeded" status mean for a subscription?

- A. The allowed usage within the subscription has been surpassed.
- B. The subscription has been cancelled.
- C. The subscription is nearing its expiration date.
- D. The subscription exceeds the number of maximum allowable APs.

Answer: A

Explanation:

The "Exceeded" status for a subscription means that the allowed usage defined within the subscription has been surpassed. This typically refers to exceeding limits such as the number of devices, data usage, or other metrics specified in the subscription plan. Exceeding these limits may require action such as upgrading the subscription plan to accommodate the additional usage.

NEW QUESTION # 36
