Pegasystems PEGACPBA24V1 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Experience: This domain assesses skills of UX Designers and Frontend Developers in configuring user interface elements. Candidates learn to group fields to create views, add or remove fields, configure portal content, adjust form appearance, visibility, and controls for an improved user experience.

Topic 2	Case Management: This domain targets Case Designers and Process Architects and explores designing a case lifecycle, including setting case statuses and adding instructions for tasks. Candidates demonstrate ability to configure service level agreements with urgency, goals, and deadlines, and manage routing of assignments to users, work groups, or queues. This section also includes configuring email correspondence, identifying duplicate cases, adding optional actions and automating workflow decisions using conditions. Candidates learn to pause and resume case processing, skip stages or processes, configure child cases, use automation shapes appropriately, and create and manage user teams.
Topic 3	- Application Development: This section evaluates skills of Pega Business Architects and Developers in application development. It covers the roles and skills of a Pega Business Architect, identification of project stakeholders, and benefits of Pega's Center-out™ business architecture. Candidates learn about App Studio's value, understand rules, rulesets, classes, and the role of generative AI. The domain also covers Pega's CI - CD pipeline with Deployment Manager, use of collaboration tools, managing application development with user stories, feedback, and bug tracking, and using tools like Case Type Backlog and Estimator for project scoping.
Topic 4	Reporting: This domain measures reporting capabilities of Reporting Analysts and Data Visualization Specialists. Candidates learn the benefits of using Insights, creating visualizations with tables and charts, and utilizing columns and filters for effective data representation.
Topic 5	Security: Designed for Security Analysts and Access Managers, this domain covers the relationship between personas, operators, and access groups within Pega. Candidates articulate the difference between authorization and authentication and understand their applications.
Topic 6	Data and Integration: This section measures skills of Data Analysts and Integration Specialists focusing on configuring data objects, relationships, and records. Candidates learn to capture and present data through fields and views, create calculated values, validate data with business logic rules, manipulate application data including setting default property values, and configure data transforms.

Review the following decision table.

Conditions			Actions
	Credit Score	Outstading Balance	Return
if	>800		Level 3
else if	>650	<1200	Level 2
else if	>500	<2000	Level 1
			Reject

If the credit score is 800 and the outstanding balance is 1000, what is the result of the decision? Response:

- A. Reject
- B. Level1
- C. Level3
- D. Level2

Answer: D

NEW QUESTION # 19

Which two statements are true about insights? (Choose Two)

- A. You can search for and select the fields that you want to include in an insight.
- B. You can transform sharable visualizations into data queries.
- C. You can edit application data directly in an insight.
- D. You can transform data queries into sharable visualizations.

Answer: A,D

Explanation:

Two statements about insights are true:

* B.You can search for and select the fields that you want to include in an insight. This allows for customized data visualizations based on selected fields.

* C.You can transform data queries into sharable visualizations, making it easy to share insights with others in the organization.
