Diverse Formats for Juniper JN0-253 Exam Questions: Choose What Works Best for You
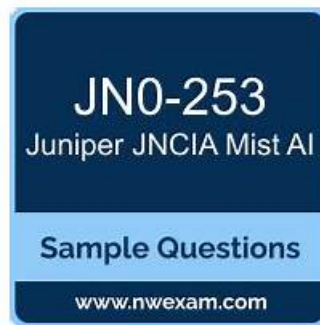

As we all know, a good JN0-253 Exam Torrent can win the support and fond of the customers, JN0-253 exam dumps of are just the product like this. With high pass rate and high quality, we have received good reputation in different countries in the world. We are a professional enterprise in this field, with rich experience and professional spirits, we have help many candidates pass the exam. What's more, the free update is also provided.

We have to admit that the exam of gaining the JN0-253 certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the JN0-253 certification is a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the JN0-253 Exam, do not worry, we are glad to help you. Because the JN0-253 study materials from our company are very useful for you to pass the exam and get the certification.

Study JN0-253 Center & Reliable JN0-253 Braindumps Files

It is a truth universally acknowledged that the exam is not easy but the related JN0-253 certification is of great significance for workers in this field, I am glad to tell you that our company aims to help you to pass the JN0-253 examination as well as gaining the related certification in a more efficient and simpler way. During nearly ten years, our JN0-253 Exam Questions have met with warm reception and quick sale in the international market. Our JN0-253 study materials are not only as reasonable priced as other makers, but also they are distinctly superior.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q43-Q48):

NEW QUESTION # 43
Your company hosts its own enterprise-wide monitoring solution. You want to receive events from Juniper Mist.
How would you accomplish this task?

- A. Sending an e-mail
- B. Using a WebSocket
- C. Using the API
- D. Using a webhook

Answer: D

Explanation:
In theJuniper Mist Cloud,webhooksare used to sendreal-time event notificationsfrom Mist Cloud to external systems such as third-party monitoring or automation platforms. This integration mechanism allows administrators to collect alerts, status changes, and analytics data directly from Mist Cloud without the need for constant API polling.
According to theJuniper Mist API and Webhook Integration Guide, webhooks are defined as:
"A push-based communication method that enables Juniper Mist Cloud to send event data to a customer- defined HTTP endpoint when specific network events occur." This capability allows seamless integration with enterprise monitoring solutions such asServiceNow,Splunk, orDatadog, enabling organizations to centralize event management.
The other options are not suitable:
* A (API):APIs are pull-based and require polling for updates, not push notifications.
* B (Email):Not supported for automated system-to-system event delivery.
* D (WebSocket):Used for live telemetry and streaming data (e.g., client updates), not event alerts.
Therefore, the correct method isC. Using a webhook.

NEW QUESTION # 44
What is required for Marvis Minis to operate?

- A. Minimum AP firmware
- B. WLAN template
- C. WAN Assurance subscription
- D. Premium Analytics subscription

Answer: A

Explanation:
Marvis Minisis an advanced feature within the Juniper Mist AI ecosystem designed to performautonomous, synthetic network testing. It uses Mist Access Points (APs) to simulate client behavior-such as association, authentication, DHCP, DNS, and application reachability-to proactively detect service issuesbefore real users are affected.
According to theJuniper Mist Marvis Minis Deployment GuideandMarvis AI documentation, the key requirement for enabling Marvis Minis is that all participating access points must be running aminimum supported firmware versionthat includes the Minis agent functionality.
The documentation specifies:
"Marvis Minis requires APs running the minimum firmware version that supports synthetic testing. APs on earlier versions will not be capable of running Minis tests or reporting results to the Mist Cloud." Additional subscriptions such asWAN Assurance,Premium Analytics, orWLAN templatesare not prerequisites for operation. WhileMarvis licensingmust be active, the feature itself relies primarily on compatible firmware within the Mist-managed APs.
Therefore, the correct answer isC. Minimum AP firmware- ensuring the APs are on a supported firmware release is essential for Marvis Minis functionality.

NEW QUESTION # 45
Which Juniper Mist feature tracks the location of important devices and objects within a building?

- A. Wireless Assurance
- B. User Engagement
- C. IoT Assurance
- D. Asset Visibility

Answer: D

Explanation:

TheJuniper Mist Asset Visibilityservice provides real-time tracking and visibility for important devices and objects within indoor environments such as hospitals, offices, or warehouses. It usesBluetooth Low Energy (BLE)technology andMist vBLE-enabled access pointsto determine the precise location of tagged assets.

According to theJuniper Mist Location Services Guide, the feature is defined as:

"Asset Visibility leverages virtual Bluetooth LE technology and BLE tags to locate and track assets on floor plans in real time, providing actionable location-based intelligence." Key functionalities include:

* Tracking BLE-tagged assets such as medical equipment, IT devices, or inventory.
* Displaying live location information on floor maps.
* Integrating with external asset management or workflow systems.

WhileUser Engagementfocuses on customer-facing location experiences (e.g., navigation or proximity marketing),Asset Visibilityis designed specifically for internal asset monitoring and operational efficiency.

Therefore, the correct answer isC. Asset Visibility.

NEW QUESTION # 46

Which statement describes Marvis Actions?

- A. It is a dashboard that details actions taken by the Marvis AI.
- B. It is a dashboard that describes user actions.
- C. It is a dashboard that highlights actionable items.
- D. It is a dashboard that lists the actions taken by wireless users.

Answer: C

Explanation:

Marvis Actions is a component of the Mist AI platform that provides a dashboard highlighting actionable items. This dashboard is designed to offer insights and recommendations based on the analysis performed by Marvis AI.

The focus of Marvis Actions is to present users with clear, actionable steps that can improve network performance, resolve issues, and enhance the overall user experience. By consolidating relevant information and suggested actions, Marvis Actions helps network administrators efficiently address network challenges and optimize operations.

NEW QUESTION # 47

How do Wireless Assurance SLEs help administrators troubleshoot?

- A. They set benchmarks for network performance and user experiences.
- B. They manage Juniper Mist subscriptions.
- C. They help streamline the onboarding process.
- D. They customize the Guest User portal.

Answer: A

Explanation:

In Juniper Mist AI,Wireless Assurance Service Level Expectations (SLEs)are designed to provideAI- driven visibility into user experience and network performance. Each SLE represents a specific aspect of the end-user journey - such asTime to Connect, Throughput, Coverage, Roaming, Capacity, and Application Experience.

According to the Juniper Mist documentation, SLEs "define measurable benchmarks for user experience and identify where deviations occur." This allows administrators to quickly determine whether issues stem from client devices, access points, wired uplinks, or WAN connectivity. When an SLE metric falls below its threshold, Mist AI automatically highlights the affected classifier (for example, DHCP, DNS, or Wi-Fi interference) and providesroot-cause correlationthrough AI-driven insights.

This data-driven approach enables administrators totroubleshoot proactivelyby focusing on user-impacting areas instead of raw device statistics. Thus, Wireless Assurance SLEs act asexperience-based benchmarks that simplify troubleshooting, improve performance visibility, and shorten mean time to repair (MTTR).
