2025 Latest ValidExam 350-601 PDF Dumps and 350-601 Exam Engine Free Share: <https://drive.google.com/open?id=10RYwHyu0If3GKWhhlhucHihpwmlU84w->

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the Implementing Cisco Data Center Core Technologies (350-601 DCCOR) exam, our experts keep their eyes focusing on it. Expert team not only provides the high quality for the 350-601 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of Implementing Cisco Data Center Core Technologies (350-601 DCCOR) test material and no longer make the same mistake.

## Related Certification Paths: CCNP Data Center

The CCNP Data Center designation targets specific IT roles that are uniquely tied to data center design, maintenance, and installation. This is an excellent training path that qualifies candidates for a variety of IT roles such as data center designer, analyst, engineer, and administrator. The new CCNP Data Center curriculum entails passing a combination of two exams: the above-mentioned Cisco 350-601 and a preferred choice, which makes up for the concentration exam selection. Generally, you can choose a concentration test from the following options: 300-610, 300-615, 300-620, 300-625, and 300-635.

## Related Certification Tracks

- **Cisco CCIE Data Center**

Cisco CCIE Data Center is the highest attainable certificate within Cisco's comprehensive data center path. It confirms expert-level mastery of data center technologies and is the key to distinguishing yourself as a top-ranked IT nerd who gives reliable solutions. CCIE Data Center will not only confirm your ability to work with complex data center technologies but will also prepare you for a wide range of exciting roles within the same niche. To attain it, candidates must ace two tests: the above-mentioned Cisco 350-601 alongside the relevant lab exam, CCIE Data Center v3.0.

- **Cisco CCNP Data Center**

Cisco CCNP Data Center is a professional-level certificate for those who want to prove their data center networking skills at the intermediate level. Obtaining it requires the candidates to succeed in two different exams. In this case, the combination includes a core test, basically, Cisco 350-601 and one concentration exam that can be selected out of the five options. They allow one to validate specialized skills in different areas such as designing or troubleshooting the Cisco data center infrastructure, performing the implementation of automation, setting up Cisco MDS 9000 Series switches, or utilizing Cisco application centric infrastructure. Also, having about 3-5 years of experience in the data center field is recommended.

- **Cisco Certified Specialist – Data Center Core**

If you are not ready to pass the concentration test and go for CCNP Data Center, passing 350-601 will still bring you a certificate. This is Cisco Certified Specialist – Data Center Core. This title helps individuals to mark their achievement even if this is only a basic test and verify skills needed for more advanced accreditations.

## 350-601 Exam Material & Exam 350-601 Question

What is more, some after-sales services behave indifferently towards exam candidates who eager to get success, our 350-601 practice materials are on the opposite of it. So just set out undeterred with our 350-601 practice materials, These 350-601 practice materials win honor for our company, and we treat it as our utmost privilege to help you achieve your goal. Our 350-601 practice materials are made by our responsible company which means you can gain many other benefits as well.

### Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q227-Q232):

#### NEW QUESTION # 227

Refer to the exhibit. Which two Cisco UCS components are upgraded as a result of the configuration? (Choose two.)

The screenshot shows the 'Install Infrastructure Firmware' configuration window in the Cisco UCS Manager. The 'Firmware System Status' section indicates the 'Firmware Installer' is 'Ready'. The 'Properties' section shows the 'Name' is 'default', 'Description' is 'Infrastructure Pack', 'Infra Pack' is '3.2(2d)A', 'Service Pack' is '<not set>', 'Force' is checked, and 'Evacuate' is unchecked. The 'Infrastructure Upgrade Schedule' section shows 'Admin State' as 'Untriggered', 'Owner' as 'Local', 'Max Number Of Concurrent Tasks' as 'Unlimited', and 'Start Time' as empty. At the bottom, there is a checkbox for 'Upgrade Now' and buttons for '< Prev', 'Finish', and 'Cancel'.

- A. BIOS
- B. Cisco UCS Manager
- C. IOMs
- D. board controller
- E. adapters

**Answer: B,C**

Explanation:

Install Infrastructure Firmware - Uses the Cisco UCS Infrastructure Software Bundle to upgrade the infrastructure components, such as the fabric interconnects, the I/O modules, and Cisco UCS Manager.

#### NEW QUESTION # 228

Drag and drop the characteristics from the left onto the NAS protocols on the right. Some characteristics are used more than once

Drag and drop the characteristics from the left onto the NAS protocols on the right. Some characteristics are used more than once.

used to boot VHDX files

used to boot VMDK files

uses lease-based model for file locking

used to provide shared storage for hypervisors

NFS

SMB/CIFS

**Answer:**

**Explanation:**

The diagram illustrates the correct mapping of characteristics to NAS protocols:

- used to boot VHDX files** → **NFS**
- used to boot VMDK files** → **SMB/CIFS**
- uses lease-based model for file locking** → **NFS**
- used to provide shared storage for hypervisors** → **SMB/CIFS**

#### NEW QUESTION # 229

Refer to the exhibit.

192.168.20.4  
Flow Analyzer

Internet

192.168.20.2  
Flow Collector

```

switch(config)# flow record L2_record
switch(config-flow-record)# match datalink vlan
switch(config-flow-record)# exit
    
```

Refer to the exhibit. VLAN 10 is experiencing delays and packet drops when the traffic is forwarded through the switch. The destination flow analyzer accepts traffic captures of not more than 30 seconds. Which configuration implements the traffic capture that meets the requirements?

- **switch(config)# flow timeout 30000**  
**switch(config)# interface ethernet 1/1**  
**switch(config-if)# switchport**  
**switch(config-if)# switchport access vlan 10**  
**switch(config-if)# ip flow monitor L2\_monitor output**
- **switch(config)# flow timeout 30**  
**switch(config)# interface ethernet 1/1**  
**switch(config-if)# switchport**  
**switch(config-if)# switchport access vlan 10**  
**switch(config-if)# mac packet-classify**  
**switch(config-if)# layer2-switched flow monitor L2\_monitor input**
- **switch(config)# interface ethernet 1/1**  
**switch(config-if)# flow timeout 30**  
**switch(config-if)# switchport access vlan 10**  
**switch(config-if)# mac packet-classify**  
**switch(config-if)# ip flow monitor L2\_monitor input**
- **switch(config)# interface ethernet 1/1**  
**switch(config)# flow timeout 30000**  
**switch(config-if)# switchport**  
**switch(config-if)# layer2-switched flow monitor L2\_monitor output**  
**switch(config-if)# switchport access vlan 10**

- A. Option C
- **B. Option B**
- C. Option A
- D. Option D

**Answer: B**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus9000/sw/7-x/system\\_management/configuration/guide/b\\_Cisco\\_Nexus\\_9000\\_Series\\_NX-OS\\_System\\_Management\\_Configuration\\_Guide\\_7x/b\\_Cisco\\_Nexus\\_9000\\_Series\\_NX-OS\\_System\\_Management\\_Configuration\\_Guide\\_7x\\_chapter\\_011100.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus9000/sw/7-x/system_management/configuration/guide/b_Cisco_Nexus_9000_Series_NX-OS_System_Management_Configuration_Guide_7x/b_Cisco_Nexus_9000_Series_NX-OS_System_Management_Configuration_Guide_7x_chapter_011100.html)  
[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/sw/4\\_2/nx-os/system\\_management/configuration/guide/sm\\_nx\\_os\\_cli/sm\\_15netflow.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/sw/4_2/nx-os/system_management/configuration/guide/sm_nx_os_cli/sm_15netflow.html)

#### NEW QUESTION # 230

An engineer requires the Cisco Fabric Services to distribute NTP configuration only to the members within the scope of a VSAN that

belongs to a Cisco Unified Network. Which scope distribution must be selected to meet this requirement?

- A. Uncoordinated scope
- **B. Logical scope**
- C. Coordinated scope
- D. Physical scope

**Answer: B**

Explanation:

Cisco Fabric Services (CFS) offers a logical scope distribution mode that allows configurations to be distributed within the scope of a VSAN. This mode is suitable for features like NTP, where the configuration database is applicable only within a VSAN. It ensures that changes are contained within the specific VSAN, preventing any impact on other VSANs in the network.

References:

\* Cisco's official documentation on Configuring and Managing VSANs<sup>1</sup> provides a detailed explanation of VSANs, their advantages, and how they can be managed using CFS.

\* The Cisco Fabric Services guide<sup>2</sup> further elaborates on the features of CFS, including the logical scope distribution mode and its relevance to features like NTP.

\* Community discussions on NTP configuration<sup>3</sup> can also provide practical insights into the application of these settings in real-world scenarios.

### NEW QUESTION # 231

An engineer must start a software upgrade on a Cisco Nexus 5000 Series Switch during a zone merge. What is the result of this action?

- **A. The upgrade stops**
- B. The zone merge pauses until the upgrade completes
- C. The zone merge stops.
- D. The zone merge executes and then the upgrade completes.

**Answer: A**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus5500/sw/upgrade/602\\_N2\\_2/n5500\\_upgrade\\_downgrade\\_602\\_n2\\_2.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus5500/sw/upgrade/602_N2_2/n5500_upgrade_downgrade_602_n2_2.html)

The specific requirements for a nondisruptive upgrade (ISSU) are as follows:

- **Topology requirements**— A Cisco Nexus device on which an ISSU is being initiated should not be in one of the unsupported topologies listed in the previous figure. No interface should be in a spanning-tree designated forwarding state. Also, do not configure Bridge Assurance on any interface of the Cisco Nexus device. vPC peer-link is an exception to these requirements.
- **Layer 2 requirement**— The ISSU process aborts if the system has any Link Aggregation Control Protocol (LACP) fast timers configured.
- **FC/FCoE requirements**— Check that the topology is stable for an ISSU to work correctly. You must check the following:
  - **Domain Manager**—As part of the installation process, domain manager checks if the fabric is in a stable state. If the fabric is not stable, the installation aborts.
  - **CFS**—As part of the installation process, Cisco Fabric Services (CFS) checks if any application (ntp.fsm, rcsn, fctime) is locked. If any application is holding a CFS lock, the installation aborts.
  - **Zone Server**—The installation process aborts if a zone merge or zone change request is in progress.
  - **FSPF**—As part of the upgrade process, Fabric Shortest Path First (FSPF) verifies if the configured interface dead interval is more than 80 seconds; otherwise, the installation aborts.

### NEW QUESTION # 232

.....

There are more opportunities for possessing with a certification, and our 350-601 study tool is the greatest resource to get a leg up on your competition. When it comes to our time-tested 350-601 latest practice materials, for one thing, we have a professional team contains a lot of experts who have devoted themselves to development of our 350-601 Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our 350-601 study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.
