Due to the shortage of useful practice materials or being scanty for them, many candidates may choose the bad quality exam materials, but more and more candidates can choose our H19-301_V4.0 study materials. Actually, some practice materials are shooting the breeze about their effectiveness, but our H19-301_V4.0 training quiz are real high quality practice materials with passing rate up to 98 to 100 percent. And you will be amazed to find that our H19-301_V4.0 exam questions are exactly the same ones in the real exam.

Pass4Leader presents its HCSA-Presales-IP Network V4.0 (H19-301_V4.0) exam product at an affordable price as we know that applicants desire to save money. To gain all these benefits you need to enroll in the HCSA-Presales-IP Network V4.0 Certification EXAM and put all your efforts to pass the challenging HCSA-Presales-IP Network V4.0 (H19-301_V4.0) exam easily. In addition, you can test specs of the HCSA-Presales-IP Network V4.0 practice material before buying by trying a free demo. These incredible features make Pass4Leader prep material the best option to succeed in the Huawei H19-301_V4.0 examination. Therefore, don't wait. Order Now !!!

Most Recent H19-301_V4.0 Latest Study Materials - All in Pass4Leader

The client can try out and download our H19-301_V4.0 training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of

our H19-301_V4.0 learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our study materials.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q51-Q56):

NEW QUESTION # 51

Huawei's Wi-Fi Shield technology allows unauthorized terminals to correctly parse data.

- A. True
- B. False

Answer: B

Explanation:

Huawei's Wi-Fi Shield technology is designed to enhance WLAN security and includes features such as:

Unauthorized terminal detection and suppression

Data encryption and integrity protection

Air interface behavior analysis to block rogue APs or attackers

Contrary to the statement, Wi-Fi Shield prevents unauthorized terminals from accessing or parsing any data, making the correct answer False.

NEW QUESTION # 52

Which of the following controllers supports unified LAN/WAN management?

- A. iMaster NCE-Campus
- B. iMaster NCE-IP
- C. iMaster NCE-WAN
- D. iMaster NCE-Fabric

Answer: B

Explanation:

According to Huawei's documentation on the iMaster NCE series, the iMaster NCE-IP is the only controller that supports unified LAN and WAN management, providing centralized control, O&M, and intelligent policy enforcement across both LAN and WAN domains.

iMaster NCE-Fabric: Focuses on data center networks.

iMaster NCE-Campus: Primarily for campus LAN management.

iMaster NCE-WAN: Focuses only on WAN orchestration.

iMaster NCE-IP: Integrates LAN and WAN management to offer end-to-end control.

NEW QUESTION # 53

Huawei's aggregation router NetEngine 8000 M14 supports control-forwarding separation and hardware redundancy.

- A. True
- B. False

Answer: A

Explanation:

The Huawei NetEngine 8000 M14 is a high-performance aggregation router that features:

Control-forwarding separation: Enhances flexibility and reduces performance bottlenecks.

Hardware redundancy: Supports redundant power supplies, fans, and control boards to ensure carrier-grade reliability (99.999%).

These capabilities make it ideal for core and aggregation-layer deployments in large enterprise and carrier networks.

NEW QUESTION # 54

Which of the following are involved in APT attack detection by the FireHunter? (Select all that Apply)

- A. The attacker extracts the collected data assets.
- B. A remote control tool is automatically downloaded and executed, and the user PC is then controlled.
- C. The attacker collects information and locates targets.
- D. The user opens the phishing email and executes the attachment. The user's PC is infected.
- E. The attacker sends targeted phishing emails to internal users.

Answer: A,B,C,D,E

Explanation:

Huawei's FireHunter is an advanced threat detection and response system designed to identify and mitigate APT (Advanced Persistent Threat) attacks. It uses sandboxing, behavioral analysis, and threat intelligence correlation to detect all stages of an APT attack, including:

A: Reconnaissance: The attacker collects info and identifies targets.

B: Data exfiltration: Collected data is extracted from internal systems.

C: Initial compromise: Through phishing emails.

D: Infiltration: User opens malicious attachment, leading to infection.

E: Remote control: Malware downloads a remote control tool (RAT), giving the attacker control.

FireHunter detects these activities based on behavior patterns, traffic anomalies, and sandbox execution results.

NEW QUESTION # 55

Which of the following are the main Internet access modes provided by the Huawei SD-WAN Solution? (Select all that Apply)

- A. Local Internet access
- B. Hybrid Internet access
- C. Centralized Internet access
- D. Remote Internet access

Answer: A,B,C

Explanation:

Huawei SD-WAN provides flexible Internet access options based on enterprise architecture and policies:

A: Centralized Internet access: Internet traffic from branches is sent to HQ or data center before being forwarded to the Internet C:

Local Internet access: Internet traffic is directly forwarded at the branch (also called DIA - Direct Internet Access) D: Hybrid

Internet access: Combines centralized and local Internet access based on application type or policy B: Remote Internet access is not a standard Huawei-defined mode in this context.
