H19-315-ENU Latest Dumps Questions, Questions H19-315-ENU Exam

Provided you get the certificate this time with our H19-315-ENU practice materials, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so H19-315-ENU practice

materials may bring underlying influences with positive effects. The promotion or acceptance will be easy. So it is quite rewarding investment.

Huawei H19-315 exam is a certification test for professionals who are looking to specialize in transmission and access in the IT industry. HCSA-Presales-Transmission & Access certification is offered by Huawei, a leading global provider of information and communications technology (ICT) infrastructure and smart devices. The H19-315 exam is specifically designed to test the candidate's knowledge and skills in the field of transmission and access, including the technologies, solutions, and products offered by Huawei.

Huawei H19-315-ENU (HCSA-Presales-Transmission & Access) Certification Exam is designed to test the knowledge and skills of individuals in the field of transmission and access technologies. HCSA-Presales-Transmission & Access certification exam is ideal for professionals who wish to demonstrate their proficiency in the areas of pre-sales, design, and solution architecture related to Huawei's transmission and access products. H19-315-ENU Exam covers a wide range of topics, including the basics of transmission and access technologies, network planning and design, product features and functions, and pre-sales support.

Huawei HCSA-Presales-Transmission & Access Sample Questions (Q79-Q84):

NEW QUESTION # 79

What are the challenges of e-government networks in the cloud era? (Multiple choice)

- A. The business can be quickly opened and adjusted
- B. Unified bearing of all government services
- C. Network isolation and security
- D. Growing Bandwidth Requirements

Answer: A,B,C,D

NEW QUESTION # 80

Which of the following are the values that Campus OptiX (POL) brings to customers?

- A. Easy to evolve
- B. Smart O&M
- C. Simple architecture
- D. High reliability

Answer: A,B,C,D

Explanation:

Campus OptiX (POL) delivers significant value to customers through the following key benefits:

* Simple Architecture: POL simplifies network design by using a single fiber infrastructure to deliver multiple services (voice, data, video), reducing complexity and cost.

* Smart O&M: With centralized management tools like eSight, POL enables efficient monitoring, troubleshooting, and automation of network operations.

* Easy to Evolve: POL supports future-proof technologies like XG-PON and NG-PON2, allowing seamless upgrades to higher bandwidths.

* High Reliability: The passive nature of POL (no active components in the ODN) ensures high reliability and low maintenance requirements.

These advantages make POL an attractive solution for enterprise campuses and other large-scale deployments.

NEW QUESTION # 81

Which descriptions are correct about the current mainstream solutions in the railway industry? (Multiple choice)

- A. Rail Line as Enhanced MSTP Solution
- B. MS-OTN will be the future technological evolution direction of railway lines
- C. OTN technology to build backbone network

- D. GPON solution helps team informatization

Answer: A,B,C,D

NEW QUESTION # 82

Which of the following are the components for the FTTH network?

- A. NMS
- B. Splitter
- C. OLT
- D. ONU/ONT
- E. ODF

Answer: A,B,C,D,E

Explanation:

The FTTH (Fiber-to-the-Home) network consists of several key components that work together to deliver high-speed connectivity to end-users:

- * ONU/ONT (Optical Network Unit/Terminal): Customer-side device that converts optical signals into electrical signals for end-user devices.
- * OLT (Optical Line Terminal): Central device located at the service provider's premises, managing communication with multiple ONUs.
- * Splitter: Passive optical device that divides the signal from the OLT into multiple paths for distribution to ONUs.
- * NMS (Network Management System): Software platform (e.g., eSight) for centralized monitoring and management of the FTTH network.
- * ODF (Optical Distribution Frame): Infrastructure component used for organizing and connecting optical fibers.

Each of these components plays a critical role in ensuring efficient and reliable FTTH deployments.

NEW QUESTION # 83

EG8040F4 is an ONT product with 4 Gigabit Ethernet interfaces.

- A. False
- B. True

Answer: B

Explanation:

The EG8040F4 is a Huawei Optical Network Terminal (ONT) designed for Fiber-to-the-Home (FTTH) deployments. It features four Gigabit Ethernet interfaces, making it suitable for high-speed internet access in residential and small office environments. These interfaces allow users to connect multiple devices, such as computers, smart TVs, and gaming consoles, to the network simultaneously.

In addition to Gigabit Ethernet ports, the EG8040F4 may also include other features like Wi-Fi support, VoIP ports, and USB connectivity, depending on the specific model.
