Purchase DumpsMaterials best 101-500 study material today and get these stunning offers.

Lpi 101-500 (LPIC-1 Exam 101, Part 1 of 2, version 5.0) Certification Exam is an entry-level exam that validates the fundamental skills and knowledge required to become a Linux professional. 101-500 exam is the first of two exams required to earn the LPIC-1 certification. The LPIC-1 certification is vendor-neutral, which means that it does not focus on a specific distribution of Linux, but rather on the general principles that underlie all Linux distributions.

Installation & Package Management for Linux

This area will address fundamental knowledge areas including the ones highlighted below:

- Deal with Linux as a virtualization guest.
- Control shared libraries by identifying them.
- Choose and configure a boot manager, e.g. GRUB Legacy, and deal with the boot loader, & changes for GRUB 2.
- Take advantage of RPM and YUM management for packages and check the files that a package provides.
- Design a layout of a hard disk, where you will need to be aware of the features of LVM and disks.

It is human nature to pursue wealth and success. No one wants to be a common person. In order to become a successful person, you must sharpen your horizons and deepen your thoughts. Our 101-500 practice guide can help you update yourself in the shortest time. And according to the data of our loyal customers, we can claim that if you study with our 101-500 Exam Questions for 20 to 30 hours, then you can pass the exam with ease. And the price of our 101-500 study materials is quite favourable.

Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q187-Q192):

NEW QUESTION # 187

What is true about the file .profile in a user's home directory?

- A. It must be executable
- **B. It must use a valid shell script syntax**
- C. It must start with a shebang
- D. It must be readable for its owner only
- E. It must call the binary of the login shell

Answer: B

NEW QUESTION # 188

To change the priority of a running process, you use the _____ command (Specify command only with no options.)

Answer:

Explanation:

renice

/usr/bin/renice

NEW QUESTION # 189

You are about to install a new program on an RPM based Linux system. Which of the following would be the best way to accomplish this?

- A. Use cpi to extract the binaries from a source RPM and use rpm to install those sources.
- **B. Use rpm to install the program's binaries from an RPM package.**
- C. Get a source RPM and use rpm to install it.
- D. Get the source code in a tarball and install from that source.

Answer: B

NEW QUESTION # 190

Which file should be edited to select the network locations from which Debian installation package files are loaded?

- **A. /etc/apt/sources.list**
- B. /etc/apt/apt.conf.d
- C. /etc/dpkg/dpkg.cfg
- D. /etc/apt/apt.conf
- E. /etc/dpkg/dselect.cfg

Answer: A

Explanation:

Explanation

The /etc/apt/sources.list file is the main configuration file for the Advanced Package Tool (apt), which is used to manage Debian installation package files. This file contains a list of repositories, or sources, from which apt can download and install packages. Each repository is specified by a line that has the following format:

type uri suite [component1] [component2] [...]

Where:

* type is the access method, such as http, ftp, file, etc.

* uri

is the Uniform Resource Identifier (URI) of the repository, such as http://deb.debian.org/debian

* suite is the distribution code name or archive name, such as stable, testing, unstable, etc.

* component is an optional section of the repository, such as main, contrib, non-free, etc.

For example, a typical sources.list file for Debian stable could look like this:

deb

http://deb.debian.org/debian stable main contrib non-free deb-src http://deb.debian.org/debian stable main contrib non-free deb

http://deb.debian.org/debian-security/ stable/updates main contrib non-free deb-src

http://deb.debian.org/debian-security/ stable/updates main contrib non-free deb

http://deb.debian.org/debian stable-updates main contrib non-free deb-src http://deb.debian.org/debian stable-updates main contrib non-free

The first two lines specify the main repository for Debian stable, with both binary (deb) and source (deb-src) packages.

The next two lines specify the security updates repository for Debian stable, which contains important security fixes. The last two lines specify the stable-updates repository, which contains packages that have been updated after the release of Debian stable. By editing the `/etc/apt/sources.list` file, one can select the network locations from which Debian installation package files are loaded. However, it is recommended to use a graphical or command-line tool, such as `aptitude` or `synaptic`, to manage the `sources.list` file, as they can handle the syntax and avoid errors.

References:

- * 1, 102.4 Lesson 1
- * 2, 102.4 Use Debian package management
- * `man sources.list`

NEW QUESTION # 191

You are compiling some software from source. After running `./configure` with the appropriate arguments and no errors, what is the next command to run?

Answer:

Explanation:

`make`

Explanation:

The purpose of the `make` utility is to determine automatically which pieces of a large program need to be recompiled, and issue the commands to recompile them. example C programs, since they are most common, but you can use `make` with any programming language whose compiler can be run with a shell command. In fact, `make` is not limited to programs. You can use it to describe any task where some files must be updated automatically from others whenever the others change.

To prepare to use `make`, you must write a file called the `makefile` that describes the relationships among files in your program, and the states the commands for updating each file. In a program, typically the executable file is updated from object files, which are in turn made by compiling source files.

NEW QUESTION # 192

.....

As we all know, 101-500 certificates are an essential part of one's resume, which can make your resume more prominent than others, making it easier for you to get the job you want. For example, the social acceptance of 101-500 Certification now is higher and higher. If you also want to get this certificate to increase your job opportunities, please take a few minutes to see our 101-500 training materials.
