Free PDF PECB - Pass-Sure NIS-2-Directive-Lead-Implementer - Download PECB Certified NIS 2 Directive Lead Implementer Fee

It is very necessary for a lot of people to attach high importance to the NIS-2-Directive-Lead-Implementer exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable NIS-2-Directive-Lead-Implementer Study Materials can help people pass the exam in a relaxed state.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q32-Q37):

NEW QUESTION # 32

According to Article 7 of the NIS 2 Directive, what is one of the aspects that the national cybersecurity strategy adopted by Member States must include?

- A. Policies on foreign trade agreements
- B. Plans for infrastructure development
- C. A list of authorities and stakeholders

Answer: C

NEW QUESTION # 33

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

SafePost's risk management team has developed and approved several cybersecurity risk management measures intended to help the company in minimizing potential risks, protecting customer data, and ensuring business continuity. Is this in compliance with Article 20 of the NIS 2 Directive?

Refer to scenario 3.

- A. Yes, the risk management team is responsible for developing and approving cybersecurity risk management measures
- B. No, the IT Department is solely responsible for developing and approving cybersecurity risk management measures
- C. No, the company's management body is responsible for approving cybersecurity risk management measures

Answer: C

NEW QUESTION # 34

Scenario 5: Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to

guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability. Based on scenario 5, the CISO reports directly to the CEO of Astral Nexus Power. Is this in alignment with best practices?

- A. Yes, it is advisable for the CISO to report directly to the top management to facilitate the process of decision-making with respect to cybersecurity
- B. No, the current organizational structure impedes inter-departmental collaboration which would enable balanced distribution of tasks
- C. No, this type of structure does not allow the CISO to properly exercise the mandate with regards to cybersecurity

Answer: A

NEW QUESTION # 35

What is the key difference between Tier 2 and Tier 3 disaster recovery strategies?

- A. Tier 2 mandates dual sites with peer-to-peer connections, whereas Tier 3 focuses on data transfer enhancement
- B. Tier 2 involves electronic vaulting of critical data, while Tier 3 relies on offsite vaults
- C. Tier 2 uses couriers to transport data between centers, while Tier 3 uses electronic vaulting of critical data

Answer: C

NEW QUESTION # 36

What is the primary focus of cryptanalysis?

- A. To develop encryption keys
- B. To analyze and breach secure communication
- C. To safeguard data

Answer: B

NEW QUESTION # 37
