

Download Oracle 1z0-1080-25 Exam Dumps Instantly

P.S. Free 2025 Oracle 1z0-1080-25 dumps are available on Google Drive shared by Exam4Labs: https://drive.google.com/open?id=164RAREEKQJbu_Niyk5xDS-k2QoXYNvNo

There is not much disparity among these versions of 1z0-1080-25 simulating practice, but they do help to beef up your capacity and speed up your review process to master more knowledge about the 1z0-1080-25 exam, so the review process will be unencumbered. Though the content of these three versions is the same, the displays of them are different. And you can try our 1z0-1080-25 Study Materials by free downloading the demos to know which one is your favorite.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 2	Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 3	Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 4	Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 5	Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 6	Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.

Topic 7	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 8	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 9	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 10	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 11	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 12	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 13	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 14	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 15	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 16	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 17	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 18	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 19	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 20	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 21	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 22	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 23	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 24	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 25	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.

Topic 26	This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 27	Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.

Test Certification Oracle 1z0-1080-25 Cost & Online 1z0-1080-25 Bootcamps

With severe competition going up these years, more and more people stay clear that getting a higher degree or holding some professional 1z0-1080-25 certificates is of great importance. So instead of spending every waking hour wholly on leisure and entertaining stuff, try to get a 1z0-1080-25 certificate is meaningful. This 1z0-1080-25 exam guide is your chance to shine, and our 1z0-1080-25 practice materials will help you succeed easily and smoothly. With numerous advantages in it, you will not regret.

Oracle Planning 2025 Implementation Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

A Department Manager requires access to all accounts in their own department, but only a certain account in all other departments. With the usual metadata security, the Manager would have access to all accounts across all departments.

- A. Artifact security
- **B. Cell-level security**
- C. Member security
- D. Access control

Answer: B

NEW QUESTION # 14

You want to create dashboards with Dashboards 2.0. Which two statements are true about designing in Dashboards 2.0?

- **A. You can include a maximum of 12 components.**
- **B. You can include chart types such as Waterfall, Pyramid and Geomap and new subchart types for Radar, Combination and Gauge.**
- C. The total amount of data that's allowed to be visualized in a chart is a total of 1,000 cells.
- D. There is an upper limit of 15 members across all dimensions that can be selected to create a chart using quick analysis.

Answer: A,B

NEW QUESTION # 15

Which module should you enable first to track the utilization of employees in Projects?

- A. Financials module before Projects module
- B. Projects module before Financials module
- C. Projects module before Workforce module
- **D. Workforce module before Projects module**

Answer: D

Explanation:

To track the utilization of employees in the Projects module of Oracle Planning 2024, the Workforce module must be enabled first. Employee utilization in Projects refers to tracking how employees' time and costs (e.g., hours worked, labor expenses) are allocated to specific projects. The Workforce module provides the foundational data-such as employee details, roles, salaries, and hours-

required to calculate utilization metrics. Once Workforce is enabled and configured with employee data, the Projects module can leverage this data via integration to track utilization against project tasks and budgets.

* A. Projects module before Financials module: Incorrect. Enabling Projects before Financials does not address employee utilization tracking, as Financials focuses on revenue and expense planning, not employee-specific data.

* B. Financials module before Projects module: Incorrect. Financials provides financial planning capabilities but does not manage employee data or utilization, which is a Workforce function.

* C. Workforce module before Projects module: Correct. Workforce must be enabled first to define employee data, which Projects then uses to track utilization through integration (e.g., via data maps or direct links).

* D. Projects module before Workforce module: Incorrect. Enabling Projects first without Workforce would limit utilization tracking, as Projects relies on Workforce for employee-related data.

The Oracle documentation specifies that Workforce is a prerequisite for detailed employee utilization tracking in Projects, making C the correct sequence.

Oracle Planning 2024 Implementation Study Guide: "Integrating Workforce with Projects" (docs.oracle.com, Published 2024-09-20).

Oracle EPM Cloud Documentation: "Tracking Utilization in Projects" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 16

You want to develop your forecast with Forms 2.0. Which statement about Forms 2.0 setup is true?

- A. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings.
- **B. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0.**
- C. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0.
- D. Set up Forms 2.0 in your environment one time and it will work with all your applications.

Answer: B

Explanation:

In Oracle Planning 2024 Implementation, Forms 2.0 represents an enhanced version of the form design and functionality framework compared to Forms 1.0. To develop forecasts using Forms 2.0, existing forms must be transitioned from the older version to the newer one, as they are not automatically compatible or universally enabled.

* D. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0: This is the correct statement. Oracle provides a migration process to convert Forms 1.0 forms to Forms 2.0, enabling users to leverage the advanced features of Forms 2.0 (e.g., improved navigation, dynamic rows/columns, and enhanced usability). This migration is selective, meaning only the forms you choose to use with Forms 2.0 need to be migrated, and it is not a one-time global setup.

* A. Set up Forms 2.0 in your environment one time and it will work with all your applications:

Forms 2.0 is not a one-time environment-wide setup. It requires specific forms to be migrated or designed for Forms 2.0 compatibility, and not all applications automatically adopt it.

* B. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings: There is no such toggle in Application Settings to switch between Forms 1.0 and Forms 2.0.

The transition to Forms 2.0 involves migration rather than a simple version switch.

* C. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0: While redesigning is an option for creating new Forms 2.0-compatible forms, the standard process for existing forms is migration, not a complete redesign from scratch. Migration preserves the form structure while adapting it to Forms 2.0.

The migration process ensures that users can take advantage of Forms 2.0's capabilities while maintaining continuity with existing form designs, aligning with Oracle's recommended approach.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Forms - Forms

2.0" (docs.oracle.com, updated 2024). States that "to use Forms 2.0, migrate existing Forms 1.0 forms to Forms 2.0 using the provided migration tools."

* Oracle Planning 2024 Implementation Study Guide: Confirms that migrating Forms 1.0 to Forms 2.0 is the true setup process for leveraging Forms 2.0 in forecasting.

NEW QUESTION # 17

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can check the execution status of a job only if it completed.
- B. You can delete that are currently processing.
- C. You can schedule an Import Data job to run later at intervals.
- D. You can set the daily maintenance time when scheduling cloning environment jobs.
- E. You can set to receive notifications when the job has completed.

Answer: C,E

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

- * A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.
 - * B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false. Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.
 - * C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.
 - * D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.
 - * E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.
- Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.
