Test Outline

In the CISSP-ISSEP Exam, you can expect questions that cover the following five CISSP-ISSEP CBK domains:

- **Systems Implementation, Verification, and Validation (14%)**

This domain details how to implement and integrate system security solutions, along with verifying and validating them.

- **Systems Security Engineering Foundations (25%)**

Under such a topic, you will learn to apply and execute concepts of systems security engineering for security processes and design, integrating with relevant system development methods, technical management, performing acquisition processes, and designing Trusted Systems and Networks (TSN).

- **Risk Management (14%)**

Here, you need to be proficient with applying security risk management principles, including Enterprise Risk Management (ERM), identifying system security risks, carrying out risk analysis and evaluation, documenting risk decisions, and suggesting risk treatment options.

- **Secure Operations, Change Management, and Disposal (17%)**

This part tests your abilities with developing secure operations strategy, change management, and the disposal process.

- **Security Planning and Design (30%)**

This domain covers skills such as understanding stakeholder requirements, identifying and addressing document threats, developing system requirements, and producing system security architecture and design.

Apart from preparing for exam-related domains, candidates are advised to pay attention to areas of study that need additional focus. They can supplement these areas by referring to the relevant references provided on the official (ISC)² site.
