PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for Certified Technology Specialist (CTS) exam from them. Applicants can also make notes of printed CTS Exam Material so they can use it anywhere in order to pass Certified Technology Specialist (CTS) with a good score.

AVIXA Certified Technology Specialist Sample Questions (Q24-Q29):

NEW QUESTION # 24

When a presenter is using a headworn wireless microphone, the sound technician notices a great deal of plosives and breath noise. To correct this problem, the technician should:

- A. Adjust the microphone wireless transmitter gain
- B. Adjust the position of the microphone and use a windscreen
- C. Ask the speaker to talk more quietly
- D. Change from an omnidirectional to a cardioid capsule

Answer: B

Explanation:

Plosives and breath noise occur when air hits the mic capsule directly. This can be mitigated by adjusting the mic's position slightly off-center from the mouth and adding a windscreen to diffuse breath impact.

"Correct mic placement and windscreen use significantly reduce plosives and breath noise, especially with headworn microphones."

- CTS Exam Guide, Microphone Placement and Audio Optimization

NEW QUESTION # 25

According to AVIXA's AV Performance Verification standard, at what point should the loudspeaker transformer tap setting be verified?

- A. Systems integration
- B. Closeout
- C. Pre-integration
- D. Post-integration

Answer: A

Explanation:

The systems integration phase is when devices are installed and configured together. Verifying loudspeaker transformer taps during this phase ensures that each speaker receives the correct power level, which is critical for achieving uniform audio coverage and system performance.

"Loudspeaker transformer taps should be verified during the systems integration phase to ensure proper audio balance and coverage before final verification."

- AVIXA Standard - AV System Performance Verification (ANSI/INFOCOMM 10:2013)

NEW QUESTION # 26

In order to run three cables inside a conduit, what is the maximum percentage of a conduit's internal cross-sectional area to be considered?

- A. 60%
- B. 53%
- C. 31%
- D. 40%

Answer: D

Explanation:

When running three cables inside a conduit, the maximum allowable fill is 40% of the conduit's internal cross-sectional area. This percentage is specified to ensure that there is adequate space for pulling the cables through without causing damage and to allow for proper airflow to prevent overheating.

CTS Technology Specialist Reference According to the CTS guidelines and National Electrical Code (NEC), conduits should not exceed 40% fill for three or more cables to ensure safety and maintain the integrity of the cables during installation and use.

NEW QUESTION # 27

When planning video content with a client, it is important to get their Pantone data (PMS) to ensure

- A. their confidence monitor size is large enough.
- B. the displayed type face is the correct size and style.
- **C. the displayed colors match printed colors.**
- D. the displayed logo is the proper size and style.

Answer: C

Explanation:

Pantone data (PMS) is used to ensure color consistency between digital displays and printed materials. This is critical in branding to maintain accurate color representation across different mediums, particularly for logos and brand colors.

CTS Technology Specialist Reference

CTS guidelines on content creation emphasize color matching as a key consideration for client branding, often involving Pantone color standards to achieve consistency.

NEW QUESTION # 28

Which of these cables should be used for a balanced microphone signal?

- A. C
- B. D
- **C. A**
- D. B

Answer: C

Explanation:

Cable A is a shielded twisted pair (STP) cable, which is suitable for carrying balanced microphone signals.

Balanced audio cables have three conductors: two for the signal (positive and negative) and one for the ground. The twisted pair helps to cancel out electromagnetic interference, providing a cleaner signal with less noise. The shielding further protects against external interference, making it ideal for professional audio applications.

NEW QUESTION # 29

One thing has to admit, more and more certifications you own, it may bring you more opportunities to obtain better job, earn more salary. This is the reason that we need to recognize the importance of getting the test CTS certifications. More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition. Therefore, the CTS Guide Torrent can help users pass the qualifying examinations that they are required to participate in faster and more efficiently.
