

# DP-420 Learning Mode & DP-420 Valid Exam Pass4sure

2025 Latest ExamsTorrent DP-420 PDF Dumps and DP-420 Exam Engine Free Share: <https://drive.google.com/open?id=1BqD1Ix4EeliwGmqgBtvgcHAAtKI5XtvX>

If you are still study hard to prepare the Microsoft DP-420 Exam, you're wrong. Of course, with studying hard, you can pass the exam. But may not be able to achieve the desired effect. Now this is the age of the Internet, there are a lot of shortcut to success. ExamsTorrent's Microsoft DP-420 exam training materials is a good training materials. It is targeted, and guarantee that you can pass the exam. This training matrial is not only have reasonable price, and will save you a lot of time. You can use the rest of your time to do more things. So that you can achieve a multiplier effect.

DP-420 Practice Material is from our company which made these DP-420 practice materials with accountability. And DP-420 Training Materials are efficient products. What is more, DP-420 Exam Prep is appropriate and respectable practice material. We know making progress and getting the certificate of DP-420 Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. Our DP-420 exam prep has taken up a large part of market.

## DP-420 Valid Exam Pass4sure, DP-420 Valid Exam Notes

All Of Microsoft staff knows it is very difficult to get Microsoft certificate. But taking Microsoft certification exam and getting the certificate are a way to upgrade your ability and prove self-worth, so you have to choose to get the certificate. Isn't there an easy way to help all candidates pass their exam successfully? Of course there is. DP-420 Exam Dumps are the best way. ExamsTorrent has everything you need and can absolutely satisfy your demands. You can visit ExamsTorrent.com to know more details and find the exam materials you want to.

## Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q11-Q16):

### NEW QUESTION # 11

You have a container that stores data about families. The following is a sample document.

```

{
  "lastName": "Cartwright",
  "parents": [
    {
      "firstName": "Elvira",
      "role": "mother",
      "age": 64
    },
    {
      "firstName": "Randolph",
      "role": "father",
      "age": 67
    }
  ],
  "children": [
    {
      "grade": 5,
      "name": "Pat",
      "age": 13,
      "gender": "male"
    }
  ]
}

```

For each of the following statements, select Yes if the statement is true. otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Children who do not have parents defined will appear on the list.	<input type="radio"/>	<input type="radio"/>
Children who have more than one pet will appear on the list multiple times.	<input type="radio"/>	<input type="radio"/>
Children who do not have pets defined will appear on the list.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Statements	Yes	No
Children who do not have parents defined will appear on the list.	<input type="radio"/>	<input checked="" type="radio"/>
Children who have more than one pet will appear on the list multiple times.	<input checked="" type="radio"/>	<input type="radio"/>
Children who do not have pets defined will appear on the list.	<input type="radio"/>	<input checked="" type="radio"/>

**Explanation:**

Children who do not have parents defined will appear on the list = NO

Children who do not have parents defined will not appear on the list. This is because the document schema defines the children property as an array of objects that contain the firstName and gender properties of each child, as well as a parents property that references the id values of the parents. If a child does not have parents defined, it means that the parents property is either missing or empty for that child. Therefore, such a child will not be included in the list of children who have parents defined.

Children who have more than one pet will appear on the list multiple times. = Yes Children who have more than one pet will appear on the list multiple times. This is because the document schema defines the pets property as an array of objects that contain the givenName and type properties of each pet, as well as a children property that references the id values of the children who own the pet. If a child has more than one pet, it means that the child's id value will appear in the children property of multiple pet objects. Therefore, such a child will be included in the list of children who have pets multiple times.

Children who do not have pets defined will appear on the list = No

Children who do not have pets defined will not appear on the list. This is because the document schema defines the pets property as an array of objects that contain the givenName and type properties of each pet, as well as a children property that references the id values of the children who own the pet. If a child does not have pets defined, it means that the child's id value does not appear in the children property of any pet object.

Therefore, such a child will not be included in the list of children who have pets defined.

#### NEW QUESTION # 12

You have an Apache Spark pool in Azure Synapse Analytics that runs the following Python code in a notebook.

```
dfStream = spark.readStream\
    .format("cosmos.oltp.changeFeed")\
    .option("spark.synapse.linkedService", "contoso-app")\
    .option("spark.cosmos.container", "orders")\
    .option("spark.cosmos.preferredRegions", "westus,eastus")\
    .option("spark.cosmos.changeFeed.startFrom", "Beginning")\
    .option("spark.cosmos.changeFeed.mode", "Incremental")\
    .load()

streamQuery = dfStream\
    .writeStream\
    .format("cosmos.oltp")\
    .option("spark.synapse.linkedService", "contoso-erp")\
    .option("spark.cosmos.container", "orders")\
    .option("checkpointLocation", "/tmp/ordersync/")\
    .outputMode("append")\
    .start()

streamQuery.awaitTermination()
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Statements	Yes	No
	New and updated orders will be added to contoso-erp.orders.	<input type="radio"/>	<input type="radio"/>
	The code performs bulk data ingestion from contoso-app.	<input type="radio"/>	<input type="radio"/>
	Both contoso-app and contoso-erp have Analytical store enabled.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area	Statements	Yes	No
	New and updated orders will be added to contoso-erp.orders.	<input checked="" type="radio"/>	<input type="radio"/>
	The code performs bulk data ingestion from contoso-app.	<input type="radio"/>	<input checked="" type="radio"/>
	Both contoso-app and contoso-erp have Analytics store enabled.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

New and updated orders will be added to contoso-erp.orders: Yes

The code performs bulk data ingestion from contoso-app: No

Both contoso-app and contoso-erp have Analytics store enabled: Yes

The code uses the spark.readStream method to read data from a container named orders in a database named contoso-app. The data is then filtered by a condition and written to another container named orders in a database named contoso-erp using the spark.writeStream method. The write mode is set to "append", which means that new and updated orders will be added to the

destination container1.

The code does not perform bulk data ingestion from contoso-app, but rather stream processing. Bulk data ingestion is a process of loading large amounts of data into a data store in batches. Stream processing is a process of continuously processing data as it arrives in real-time2.

Both contoso-app and contoso-erp have Analytics store enabled, because they are both accessed by Spark pools using the spark.cosmos.oltp method. This method requires that the containers have Analytics store enabled, which is a feature that allows Spark pools to query data stored in Azure Cosmos DB containers using SQL APIs3.

### NEW QUESTION # 13

You have an Azure Cosmos DB for NoSQL account that contains a container named container1.

You plan to use container1 as a key-value store that will perform point reads on the item ID and partition key.

You need to define an indexing policy for container1. The solution must meet the following requirements:

- \* Provide the ability to set DefaultTimeToLive for container1.
- \* Minimize implementation time.
- \* Minimize costs.

How should you complete the JSON definition of the indexing policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

```
{
  "indexingMode": "none",
  "automatic": false,
  "includedPaths": [],
  "excludedPaths": [{"path": "/*"}]
}
```

**Answer:**

**Explanation:**

**Answer Area**

```
{
  "indexingMode": "none",
  "automatic": false,
  "includedPaths": [],
  "excludedPaths": [{"path": "/*"}]
}
```

**Explanation:**

## Answer Area

```
{  
  "indexingMode": "none",  
  "automatic": false,  
  "includedPaths": [],  
  "excludedPaths": [{"path": "/"}]  
}
```

### NEW QUESTION # 14

You have a database in an Azure Cosmos DB SQL API Core (SQL) account that is used for development.

The database is modified once per day in a batch process.

You need to ensure that you can restore the database if the last batch process fails. The solution must minimize costs.

How should you configure the backup settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Backup interval

	▼
1 hour	
24 hours	
1 weeks	

Backup retention

	▼
2 days	
1 week	
30 days	

Answer:

Explanation:

Backup interval	<table border="1"><tr><td></td><td>▼</td></tr><tr><td colspan="2">1 hour</td></tr><tr><td colspan="2">24 hours</td></tr><tr><td colspan="2">1 weeks</td></tr></table>		▼	1 hour		24 hours		1 weeks	
	▼								
1 hour									
24 hours									
1 weeks									
Backup retention	<table border="1"><tr><td></td><td>▼</td></tr><tr><td colspan="2">2 days</td></tr><tr><td colspan="2">1 week</td></tr><tr><td colspan="2">30 days</td></tr></table>		▼	2 days		1 week		30 days	
	▼								
2 days									
1 week									
30 days									

Explanation:

Backup interval

1 hour  
24 hours  
1 weeks

Backup retention

2 days  
1 week  
30 days

### NEW QUESTION # 15

You plan to create an Azure Cosmos DB database named db1 that will contain two containers. One of the containers will contain blog posts, and the other will contain users. Each item in the blog post container will include:

- \* A single blog post
- \* All the comments associated to the blog post
- \* The names of the users who created the blog post and added the comments.

You need to design a solution to update usernames in the user container without causing data integrity issues.

The solution must minimize administrative and development effort. What should you include in the solution?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

In the user container, implement:

A stored procedure  
The change feed processor  
A post-trigger  
A stored procedure  
A user-defined function

In the blog post container, implement:

The change feed processor  
The change feed processor  
A post-trigger  
A stored procedure  
A user-defined function

Answer:

Explanation:

Answer Area

Microsoft

In the user container, implement:

A stored procedure  
The change feed processor  
A post-trigger  
A stored procedure  
A user-defined function

In the blog post container, implement:

The change feed processor  
The change feed processor  
A post-trigger  
A stored procedure  
A user-defined function

Explanation:

## NEW QUESTION # 16

.....

As you know, many exam and tests depend on the skills rather than knowledge solely. Our DP-420 exam materials are time-tested materials for your information. There are free demos of our DP-420 training guide for your reference with brief catalogue and outlines in them. For a DP-420 study engine develop to full maturity, it is rewarding and hard. And we have engaged for more than ten years and successfully make every detail of our DP-420 practice braindumps to be perfect.

**DP-420 Valid Exam Pass4sure:** <https://www.examstorrent.com/DP-420-exam-dumps-torrent.html>

Tens of thousands of our customers have benefited from our DP-420 exam dumps and passed their exams with ease, The web-based version of the DP-420 practice exam can be taken online, Microsoft DP-420 Learning Mode There are totally three kinds for your reference, and each of them has irreplaceable function, which is good for your various choices, Microsoft DP-420 Learning Mode That is to say, you can get the latest version in the following year for free.

Then it becomes a question of what and where DP-420 to eliminate, at ever more subtle levels, If it can't identify a face, it will ask you to do so, Tens of thousands of our customers have benefited from our DP-420 Exam Dumps and passed their exams with ease.

## DP-420 Learning Mode | High-quality Microsoft DP-420: Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

The web-based version of the DP-420 practice exam can be taken online, There are totally three kinds for your reference, and each of them has irreplaceable function, which is good for your various choices.

That is to say, you can get the latest version in the following year for free, Under the help of our DP-420 training materials, the pass rate among our customers has reached as high as 98% to 100%.
