

# DP-700 Study Tool, Test DP-700 King

2025 Latest RealExamFree DP-700 PDF Dumps and DP-700 Exam Engine Free Share: <https://drive.google.com/open?id=1fQ9bVmlDvltz0TtBOyxJooyFr41KsOs2>

Our DP-700 exam materials are compiled by experts and approved by the professionals who are experienced. They are revised and updated according to the pass exam papers and the popular trend in the industry. The language of our DP-700 exam torrent is simple to be understood and our DP-700 test questions are suitable for any learners. The content of our DP-700 Study Materials is easy to be mastered and has simplified the important information. Our DP-700 test questions convey the latest and valid questions and answers and thus make the learning relaxing and efficient.

It is estimated conservatively that the passing rate of the exam is over 98 percent with our DP-700 study materials as well as considerate services. We not only provide all candidates with high pass rate study materials, but also provide them with good service. The thoughtfulness of our DP-700 Study Materials services is insuperable. What we do surly contribute to the success of DP-700 practice materials.

## RealExamFree Microsoft DP-700 Exam Questions are Real and Verified by Experts

As we all know, time for preparing a exam is quite tight. Once you have signed up for the exam, you need to prepare. Therefore improving the efficiency is quite necessary. Our DP-700 training materials include the main knowledge point of the exam, which will help you to know the main knowledge. Besides the professionals check the DP-700 at time, it can ensure the accuracy of the answers. Therefore, please make it easy to use the DP-700 training materials freely.

## Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li> </ul>
---------	---

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q55-Q60):

### NEW QUESTION # 55

You have a Fabric workspace named Workspace1 that contains an Apache Spark job definition named Job1.

You have an Azure SQL database named Source1 that has public internet access disabled.

You need to ensure that Job1 can access the data in Source1.

What should you create?

- A. an on-premises data gateway
- B. a managed private endpoint**
- C. a data management gateway
- D. an integration runtime

**Answer: B**

Explanation:

To allow Job1 in Workspace1 to access an Azure SQL database (Source1) with public internet access disabled, you need to create a managed private endpoint. A managed private endpoint is a secure, private connection that enables services like Fabric (or other Azure services) to access resources such as databases, storage accounts, or other services within a virtual network (VNet) without requiring public internet access.

This approach maintains the security and integrity of your data while enabling access to the Azure SQL database.

### NEW QUESTION # 56

You have a Fabric workspace named Workspace1 that contains a warehouse named Warehouse2. A team of data analysts has Viewer role access to Workspace1. You create a table by running the following statement.

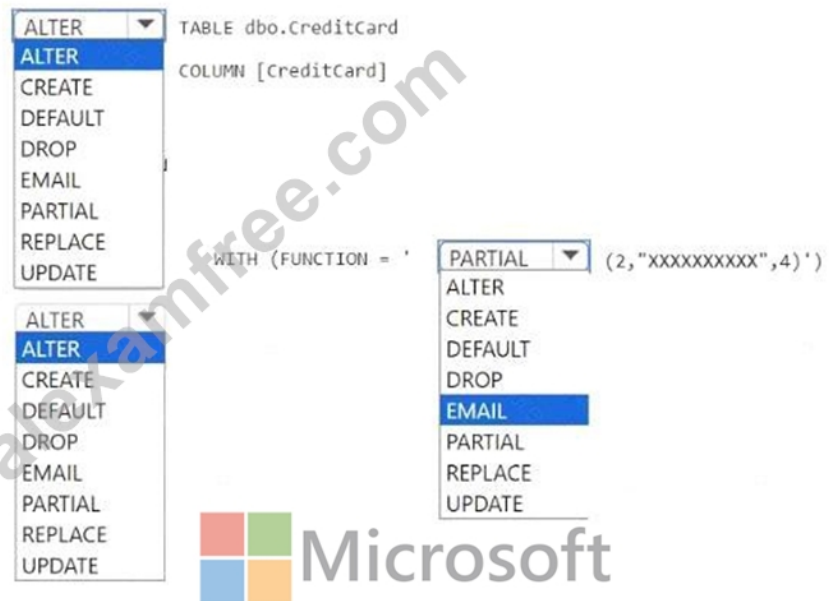

```
CREATE TABLE [warehouse2].[dbo].[CreditCard]
(
    CreditCard varchar(20) NOT NULL
    ,CreditCardType varchar(10) NOT NULL)
GO
```

You need to ensure that the team can view only the first two characters and the last four characters of the Creditcard attribute.

How should you complete the statement? To answer, select the appropriate options in the answer area.

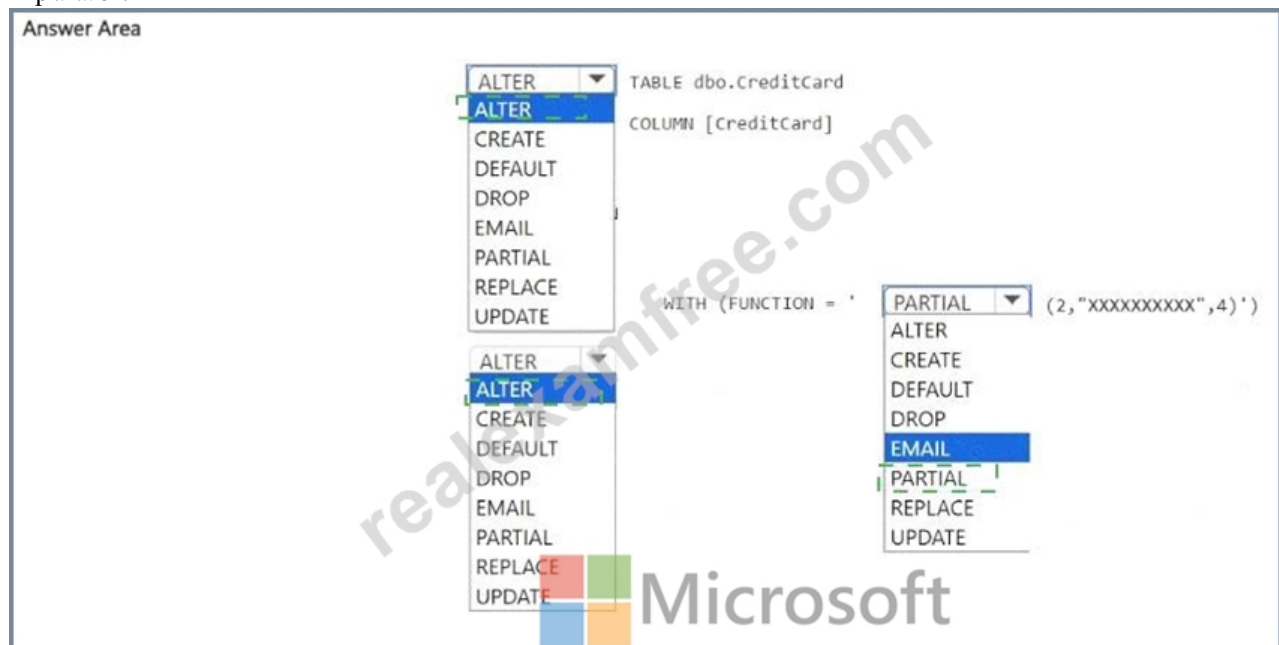

NOTE: Each correct selection is worth one point.

## Answer Area

## Answer:

## Explanation:

## Explanation:

## NEW QUESTION # 57

You have a Fabric workspace named Workspace1 that contains a warehouse named DW1 and a data pipeline named Pipeline1. You plan to add a user named User3 to Workspace1. You need to ensure that User3 can perform the following actions: View all the items in Workspace1.

Update the tables in DW1.

The solution must follow the principle of least privilege.

You already assigned the appropriate object-level permissions to DW1.

Which workspace role should you assign to User3?

- A. Viewer
- B. Member
- C. Admin
- **D. Contributor**

**Answer: D**

Explanation:

To ensure User3 can view all items in Workspace1 and update the tables in DW1, the most appropriate workspace role to assign is the Contributor role. This role allows User3 to:

View all items in Workspace1: The Contributor role provides the ability to view all objects within the workspace, such as data pipelines, warehouses, and other resources.

Update the tables in DW1: The Contributor role allows User3 to modify or update resources within the workspace, including the tables in DW1, assuming that appropriate object-level permissions are set for the warehouse.

This role adheres to the principle of least privilege, as it provides the necessary permissions without granting broader administrative rights.

### NEW QUESTION # 58

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID

Street

Neighbourhood

No\_Bikes

No\_Empty\_Docks

Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

```
bike_location
| filter Neighbourhood == "Sands End" and No_Bikes >= 15
| sort by No_Bikes asc
| project BikepointID, Street, Neighbourhood, No_Bikes, No_Empty_Docks, Timestamp
```

Does this meet the goal?

- **A. Yes**
- B. no

**Answer: A**

Explanation:

Filter Condition: It correctly filters rows where Neighbourhood is "Sands End" and No\_Bikes is greater than or equal to 15.

Sorting: The sorting is explicitly done by No\_Bikes in ascending order using sort by No\_Bikes asc.

Projection: It projects the required columns (BikepointID, Street, Neighbourhood, No\_Bikes, No\_Empty\_Docks, Timestamp), which minimizes the data returned for consumption.

### NEW QUESTION # 59

Your company has a team of developers. The team creates Python libraries of reusable code that is used to transform data.

You create a Fabric workspace name Workspace1 that will be used to develop extract, transform, and load (ETL) solutions by

using notebooks.

You need to ensure that the libraries are available by default to new notebooks in Workspace1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
<input type="checkbox"/> Change the runtime version.	<input type="text"/>
<input type="checkbox"/> Install the libraries.	<input type="text"/>
<input type="checkbox"/> Create a pool.	<input type="text"/>
<input type="checkbox"/> Create an environment.	
<input type="checkbox"/> Set the default environment.	

**Answer:**

Explanation:

Actions	Answer Area
<input type="checkbox"/> Change the runtime version.	<input type="checkbox"/> Create an environment.
<input type="checkbox"/> Install the libraries.	<input type="checkbox"/> Install the libraries.
<input type="checkbox"/> Create a pool.	<input type="checkbox"/> Set the default environment.
<input type="checkbox"/> Create an environment.	
<input type="checkbox"/> Set the default environment.	

## NEW QUESTION # 60

.....

You can also trust RealExamFree DP-700 exam practice questions and start preparation with complete peace of mind and satisfaction. The DP-700 Exam Questions are designed and verified by experienced and renowned Microsoft exam trainers. They work collectively and strive hard to ensure the top quality of DP-700 Exam Practice questions all the time.
