For candidates who will attend the exam, some practice is necessary. DP-900 exam materials are valid and high-quality. We have a professional team to search for the first-hand information for the exam. We also have strict requirements for the questions and answers of DP-900 exam materials, we ensure you that the DP-900 Training Materials are most useful tool, which can help you pass the exam just one time. In addition, we offer you free update for one year after purchasing, we also have online service stuff, if you have any questions, just contact us.

Microsoft DP-900 Exam covers a variety of topics related to data fundamentals. It includes questions on data types, data storage options, data processing options, and data management tools. Additionally, the exam includes questions on Azure services related to data such as Azure Synapse Analytics, Azure Stream Analytics, and Azure Data Factory. A successful candidate will be able to demonstrate their knowledge of these topics and their practical application in Microsoft Azure.

In order to meet the requirements of our customers, Our DP-900 test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our DP-900 exam question provide the automatic correcting system to help customers understand and correct the errors. Our DP-900 Guide Torrent will help you establish the error sets. We believe that it must be very useful for you to take your DP-900 exam, and it is necessary for you to use our DP-900 test questions.

Microsoft DP-900 (Microsoft Azure Data Fundamentals) Exam is an entry-level certification exam that is designed to test the fundamental concepts of cloud-based data solutions. DP-900 exam is ideal for anyone who is looking to start a career in data management, data analytics, or cloud computing. DP-900 exam is designed to test your knowledge of Azure data services, data storage options, data processing technologies, and data security.

The candidates for the Microsoft DP-900 test will be measured in a variety of technical skill areas. These domains are divided into several topics. It is recommended that the applicants review the exam topics in detail and choose the appropriate study materials to prepare for the test. Below are the highlights of the objectives covered in this certification exam:

- **Explain how Relational Data Works on Azure: 25-30%**

The test takers will be required to have the ability to describe some concepts in this topic, including relational data workloads and relational Azure data services. They will also need to know how to identify the basic management functions for relational data. Additionally, they need to possess a good understanding of how to use the SQL language to describe the query methods for data.

- **Explain the Concepts of Core Data: 15-20%**

Within this subject area, the students should be able to explain different categories of core data workloads that are available. To answer questions from this subtopic, the examinees should be able to explain batch data and streaming data. They should also know the attributes of relational data and core differences between streaming and batch data. It also covers their skills in core concepts of data analytics. This requires an understanding of data visualization, basic chart types, analytics techniques, data processing concepts, as well as ETL & ELT processing.

- **Explain how Non-Relational Data Works on Azure: 25-30%**

The questions from this section will evaluate the understanding of the candidates in non-relational data workloads as well as non-relational data contributions on Azure. They must be able to explain Azure File storage, Azure Cosmos DB APIs, Azure Blob Storage, and Azure Table storage. They should also be able to identify the foundational management tasks for non-relational data.

- **Explain Analytics Workloads on Azure: 25-30%**

This domain of the DP-900 Exam measures one's knowledge of analytics workloads, data processing, and ingestion on Azure, as well as the elements of modern data warehouses. The candidates will also be tested on their understanding of data visualization within Microsoft Power BI. This involves describing the specific role of dashboards, paginated reporting, interactive reports, and workflows in Power BI.

Microsoft Azure Data Fundamentals Sample Questions (Q69-Q74):

NEW QUESTION # 69

To complete the sentence, select the appropriate option in the answer area.

A visualization that illustrates a university's current student enrollment per department is an example of analytics.

 Microsoft

- cognitive
- descriptive
- predictive
- prescriptive

Answer:

Explanation:

A visualization that illustrates a university's current student enrollment per department is an example of analytics.

 Microsoft

- cognitive
- descriptive
- predictive
- prescriptive

Explanation

Text, table Description automatically generated

A visualization that illustrates a university's current student enrollment per department is an example of analytics.

 Microsoft

- cognitive
- descriptive
- predictive
- prescriptive

Generally speaking, data analytics comes in four types:

Descriptive, to answer the question: What's happening?

Diagnostic, to answer the question: Why's happening?

Predictive, to answer the question: What will happen?

Prescriptive, to answer the question: What actions should we take?

Company name Description automatically generated

NEW QUESTION # 70

Hotspot Question

To complete the sentence, select the appropriate option in the answer area.

Answer Area

	▼	presents content defined by a query
A heap		
A stored procedure		
A view		
An index		

Answer:

Explanation:

Answer Area	
	▼ presents content defined by a query.
A heap	
A stored procedure	
A view	
An index	

NEW QUESTION # 71

Your company needs to implement a relational database in Azure. The solution must minimize ongoing maintenance.

Which Azure service should you use?

- A. Azure Cosmos DB
- B. Azure HDInsight
- C. Azure SQL Database
- D. SQL Server on Azure virtual machines

Answer: C

Explanation:

Minimize maintenance: so it should a PaaS + Relational Database = Azure SQL Database

NEW QUESTION # 72

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

In an analytical model, any point where the dimensions intersect represents

Microsoft

- | | |
|--------------------------|---|
| | ▼ |
| a cube. | |
| an aggregated dimension. | |
| an aggregated measure. | |

Answer:

Explanation:

Answer Area

In an analytical model, any point where the dimensions intersect represents

Microsoft

- | | |
|--------------------------|---|
| | ▼ |
| a cube. | |
| an aggregated dimension. | |
| an aggregated measure. | |

NEW QUESTION # 73

You have data saved in the following format.

```
{
  "firstName": "John",
  "lastName": "Doe",
  "age": "23",
  "hobbies": [
    { "type": "Sports", "value": "Golf" },
    { "type": "Leisure", "value": "Reading" },
    { "type": "Leisure", "value": "Guitar" }
  ]
}
```

Which format was used?

- A. JSON
- **B. HTML**
- C. XML
- D. yaml

Answer: B
