NEW QUESTION #238

What do you use to create Power BI paginated reports?

- A. Power BI service
- B. Power BI Desktop
- C. Power BI Dashboard
- D. Power BI Report Builder

Answer: D

Explanation:

You use the Power BI Report Builder to author and publish paginated reports. You create a paginated report by creating a report definition that specifies what data to retrieve, where to get it, and how to display it. The report is generated by the report processor when you run the report.

You can preview the report in Report Builder before publishing it to the Power BI service.

You should not use the Power BI Dashboard to create paginated reports. Power BI Dashboard is a single page on which your visualizations are posted as tiles on the dashboard to display information. A dashboard allows you to show important business metrics at a glance.

You should not use Power BI service. The Power BI service is a set of analysis and display tools that lets you create visuals based on your data. This includes Power BI Desktop and Power BI Dashboard.

You should not use Power BI Desktop, which is a component of the Power BI service. Power BI Desktop is used to create interactive reports, typically for publishing in Power BI Dashboard.
