Ace Exam Preparation with DSCI DCPLA Real Questions

If you buy our DCPLA training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our DCPLA Study Materials include the PDF version,

the software version and the APP online version. We can promise that the three different versions of our DCPLA exam questions are equipped with the high quality.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q64-Q69):

NEW QUESTION # 64

FILL BLANK

IUA and PAT

The company has a very mature enterprise level access control policy to restrict access to information. There is a single sign-on platform available to access company resources such as email, intranet, servers, etc.

However, the access policy in client relationships varies depending on the client requirements. In fact, in many cases clients provide access ids to the employees of the company and manage them. Some clients also put technical controls to limit access to information such data masking tool, encryption, and anonymizing data, among others. Some clients also record the data collection process to monitor if the employee of the company does not collect more data than is required. Taking cue from the best practices implemented by the clients, the company, through the consultants, thought of realigning its access control policy to include control on data collection and data usage by the business functions and associated third parties. As a first step, the consultants advised the company to start monitoring the PI collection, usage and access by business functions without their knowledge. The IT function was given the responsibility to do the monitoring, as majority of the information was handled electronically. The analysis showed that many times, more information than necessary was collected by the some functions, however, no instances of misuse could be identified.

After few days of this exercise, a complaint was registered by a female company employee in the HR function against a male employee in IT support function. The female employee accused the male employee of accessing her photographs stored on a shared drive and posting it on a social networking site.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance and Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

What role can training and awareness play here? (250 to 500 words)

Answer:

Explanation:

See the answer in explanation below.

Explanation:

Training and awareness play an essential role in the successful implementation of a comprehensive privacy program. This is especially true for an organization that has limited expertise on the subject. Training and awareness help to ensure that everyone understands their obligations under the EU GDPR as well as other applicable laws and regulations, while also providing employees with best practices to ensure data protection.

One way to ensure optimal training and awareness is by creating a comprehensive training curriculum tailored specifically for XYZ's needs. The curriculum should cover topics such as data privacy rights, compliance requirements, impact assessment, access control measures, encryption technologies, incident response plans and more. Additionally, it should be augmented with practical examples

so that employees can understand how these principles apply in different scenarios.

Moreover, a comprehensive awareness program should be established to keep all employees informed of the latest developments in privacy law. This can include newsletters, webinars and other communications that explain changes in laws or policies, provide information on new technologies, or even give advice on how to handle particular challenges.

Finally, management should ensure that there are measures in place to evaluate the effectiveness of the training and awareness programs. This can include surveys, interviews with staff members and other methods such as focus groups or workshops. All these means will help XYZ assess whether its employees understand their obligations under the GDPR and other applicable laws and regulations.

By creating a comprehensive training curriculum tailored specifically for its needs and establishing an effective awareness program, XYZ can ensure that everyone in the organization is better informed and aware of their responsibilities under the GDPR. This, in turn, will help to improve compliance with the applicable laws and regulations while protecting its customers' data. Ultimately, this will allow the company to realize its full potential on the European market.

By investing in training and awareness programs, XYZ demonstrates a commitment to proper privacy procedures which will not only benefit its operations in Europe but also those in the US. It is essential for any company operating today to prioritize privacy so that it can build client trust as well as remain compliant with regulations. With an effective training and awareness program in place, XYZ can confidently approach both current and potential clients knowing that their data will be secure.

Overall, training and awareness are important components of a successful privacy program. By investing in these programs, XYZ can ensure that everyone is informed and aware of their responsibilities under the GDPR and other applicable laws and regulations. This, in turn, will help to protect customer data while also improving compliance with applicable laws. Ultimately, this will help XYZ realize its full potential on the European market as well as build client trust.

By establishing a comprehensive training and awareness program, XYZ will be better prepared to handle the challenges of data privacy regulation. With the proper methods in place, the company can not only protect its customers' data but also remain compliant with laws and regulations. This, in turn, will help it achieve success on both domestic and international markets. Ultimately, investing in training and awareness is essential for any organization operating today.

NEW QUESTION # 65

What are the criteria for deciding the role of Data Fiduciary? Tick all that apply.

- A. Data Fiduciary is the one who acts on behalf of data processor
- B. Data Fiduciary is the one who decides the purposes of personal data processing
- C. Data Fiduciary is the one who decides the means of personal data processing
- D. Data Fiduciary is the one who stores the personal data

Answer: B,C

Explanation:

Under the Digital Personal Data Protection Act, 2023, a Data Fiduciary is defined as any person who alone or in conjunction with other persons determines the purpose and means of processing personal data. Therefore, A and D are correct.

* Option B is incorrect because acting on behalf of a processor implies a sub-processor or related role, not a fiduciary.

* Option C is incorrect because mere storage does not make an entity a Data Fiduciary.

NEW QUESTION # 66

Your district council releases an interactive map of orange trees in the district which shows that the locality in which your house is located has the highest concentration of orange trees. Does the council map contain your personal information?

- A. No - Orange trees are not a person and so it can't have personal information.
- B. None of the above.
- C. It depends - on the context of other information associated with the map.
- D. Yes - your ownership of the property is a matter of public record.

Answer: C

NEW QUESTION # 67

FILL BLANK

MIM

The company has a well-defined and tested Information security monitoring and incident management process in place. The process has been in place since last 10 years and has matured significantly over a period of time. There is a Security Operations Centre

(SOC) to detect security incidents based on well-defined business rules.

The security incident management is based on ISO 27001 and defines incident types, alert levels, roles and responsibilities, escalation matrix, among others. The consultants advised company to realign the existing monitoring and incident management to cater to privacy requirements. The company consultants sought help of external privacy expert in this regard.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance and Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

If you were the privacy expert advising the company, what steps would you suggest to realign the existing security monitoring and incident management to address privacy requirements especially those specific to client relationships? (250 to 500 words)

Answer:

Explanation:

See the answer in explanation below.

Explanation:

As an external privacy expert, the first step I would suggest for XYZ company is to conduct a detailed assessment of their existing security monitoring and incident management processes. This should include an analysis of how data is collected, stored, and accessed; what kind of policies are currently in place; and any other relevant security measures. It should also identify areas where additional process or technical changes may be required to meet privacy requirements.

Once the initial assessment has been completed, I would recommend that XYZ take steps to ensure that its processes align with applicable laws and regulations regarding data protection, such as EU GDPR. For example, they should update their policies around data collection and storage so that they comply with GDPR's requirements on consent and purpose limitation. Additionally, XYZ should ensure that their systems are secure and only authorized personnel can access the data.

Also I would suggest that XYZ develop a comprehensive incident response plan, indicating how they will address any data breaches or other privacy incidents. The plan should include steps for notification to affected individuals or organizations, containment of the incident, investigations into its cause and scope, and remediation efforts to prevent similar incidents in the future.

Lastly I would recommend that XYZ review their client contracts to ensure that they clearly describe the company's commitments regarding data protection and security measures. This could include GDPR- compliant language on consent forms as well as clauses committing to regularly audit and update processes as necessary. These contractual terms will help protect both XYZ and their clients in the event of a privacy breach.

In conclusion, implementing these steps will help XYZ establish an effective privacy program that meets all applicable legal requirements, protects their clients' data, and provides them with a competitive edge in the market. Additionally, it will ensure that they remain compliant and have appropriate measures in place to address any potential issues. By taking these proactive measures now, XYZ can ensure that they continue to successfully operate in both the EU and US markets while protecting the privacy of its customers.

NEW QUESTION # 68

Which among the following would not be characteristic of a good privacy notice?

- A. Comprehensive - explaining all the possible scenarios and processing details making the notice lengthy
- B. Clear and concise
- C. Easy to understand
- D. Multi-lingual

Answer: A

Explanation:

A good privacy notice, as guided by the DSCI Privacy Framework and other global frameworks, should be:

- * Easy to understand
- * Clear and concise
- * Accessible in multiple languages where appropriate

While being comprehensive is essential, overwhelming users with exhaustive and overly detailed information is discouraged. Overly lengthy notices may obscure important information and reduce usability. The objective is to balance completeness with clarity and brevity.

Thus, Option C, by suggesting excessive length, does not align with the characteristics of a good privacy notice.

NEW QUESTION # 69

.....

At present, many office workers are dedicated to improving themselves. Most of them make use of their spare time to study our DCPLA study materials. As you can see, it is important to update your skills in company. After all, the most outstanding worker can get promotion. You also need to plan for your future. Getting the DCPLA Study Materials will enhance your ability. Also, various good jobs are waiting for you choose. Your life will become wonderful if you accept our guidance.
