Amazon AWS Certified Cloud Practitioner Exam is a certification exam that is designed to test the knowledge and skills of individuals in cloud computing. AWS-Certified-Cloud-Practitioner exam is targeted towards individuals who are new to the AWS Cloud and are interested in learning more about cloud computing. AWS-Certified-Cloud-Practitioner Exam validates that an individual has the basic knowledge and skills required to work with AWS Cloud.

## Amazon AWS Certified Cloud Practitioner Sample Questions (Q525-Q530):

### NEW QUESTION # 525

Which AWS service or feature can be used to control inbound and outbound traffic on an Amazon EC2 instance?

- A. Network ACLs
- B. AWS Identity and Access Management (IAM)
- C. Internet gateways
- D. Security groups

**Answer: D**

Explanation:

D is correct because security groups are the AWS service or feature that can be used to control inbound and outbound traffic on an Amazon EC2 instance. Security groups act as a virtual firewall for the EC2 instance, allowing users to specify which protocols, ports, and source or destination IP addresses are allowed or denied.

A is incorrect because internet gateways are the AWS service or feature that enable communication between instances in a VPC and the internet. They do not control the traffic on an EC2 instance. B is incorrect because AWS Identity and Access Management (IAM) is the AWS service or feature that enables users to manage access to AWS services and resources securely. It does not control the traffic on an EC2 instance. C is incorrect because network ACLs are the AWS service or feature that provide an optional layer of security for the VPC that acts as a firewall for controlling traffic in and out of one or more subnets. They do not control the traffic on an EC2 instance.

### NEW QUESTION # 526

which of the following are advantages of the aws cloud?

- A. AWS manages cost planning for virtual servers.
- B. AWS manages the development of applications on AWS.
- C. AWS manages the maintenance of the cloud infrastructure.
- D. AWS manages capacity planning for physical servers.
- E. AWS manages the security of application built on AWS.

**Answer: C,D**

### NEW QUESTION # 527

If a user has an AWS account with an enterprise level AWS support plan, who is the primary point of contact for billing or account inquiries?

- A. AWS Concierge Support team
- B. Solutions architect
- C. AWS Partner Network (APN) partner
- D. An AWS Marketplace seller

**Answer: A**

### NEW QUESTION # 528

Which task can a company complete by using AWS Organizations?

- A. Share pre-purchased Amazon EC2 resources across accounts.
- B. Activate DDoS protection across all accounts.
- C. Remove unused and underutilized AWS resources across all accounts.
- D. Track application deployment statuses globally.

## Answer: C

Explanation:

Using AWS Organizations, you can programmatically create new AWS accounts and allocate resources, group accounts to organize your workflows, apply policies to accounts or groups for governance, and simplify billing by using a single payment method for all of your accounts.

## NEW QUESTION # 529

A web developer has limited knowledge of AWS networking services such as Amazon VPC, Elastic Load Balancing, and Auto Scaling, but wants to host a highly available web application.

Which AWS service would automatically handle the deployment and reduce the complexity for the developer?

- A. AWS CloudFormation
- B. AWS CodeDeploy
- C. AWS Elastic Beanstalk
- D. AWS Resource Access Manager

## Answer: C

## NEW QUESTION # 530
