If the C-S4CPB-2502 certification test content changes after your purchase within 1 year, you will instantly get free real questions updates.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q55-Q60):

NEW QUESTION # 55

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- **A. Multi-tenant server**
- B. Software installation on customer site
- C. Perpetual license
- **D. Lower total cost of ownership**

Answer: A,D

Explanation:

A public cloud is a type of cloud computing in which a third-party service provider makes computing resources available to users over the public Internet. Some characteristics of public cloud are:

* **Multi-tenant server:** Public cloud uses shared infrastructure, where multiple users or organizations can access the same resources, such as compute, storage, or applications. The data and applications of each user are isolated and secured from others. This allows for efficient utilization of resources and scalability.

* **Lower total cost of ownership:** Public cloud reduces the upfront and operational costs of IT, as users do not need to purchase, install, or maintain hardware or software. Users only pay for the resources they use, and can benefit from the economies of scale and continuous innovation of the cloud service provider.

NEW QUESTION # 56

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- **A. To capture a value in a text field that should be stored as a variable.**
- **B. To capture text in a message screen that can be used for data binding later.**
- C. To capture an error message on the screen that can be used later.
- D. To capture a static label on the screen that should be checked during test execution.

Answer: A,B

NEW QUESTION # 57

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Maintain SAP Business Technology Platform Extensions app
- **B. In the Custom Fields app**
- C. In the Extensibility Cockpit app
- D. In the Runtime Authoring mode

Answer: B

Explanation:

You enable a customer-specific field to be available for UIs and reports relevant for the same business context in the Custom Fields app. The Custom Fields app allows you to create and manage custom fields for business objects in SAP S/4HANA Cloud, public edition. You can define the properties of the custom fields, such as the label, data type, length, and default value. You can also specify the UIs and reports where you want the custom fields to appear, and the business context that determines the visibility and authorization of the custom fields. The Custom Fields app also enables you to activate the custom fields and generate the corresponding CDS views and OData services for consumption by other applications. NEW QUESTION # 58

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Modify building blocks.
- **B. Add new sales organizations.**
- **C. Add blocking reasons for billing.**
- **D. Change approval thresholds.**
- E. Create new scope items.

Answer: B,C,D

NEW QUESTION # 59

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Modify building blocks.
- **B. Add new sales organizations.**
- **C. Add blocking reasons for billing.**
- **D. Change approval thresholds.**
- E. Create new scope items.

Answer: B,C,D

Explanation:

In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:

* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.

* Change approval thresholds: Modifying approval thresholds is an essential configuration activity that adjusts the approval limits for various transactions, ensuring that the approval process aligns with the company's internal control and governance policies. This can involve setting different thresholds for purchase orders, expense approvals, and other financial transactions.

* Add blocking reasons for billing: This configuration activity allows the company to define specific reasons for blocking billing documents, ensuring that billing does not proceed under certain conditions until the issues are resolved. This is critical for maintaining accurate and compliant billing processes.

These activities are part of the detailed configuration work that tailors the SAP S/4HANA Cloud system to the specific operational needs of the business, ensuring that the software supports the company's unique processes and policies.
