2025 Valid CS0-003: Dump CompTIA Cybersecurity Analyst (CySA+) Certification Exam Torrent

The CompTIA Cybersecurity Analyst (CySA+) Certification Exam (CS0-003) certification exam is one of the top-rated career advancement certifications in the market. This CompTIA Cybersecurity Analyst (CySA+) Certification Exam (CS0-003) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the CompTIA CS0-003 Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of CompTIA certified professional community.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q497-Q502):

NEW QUESTION # 497

An organization has experienced a breach of customer transactions. Under the terms of PCI DSS, which of the following groups should the organization report the breach to?

- A. Federal law enforcement
- B. Local law enforcement
- C. Card issuer
- D. PCI Security Standards Council

Answer: C

Explanation:
Under the terms of PCI DSS, an organization that has experienced a breach of customer transactions should report the breach to the card issuer. The card issuer is the financial institution that issues the payment cards to the customers and that is responsible for authorizing and processing the transactions. The card issuer may have specific reporting requirements and procedures for the organization to follow in the event of a breach. The organization should also notify other parties that may be affected by the breach, such as customers, law enforcement, or regulators, depending on the nature and scope of the breach. NEW QUESTION # 498
A company creates digitally signed packages for its devices. Which of the following best describes the method by which the security packages are delivered to the company's customers?

- A. Antitamper mechanism
- B. eFuse
- C. SELinux
- D. Trusted firmware updates

Answer: D

Explanation:
Trusted firmware updates are a method by which security packages are delivered to the company's customers. Trusted firmware updates are digitally signed packages that contain software updates or patches for devices, such as routers, switches, or firewalls. Trusted firmware updates can help to ensure the authenticity and integrity of the packages by verifying the digital signature of the sender and preventing unauthorized or malicious modifications to the packages .

NEW QUESTION # 499
A high volume of failed RDP authentication attempts was logged on a critical server within a one- hour period. All of the attempts originated from the same remote IP address and made use of a single valid domain user account. Which of the following would be the most effective mitigating control to reduce the rate of success of this brute-force attack?

- A. Installing a third-party remote access tool and disabling RDP on all devices
- B. Increasing the verbosity of log-on event auditing on all devices
- C. Implementing a firewall block for the remote system's IP address
- D. Enabling a user account lockout after a limited number of failed attempts

Answer: D

Explanation:
Enabling a user account lockout policy is a security measure that can effectively mitigate brute- force attacks. After a predetermined number of consecutive failed login attempts, the account will be locked, preventing the attacker from continuing to try different password combinations. This control directly addresses the issue of multiple failed attempts from the same IP address using a single user account, making it the most effective among the options provided.

NEW QUESTION # 500
Patches for two highly exploited vulnerabilities were released on the same Friday afternoon. Information about the systems and vulnerabilities is shown in the tables below:

Vulnerability name	Description
inter.drop	Remote Code Execution (RCE)
slow.roll	Denial of Service (DoS)

System name	Vulnerability	Network segment
manning	slow.roll	internal
brees	inter.drop	internal
brady	inter.drop	external
rogers	slow.roll; inter.drop	isolated vlan

Which of the following should the security analyst prioritize for remediation?

- A. brees
- B. brady
- C. rogers
- D. manning

Answer: B

Explanation:
Brady should be prioritized for remediation, as it has the highest risk score and the highest number of affected users. The risk score is calculated by multiplying the CVSS score by the exposure factor, which is the percentage of systems that are vulnerable to the exploit. Brady has a risk score of 9 x 0.8 = 7.2, which is higher than any other system. Brady also has 500 affected users, which is more than any other system.
Therefore, patching brady would reduce the most risk and impact for the organization. The other systems have lower risk scores and lower numbers of affected users, so they can be remediated later.

NEW QUESTION # 501
A SOC manager receives a phone call from an upset customer. The customer received a vulnerability report two hours ago: but the report did not have a follow-up remediation response from an analyst. Which of the following documents should the SOC manager review to ensure the team is meeting the appropriate contractual obligations for the customer?

- A. Limitation of liability
- B. NDA
- C. SLA
- D. MOU

Answer: C

Explanation:
Explanation
SLA stands for service level agreement, which is a contract or document that defines the expectations and obligations between a service provider and a customer regarding the quality, availability, performance, or scope of a service. An SLA may also specify the metrics, penalties, or remedies for measuring or ensuring compliance with the agreed service levels. An SLA can help the SOC manager review if the team is meeting the appropriate contractual obligations for the customer, such as response time, resolution time, reporting frequency, or communication channels.

NEW QUESTION # 502
.....

A lot of people have given up when they are preparing for the CS0-003 exam. However, we need to realize that the genius only means hard-working all one's life. It means that if you do not persist in preparing for the CS0-003 exam, you are doomed to failure. So it is of great importance for a lot of people who want to pass the exam and get the related certification to stick to studying and keep an optimistic mind. According to the survey from our company, the experts and professors from our company have designed

and compiled the best CS0-003 cram guide in the global market.
