

Dump NetSec-Pro Torrent, NetSec-Pro Latest Exam Discount

What's more, part of that Prep4King NetSec-Pro dumps now are free: <https://drive.google.com/open?id=1mMoOGHZklRwfFIJnmzcH4V92zvXOe5j>

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test NetSec-Pro exam can make you achieve those goals and prove that you are competent. Buying our NetSec-Pro practice test can help you pass the NetSec-Pro Exam fluently and the learning costs you little time and energy. The questions and answers of our NetSec-Pro test question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 2	GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.

Topic 3	• NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 4	• Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 5	• Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

NetSec-Pro Latest Exam Discount | Valid Dumps NetSec-Pro Questions

The content of our NetSec-Pro practice braindumps is chosen so carefully that all the questions for the exam are contained. And our NetSec-Pro study materials have three formats which help you to read, test and study anytime, anywhere. They are the versions of the PDF, Software and APP online. This means with our NetSec-Pro training guide, you can prepare for exams efficiently. If you desire a NetSec-Pro certification, our products are your best choice.

Palo Alto Networks Network Security Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which NGFW function can be used to enhance visibility, protect, block, and log the use of Post- quantum Cryptography (PQC)?

- A. Decryption policy
- B. DNS Security profile
- C. Security policy
- D. Decryption profile

Answer: A

Explanation:

A decryption policy allows the firewall to inspect encrypted traffic and apply security controls to Post- quantum Cryptography (PQC) usage, as PQC algorithms are typically implemented within encrypted sessions.

"Decryption policies enable the firewall to see and control encrypted traffic. This visibility and control extend to new cryptographic algorithms, including PQC, to ensure that security measures are applied consistently." (Source: Palo Alto Networks Decryption Overview) By decrypting sessions, you ensure that even PQC traffic can be inspected, logged, and subject to security profiles for visibility and policy enforcement.

NEW QUESTION # 42

Using Prisma Access, which solution provides the most security coverage of network protocols for the mobile workforce?

- **A. Client-based VPN**
- B. Explicit proxy
- C. Clientless VPN
- D. Enterprise browser

Answer: A

Explanation:

Client-based VPN solutions like GlobalProtect provide full coverage for the mobile workforce by extending the enterprise security stack to remote endpoints. It establishes a secure tunnel, allowing consistent security policies across the enterprise perimeter and the mobile workforce.

"GlobalProtect is a client-based VPN that provides secure, consistent protection for mobile users by extending the security capabilities of Prisma Access to remote endpoints, covering all network protocols." (Source: GlobalProtect Admin Guide)

NEW QUESTION # 43

Which feature of SaaS Security will allow a firewall administrator to identify unknown SaaS applications in an environment?

- A. SaaS Data Security
- **B. App-ID Cloud Engine**
- C. App-ID
- D. Cloud Identity Engine

Answer: B

Explanation:

App-ID Cloud Engine (ACE) in SaaS Security uses cloud-based signatures to detect unknown and unsanctioned SaaS applications in the environment.

"App-ID Cloud Engine (ACE) uses real-time cloud intelligence to identify SaaS applications, including previously unknown or newly introduced applications." (Source: ACE for SaaS Visibility) This feature is key for comprehensive SaaS visibility beyond static signatures.

NEW QUESTION # 44

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- **A. Heartbeat polling**
- B. Non-functional state
- C. Bidirectional Forwarding Detection (BFD)
- D. Link monitoring

Answer: A

Explanation:

Heartbeat polling is a core HA function to monitor connectivity between HA peers, leveraging ICMP pings to determine link health and availability.

"Heartbeat Polling uses ICMP pings to verify the connectivity and health of the HA peers. If heartbeat polling fails, the firewall considers the peer to be down and may initiate failover." (Source: HA Link and Path Monitoring) If ICMP pings fail, checking heartbeat polling logs helps identify if link or path monitoring triggers the failover.

NEW QUESTION # 45

An administrator wants to implement additional Cloud-Delivered Security Services (CDSS) on a data center NGFW that already has one enabled. What benefit does the NGFW's single-pass parallel processing (SP3) architecture provide?

- A. It allows additional security inspection devices to be added inline.
- B. It allows for traffic inspection at the application level.
- **C. There will be only a minor reduction in performance.**
- D. There will be no additional performance degradation.

Answer: C

Explanation:

The SP3 architecture of Palo Alto NGFWs ensures that additional security services (CDSS) only cause a minor reduction in performance, as traffic is inspected once in a single pass.

"The single-pass parallel processing (SP3) architecture performs application identification and security enforcement simultaneously in one pass, resulting in only minor performance impacts when enabling multiple security services." (Source: SP3 Architecture) Unlike traditional multi-pass engines, SP3 architecture optimizes performance while delivering comprehensive security.

NEW QUESTION # 46

.....

Prep4King also offers a demo of the Palo Alto Networks NetSec-Pro exam product which is absolutely free. Up to 1 year of free Palo Alto Networks Network Security Professional (NetSec-Pro) questions updates are also available if in any case the sections of the Palo Alto Networks NetSec-Pro actual test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the Palo Alto Networks Palo Alto Networks Network Security Professional Certification Exam after using our NetSec-Pro product. These offers by Prep4King save your time and money. Buy Palo Alto Networks Network Security Professional (NetSec-Pro) practice material today.
