NEW QUESTION # 253

What is true about a master detail relationship? (Choose three.)

- A. By default, records can be reparented master-detail relationships.
- B. To create multilevel master-detail relationships, you need the "Customize Application" user permission.
- C. Standard objects can't be on the detail side of a custom object in a master-detail relationship.
- D. You can create a master-detail relationship if the custom object already contains data.
- E. You can create a relationship as a lookup and then convert it to master-detail if the lookup field in all records contains a value.

Answer: B,C,E

NEW QUESTION # 254

An App Builder wants to deploy a new version of an auto launched flow to production in an active state so that the new functionality is immediately available to users. What should the App Builder take into consideration when planning the deployment?

- A. Include the Process Builder calling the Flow in the deployment
- B. Grant user access to the Flow.
- C. Manually activate the Flow after deployment
- **D. Verify there is an Apex test that provides test coverage for the Flow.**

Answer: D

Explanation:

Explanation

The app builder should verify that there is an Apex test that provides test coverage for the Flow. An Apex test is a unit test that verifies the functionality and quality of Apex code. Apex tests are required to deploy any change that contains Apex code or references Apex code, such as an auto launched flow³. The app builder should ensure that there is an Apex test that covers at least 75% of the Flow logic before deploying it to production in an active state⁴. Option B, C, and D are not things that the app builder should take into consideration when planning the deployment.

NEW QUESTION # 255

Universal Container has a custom object for shipping information.

They have to ship to both businesses and consumers.

They need to show additional values in the custom field called insurance type for business shipping records.

How can this be set up?

- A. Create multiple picklist fields on the object
- B. Use Record type with single page layout.
- **C. Create a multi-select pick-list field.**
- D. Use record types with multiple page layout

Answer: C

NEW QUESTION # 256

Universal Containers allows all employees to submit reviews for leadership using a custom object called Review. These Reviews should only be visible to the HR department and the employee who submitted the record.

Which three steps should an app builder take to properly control access to Reviews?

Choose 3 answers

- **A. Set organization-wide default to Private.**
- B. Add a Master-Detail (User; field on the Review object.
- C. Remove Review Read permission from non-HR Department user Profiles.
- **D. Create a criteria-based Sharing Rule for the HR Department.**
- **E. Disable Grant Access Using Hierarchies.**

Answer: A,D,E

Explanation:

To control access to the Review custom object such that only the HR department and the submitting employee can see the reviews, the following steps should be taken:

* A. Disable Grant Access Using Hierarchies: By default, Salesforce allows users higher in the role hierarchy to access records owned by users lower in the hierarchy. Since reviews should only be visible to HR and the submitting employee, you need to disable Grant Access Using Hierarchies on the Review object to prevent anyone else in the hierarchy from automatically gaining access to these records.

NEW QUESTION # 257

When a user creates an account report, the user does not see industry as an available field in the report builder.

However, this same user is able to see in the account page layout. What scenario would cause this?

- A. The user does not have industry field visibility in the field level security
- **B. The industry field has no record values in the account.**
- C. The industry field is not enabled for the particular record type
- D. The user uses a custom report type which does not include the industry field

Answer: B
