Sitecore-XM-Cloud-Developer exam dumps, Sitecore Sitecore-XM-Cloud-Developer network simulator review

For Sitecore Sitecore-XM-Cloud-Developer exam applicants who don't always have access to the internet, desktop-based practice exam software is appropriate. This Sitecore Sitecore-XM-Cloud-Developer practice test software is compatible with Windows computers. Much like the web-based practice exam, our desktop practice test simulates the actual test. This Sitecore XM Cloud Developer Certification Exam (Sitecore-XM-Cloud-Developer) exam simulation software has the same features as our web-based practice exam, including most probable real exam questions, customizable practice test sessions, and quick result on how you did. To eliminate mistakes and exam anxiety, we advise using this Sitecore-XM-Cloud-Developer practice test software.

Sitecore XM Cloud Developer Certification Exam Sample Questions (Q22-Q27):

NEW QUESTION #22

A developer needs to configure a rendering in order to use dynamic placeholders. Which of the following steps is required? Select all that apply.

- A. Link the placeholder settings item to the rendering item.
- B. In the component TSX file, set a unique placeholder key value that has not yet been defined.
- C. Include the IDynamicPlaceholder base template in the Rendering Parameters template.
- D. Define the placeholder key using a question mark (?) in the placeholder settings item.

Answer: A,C

Explanation:

Dynamic placeholders in Sitecore XM Cloud with Next. jsare used when a rendering can have multiple instances on a page, each needing aunique placeholder name to avoid conflicts.

To configure a rendering withdynamic placeholders, the following steps are required:

- * (A) Include the IDynamic Placeholder base template in the Rendering Parameters template
- * Sitecore provides the IDynamic Placeholderbase template to enable dynamic placeholders.
- * When defining Rendering Parameters, this template must be included to allow dynamic placeholder configuration.
- * This ensures Sitecore recognizes the placeholders as dynamic rather than static.
- * (B) Link the placeholder settings item to the rendering item
- * In Sitecore, placeholder settings define the allowed components for a placeholder.
- * The rendering item should reference a Placeholder Settings item, ensuring that only the allowed components can be added dynamically.
- * This step is crucial to avoid runtime issues when rendering dynamic placeholders.
- * (C) Define the placeholder key using a question mark (?) in the placeholder settings item # Incorrect
- * Placeholder settingsdo notuse a question mark (?) to define a dynamic placeholder key.
- * The?syntax was used in older Sitecore versions for dynamic placeholders, but inXM Cloud with Next.js, placeholders are handled differently usingGUID-based namingfor uniqueness.
- * (D) In the component TSX file, set a unique placeholder key value that has not yet been defined # Incorrect
- * Next. jsdoes not requiremanually setting a unique key.
- * Instead, Sitecoreautomatically generates a unique key for each dynamic placeholder instance using GUID-based naming.
- * In aNext.js JSS component, placeholders are defined using:

#Correct Answers:#Incorrect Answers:How Dynamic Placeholders Work in XM Cloud with Next.js:

export default DynamicComponent;

- * The {rendering uid} ensures each placeholder instance has aunique name, avoiding conflicts.
- * Sitecore XM Cloud Dynamic Placeholders- Using Dynamic Placeholders
- * Next.js with Sitecore JSS- Placeholder Configuration
- * Sitecore Headless Development- Best Practices for Rendering Placeholders References:1.

NEW OUESTION #23

The XM Cloud Pages editor comes with a set of devices (for example, Desktop Regular and Mobile) with predefined settings. Which of the following fields must a developer specify to add and configure an additional device?

- A. Device width, visibility, responsive breakpoints
- B. Device height, visibility, an icon to represent the device
- C. Device width, visibility, an icon to represent the device
- D. Device height, visibility, responsive breakpoints

Answer: C

Explanation:

When adding and configuring an additional device in the XM Cloud Pages editor, a developer must specify the device width in pixels, the visibility options (Disabled, Fixed, Optional), and an icon to represent the device. These settings are crucial for simulating how content will appear on different devices within the Pages editor.

References: The Sitecore XM Cloud documentation provides detailed instructions on adding and configuring devices in the Pages editor, including specifying the device width, visibility options, and selecting an icon1.

NEW QUESTION #24

Which of the following are ways to create an XM Cloud environment?

• A. Defining the environment at .env file from the source code (laC) and re-deploying it.

- B. The only way to create a cloud environment is from the Sitecore Cloud Portal Ul.
- C. The CLI, the Deploy app, or Rest API.
- D. Environments are automatically created during the deployment; it is not required to create environments explicitly.

Answer: C

Explanation:

According to the Sitecore XM Cloud Documentation for Developers1, there are three ways to create an XM Cloud environment: Using the Sitecore CLI, which is a command-line tool that allows you to perform operations against local or remote XM Cloud instances. You can use the Sitecore CLI to create a project and an environment using the sitecore project create and sitecore environment createcommands2.

Using the XM Cloud Deploy app, which is a web application that allows you to create and manage projects, environments, and deployments. You can use the XM Cloud Deploy app to create a project and an environment using the user interface3. Using the XM Cloud Deploy API, which is a RESTful API that allows you to programmatically interact with the XM Cloud Deploy app. You can use the XM Cloud Deploy API to create a project and an environment using HTTP requests4. 2:Walkthrough: Creating an XM Cloud project using the Sitecore CLI3:Create a project in the Deploy app4:

NEW QUESTION #25

To connect Sitecore Pages to your local XM Cloud instance, which steps are involved?

[XM Cloud Deploy API Reference]1:XM Cloud Documentation for Developers - Sitecore

- A. Open Pages and create an entry in Local Storage for the key "Sitecore.Pages.LocalXmCloudUrl" with the following value: https://pages.sitecorecloud.io
- B. Open the local Content Management instance and set the predefined rendering host field value in Sitecore tohttps://xmcloudcm.localhost
- C. Open the local Content Management instance and set the predefined rendering host field value in Sitecore to https://pages.sitecorecloud.io
- D. Open Pages and create an entry in Local Storage for the key "Sitecore.Pages.LocalXmCloudUrl" with the following value: https://xmcloudcm.localhost

Answer: D

Explanation:

According to the Sitecore XM Cloud Documentation for Developers1, after setting up your local XM Cloud development environment, Sitecore Pages is not connected to your locally running XM Cloud instance. You can connect your local XM Cloud application to Sitecore Pages by setting a local storage key in your browser.

This allows you to use Sitecore Pages to edit content and layouts on your local front-end application. To connect Sitecore Pages to your local XM Cloud instance, you need to follow these steps2:

In your browser, navigate to the Sitecore Pages application.

Open the developer tools console of your browser and find the local storage section. The location differs between browsers:

For Chrome and Edge, open the Application panel. In the Storage section, expand the Local Storage section.

For Firefox, open the Storage panel, and expand the Local Storage section.

In the Local Storage panel, click the entry for Sitecore Pages9to reveal the local storage entries.

Create a new entry by adding a new row with the following values:

Key: Sitecore.Pages.LocalXmCloudUrl.

Value: the URL of your local XM Cloud instance. For example, 10.

Refresh the 9 page to see your local front-end application.

2:Connect Sitecore Pages to your local XM Cloud instance1:XM Cloud Documentation for Developers - Sitecore

NEW QUESTION #26

A build to XM Cloud fails. Which options are available for a developer to diagnose the error?

- A. The Content Management instance logs for the environment
- B. The deployment log files for the environment
- C. The Deploy app system status page
- D. The project details page in the Deploy app

Answer: B

Explanation:

According to the Sitecore XM Cloud Documentation for Developers1, the deployment log files contain the progress, status, warnings, and errors of an XM Cloud deployment. You can access the deployment log files from the XM Cloud Deploy app by clicking the Logs button on the environment page. The log files include information about the provisioning, build, deployment, and post action phases of the deployment. You can also download the log files for offline analysis or troubleshooting2.

The other options are not as useful for diagnosing a build failure:

The Deploy app system status page shows the overall health and availability of the XM Cloud Deploy app, not the status of individual deployments3.

The Content Management instance logs for the environment show the runtime logs of the Content Management instance, not the build logs of the deployment4.

The project details page in the Deploy app shows the general information and settings of the project, not the details of the deployment1.

2:View the deployment log files | Sitecore Documentation3:Check the system status of the XM Cloud Deploy app | Sitecore Documentation4:Access the Content Management instance logs | Sitecore Documentation1:Manage a project in the XM Cloud Deploy app | Sitecore Documentation

NEW QUESTION #27

....

If you are ready for the exam for a long time, but lack of a set of suitable Sitecore-XM-Cloud-Developer learning materials, I will tell you that you are so lucky to enter this page. We are such Sitecore-XM-Cloud-Developer exam questions that you can use our products to prepare the exam and obtain your dreamed Sitecore-XM-Cloud-Developer certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. Our Sitecore-XM-Cloud-Developer exam questions will be your best ally to get what you wanted.

Authorized Sitecore-XM-Cloud-Developer Certification: https://www.surepassexams.com/Sitecore-XM-Cloud-Developer-exam-bootcamp.html

Obliged by our principles and aim, they are accessible and accountable to your questions related to our Sitecore-XM-Cloud-Developer actual collection: Sitecore XM Cloud Developer Certification Exam, Best and most appropriate guidance and support can be achieved through the smart helping materials of SurePassExams and if you rely on the Sitecore-XM-Cloud-Developer online interactive exam engine and Sitecore-XM-Cloud-Developer from SurePassExams latest video training properly then you will be definitely in an advantage over others, We believe that you must have heard about our Sitecore-XM-Cloud-Developer sure pass test, a very unique Sitecore-XM-Cloud-Developer study guide.

SurePassExams have made all of the different formats so the students won't face any extra issues and crack Sitecore-XM-Cloud-Developer certification exams for the betterment of their futures.

But it also involves new and unique challenges and opportunities, Obliged by our principles and aim, they are accessible and accountable to your questions related to our Sitecore-XM-Cloud-Developer actual collection: Sitecore XM Cloud Developer Certification Exam.

Updated Dump Sitecore-XM-Cloud-Developer Torrent - Pass Sitecore-XM-Cloud-Developer Exam

Best and most appropriate guidance and support can be achieved through the smart helping materials of SurePassExams and if you rely on the Sitecore-XM-Cloud-Developer online interactive exam engine and Sitecore-XM-Cloud-Developer from SurePassExams latest video training properly then you will be definitely in an advantage over others.

We believe that you must have heard about our Sitecore-XM-Cloud-Developer sure pass test, a very unique Sitecore-XM-Cloud-Developer study guide, So our technical teams continue to renew the Sitecore-XM-Cloud-Developer study materials in time, in order to let the examinee using our products to keep up with the Sitecore-XM-Cloud-Developer exam reform tightly.

At SurePassExams, we provide high quality and well-curated Sitecore-XM-Cloud-Developer pdf dumps for the preparation of Sitecore-XM-Cloud-Developer exam.
