Almost everyone is trying to pass the Salesforce Certified Platform Developer II (PDII) (PDII) certification exam to upgrade their CVs and land desired jobs. Every applicant of the Salesforce Certified Platform Developer II (PDII) (PDII) exam faces just one problem and that is not finding real and Latest PDII Exam Questions. Applicants are always confused about where to buy actual PDII Exam Questions and prepare successfully for the Salesforce Certified Platform Developer II (PDII) (PDII) exam in a short time.

Salesforce PDII Certification Exam is an essential certification for Salesforce developers who want to take their skills to the next level. PDII exam evaluates the developer's advanced knowledge of the Salesforce platform and their ability to build customized applications that meet business requirements. Salesforce Certified Platform Developer II (PDII) certification provides a valuable opportunity for developers to demonstrate their expertise and differentiate themselves in the competitive job market.

The PDII certification exam is a comprehensive exam that covers a wide range of topics related to Salesforce development. Some of the key topics covered in the exam include Apex code development, data modeling and management, integration with external systems, security and access control, and user interface design. PDII exam is designed to evaluate the candidate's knowledge and expertise in these areas and their ability to apply that knowledge to real-world scenarios.

Salesforce PDII Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Testing, Debugging, and Deployment: This topic challenges developers to implement advanced testing techniques and debugging strategies for Apex, Lightning components, and Visualforce. You'll address real-world scenarios requiring error isolation and optimized deployment processes. Mastery here highlights your readiness to deliver reliable and maintainable Salesforce solutions in professional environments.
Topic 2	<ul style="list-style-type: none">Process Automation, Logic, and Integration: Your understanding of both declarative and programmatic interactions will be assessed through scenario-based challenges. You must showcase best practices in Apex triggers, error handling, and transactional integrity. Additionally, you will apply advanced SOQL, asynchronous Apex techniques, and dynamic Apex features to solve complex problems. Finally, your ability to implement publish subscribe logic and programmatic integration for inbound and outbound communication will be evaluated.

Topic 3	<ul style="list-style-type: none"> Performance: This topic measures your skills in optimizing Salesforce application performance. You will identify and resolve inefficiencies, design scalable solutions, and enhance system responsiveness. Success here underscores your ability to tackle complex performance challenges in large-scale Salesforce implementations.
Topic 4	<ul style="list-style-type: none"> User Interface: This topic evaluates the ability of Salesforce developers to design and optimize Salesforce UI components using Lightning Web Components, Aura, and Visualforce. Salesforce developers will identify best practices, responsive design techniques, and methods to ensure seamless communication between components. Excelling here demonstrates your expertise in building dynamic, user-friendly Salesforce interfaces.
Topic 5	<ul style="list-style-type: none"> Advanced Developer Fundamentals: This topic assesses your mastery of foundational Salesforce developer concepts, including localization, sharing mechanisms, and advanced Apex coding practices. Through scenario-based questions, Salesforce developers will justify solutions, analyze Apex features, and evaluate integration techniques.

PDII New Real Exam, Reliable PDII Exam Sims

The price for PDII training materials is quite reasonable, and no matter you are a student or you are an employee at school, you can afford it. PDII exam dumps are edited by experienced experts, therefore the quality can be guaranteed. PDII training materials contain both questions and answers, and it's convenient for you to check the answers after finish practicing. In addition, PDII Exam Dumps cover most knowledge points of the exam, and you can also improve your ability in the process of learning.

Salesforce Certified Platform Developer II (PDII) Sample Questions (Q189-Q194):

NEW QUESTION # 189

Given the following information regarding Universal Containers (UC):

- * UC represents their customers as Accounts in Salesforce
- * All customer has a unique Customer-Number- c, that is unique across all of UC's systems.
- * UC also has a custom Invoice_ c object, with a Lookup to Account, to represent invoices that are sent out from their external system UC wants to integrate invoice data back into Salesforce so Sales Reps can see when a customer pays their bills on time. What is the optimal way to implement this?

Use Salesforce Connect and external data objects to seamlessly import the invoice data into Salesforce without custom code.

- A. Query the Account Object on each call to insert invoice data to fetch the Salesforce ID corresponding to the Customer Number on the invoice.
- B. Ensure customer_number__c is an External ID and that a custom field invoice_number__c is an External ID and Upsert invoice data nightly.
- C. Create a cross-reference table in the custom invoicing system with the Salesforce Account ID of each Customer and insert invoice data daily.
- D.

Answer: D

NEW QUESTION # 190

What are three benefits of using declarative customizations over code? Choose 3 answers

- A. Declarative customizations do not require user testing.
- B. Declarative customizations cannot generate run time errors.
- C. Declarative customizations are not subject to governor limits.
- D. Declarative customizations will automatically update with each Salesforce release.
- E. Declarative customizations generally require less maintenance.

Answer: A,C,D

NEW QUESTION # 191

What should a developer use to query all Account fields for the Acme account in their sandbox?

- A. SELECT ALL FROM Account WHERE Name = "Acme" LIMIT 1
- B. **SELECT FIELDS (ALL) FROM Account WHERE Name = 'Acme' LIMIT 1**
- C. SELECT FIELDS FROM Account WHERE Name = 'Acme' LIMIT 1
- D. SELECT * FROM Recount WHERE Names = 'Aeme' LIMIT 1

Answer: B

Explanation:

The correct SOQL query to retrieve all fields for a specific Account is to use the FIELDS(ALL) function within the SELECT clause of the SOQL query. This will return all fields for the Account named

'Acme'. References: SOQL and SOSL Reference Guide - FIELDS() Function

NEW QUESTION # 192

Universal Containers (UC) wants to develop a customer community to help their customers log issues with their containers. The community needs to function for their German- and Spanish-speaking customers also. UC heard that it's easy to create an international community using Salesforce, and hired a developer to build out the site.

What should the developer use to ensure the site is multilingual?

- A. Use custom objects to translate custom picklist values.
- B. **Use custom labels to ensure custom messages are translated properly.**
- C. Use custom metadata to translate custom picklist values.
- D. Use custom settings to ensure custom messages are translated properly.

Answer: B

Explanation:

Custom labels are custom text values that can be accessed from Apex classes, Visualforce pages, or Lightning components. Custom labels can be translated into any language that Salesforce supports, and can be used to display custom messages in the user's language based on their locale settings. By using custom labels, the developer can ensure that the site is multilingual and can display the appropriate messages to the German- and Spanish-speaking customers. Custom labels can also be packaged and distributed as part of an AppExchange app. Reference: [Custom Labels], [Translate Custom Labels]

NEW QUESTION # 193

A developer created a Lightning web component for the Account record page that displays the five most recently contacted Contacts for an Account. The Apex method, getRecentContacts, returns a list of Contacts and will be wired to a property in the component.

```
01:  
02: public class ContactFetcher {  
03:  
04:     static List<Contact> getRecentContacts(Id accountId) {  
05:         List<Contact> contacts = getFiveMostRecent(accountId);  
06:         return contacts;  
07:     }  
08:  
09:     private static List<Contact> getFiveMostRecent(Id accountId) {  
10:         ...implementation...  
11:  
12:     }  
13: }
```

Which two lines must change in the above ode to make the Apex method able to be wired?

Choose 2 answers

- A. Remove private from line 09.
- **B. Add public to line 04.**
- C. Add AuraEnabled(cacheabletrue) to the line 08
- D. Add **@AuraEnabled (cacheabletrue)** to line 03.

Answer: B,D

NEW QUESTION # 194

Our PDII exam questions just focus on what is important and help you achieve your goal. When the reviewing process gets some tense, our PDII practice materials will solve your problems with efficiency. With high-quality PDII Guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.
