Oracle Fusion Cloud Procurement 2023 Implementation Professional - Delta Sample Questions (Q145-Q150):

NEW QUESTION # 145

Which of the following tasks can be performed using Fusion Functional Set Up Manager?

- A. Importing and exporting data using spreadsheets
- B. Defining and maintaining approval rules
- C. Creating and managing purchase orders
- D. Managing user roles and security profiles

Answer: B

Explanation:

Fusion Functional Set Up Manager allows users to define and maintain approval rules for various business processes within Oracle Fusion Cloud. These rules determine the routing and approval hierarchy for transactions such as purchase orders, requisitions, and expense reports.

NEW QUESTION # 146

Which statement best describes job roles in Oracle Fusion Cloud Procurement?

- A. Job roles determine the tasks and privileges that a user can perform.
- B. Job roles restrict user access to specific functionality within Oracle Fusion Cloud Procurement.
- C. Job roles provide fine-grained control over security policies.
- D. Job roles define specific functional access within Oracle Fusion Cloud Procurement.

Answer: A

Explanation:

Job roles define the tasks and privileges that a user can perform within Oracle Fusion Cloud Procurement. They are designed to group users with similar responsibilities and determine the access levels and functional responsibilities for each user.

NEW QUESTION # 147

What are the key features of Supplier Qualification Management (SQM) in Oracle Fusion Cloud Procurement?

- A. Purchase order management
- B. Inventory control and management
- C. Supplier rating and ranking
- D. Payment processing automation

Answer: C

Explanation:

One of the key features of Supplier Qualification Management (SQM) in Oracle Fusion Cloud Procurement is supplier rating and ranking. SQM allows organizations to evaluate and score potential suppliers based on predefined qualification criteria. This rating and ranking system helps organizations prioritize and engage the most qualified suppliers, improving procurement efficiency and effectiveness. Features like purchase order management, payment processing automation, and inventory control are typically handled by other modules in the Oracle Fusion Cloud Procurement suite.

NEW QUESTION # 148

What is the advantage of using Punch Out catalogs in Oracle Fusion Cloud Procurement?

- A. Increased control over the purchasing process
- B. Enhanced security for sensitive transactions
- C. Improved visibility into supplier performance
- D. Reduced manual effort in managing catalogs

Answer: D

Explanation:

By using Punch Out catalogs, suppliers can manage their catalogs directly within the procurement system, eliminating the need for manual catalog uploads and updates. This reduces manual effort for both suppliers and buyers, streamlining the catalog management process.

NEW QUESTION # 149

During the implementation of Oracle Fusion Cloud Procurement, what is the purpose of performing gap analysis?

- A. To identify requirements that are not supported by the system.
- B. To assess the readiness of the organization for change.
- C. To determine the project timeline and milestones.
- D. To evaluate the performance of the implementation team.

Answer: A

Explanation:

Gap analysis is a crucial step in the implementation process as it helps identify the gaps between desired functionalities and the

capabilities of the system. By conducting a comprehensive gap analysis, project teams can recognize specific requirements that are not supported by the system. This information is crucial for making informed decisions on customizations, workarounds, or alternative solutions to fulfill those requirements effectively.
