Exercise: CLT practice

0.0 / 6.0 puntos (calificados)

The random variables X_i are i.i.d. with mean 2 and standard deviation equal to 3. Assume that the X_i are nonnegative. Let $S_n = X_1 + \dots + X_n$.

Use the CLT to find good approximations to the following quantities. You may want to refer to the [normal table](#). In parts (a) and (b), give answers with 4 decimal digits.

Normal Table
Show

a) $P(S_{100} \leq 245) \approx$

b) We let N (a random variable) be the first value of n for which S_n exceeds 119.

$P(N > 49) \approx$

c) What is the largest possible value of n for which we have $P(S_n \leq 128) \approx 0.5$?

$n =$

Get the Most Recent MSSC CLT Exam Questions for Guaranteed Success: It would be really helpful to purchase Certified Logistics Technician (CLT) 4.0 (CLT) exam dumps right away. If you buy this MSSC Certification Exams product right now, we'll provide you with up to 365 days of free updates for Certified Logistics Technician (CLT) 4.0 (CLT) authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the MSSC CLT exam dumps.

You can download our CLT guide torrent immediately after you pay successfully. After you pay successfully you will receive the mails sent by our system in 10-15 minutes. Then you can click on the links and log in and you will use our software to learn our CLT prep torrent immediately. Not only our CLT Test Prep provide the best learning for them but also the purchase is convenient because the learners can immediately learn our CLT prep torrent after the purchase. So the using and the purchase are very fast and convenient for the learners

Exam CLT Exercise - CLT 100% Exam Coverage

Browsers including MS Edge, Internet Explorer, Safari, Opera, Chrome, and Firefox also support the online version of the MSSC CLT practice exam. Features we have discussed in the above section of the VCEdumps Certified Logistics Technician (CLT) 4.0 (CLT) practice test software are present in the online format as well. But the web-based version of the CLT practice exam requires a continuous internet connection.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q76-Q81):

NEW QUESTION # 76

Who is responsible for documentation for materials leaving the U.S.?

- A. EPA
- B. Customs broker
- C. Freight forwarder
- D. State Department

Answer: C

Explanation:

In international logistics, the freight forwarder is the party responsible for preparing and managing export documentation for goods leaving the United States. According to CLT 4.0, freight forwarders coordinate with exporters, carriers, and customs authorities to ensure compliance with export control laws, documentation accuracy, and transportation efficiency. Their tasks include completing commercial invoices, export declarations, bills of lading, and certificates of origin. Freight forwarders also select carriers, arrange cargo insurance, and book transport space, acting as intermediaries between exporters and international consignees. While customs brokers manage imports, freight forwarders specialize in exports-ensuring shipments meet the requirements of both the exporting and receiving countries. Accurate documentation from freight forwarders prevents customs delays, fines, and export violations, which are critical for maintaining legal and efficient trade flows.

NEW QUESTION # 77

Which transportation mode is typically used for low-weight, high-value products such as electronics and jewelry?

- A. Rail
- B. Water
- C. Air
- D. Truck

Answer: C

Explanation:

Air transportation provides the fastest transit times and highest security, making it the preferred mode for low-weight, high-value, and time-sensitive products like electronics, pharmaceuticals, or jewelry. According to CLT 4.0, air freight is ideal when delivery speed outweighs cost concerns, as it minimizes exposure to loss or damage through reduced handling and transit duration. However, air is also the most expensive per-unit cost mode, limited by size and weight constraints. Air shipments typically integrate with just-in-time (JIT) and lean supply chains where quick replenishment is vital. Trucking often handles short-haul distribution; water offers low cost but slow speed; and rail suits heavy, bulk freight. Hence, CLT stresses selecting modes based on balancing cost, time, value density, and customer service needs.

NEW QUESTION # 78

Which of the following equipment is used to transfer containers from sea vessels to road or rail vehicles at the marine port?

- A. Transtainer
- B. Grapple Lift
- C. Straddle Carrier
- D. Reach Stacker

Answer: A

Explanation:

In CLT equipment modules, a transtainer (gantry container handling crane, sometimes rail-mounted) is used in port terminals to lift containers off vessels and place them on trucks or rail cars. While straddle carriers and reach stackers also move containers within yards, the transtainer/ship-to-shore cranes are core to vessel-to-landside transfer.

Reference:

NEW QUESTION # 79

Where is the load verification performed?

- A. at the repack area
- B. inbound staging area
- C. outbound staging area
- D. at the picker location

Answer: C

Explanation:

According to CLT "Dispatch and Tracking" guidance, load verification occurs in the outbound staging area, just before loading. This step ensures the right products, quantities, and packaging are assigned to the correct carrier and destination. Load verification compares the physical goods to the shipping manifest, pick list, or Bill of Lading. Conducting this check at the outbound staging area

allows correction of errors before the carrier departs. Performing verification at picker or repack areas would not capture final staging or consolidation issues. The CLT framework stresses that outbound verification is the last internal quality-control barrier against shipping errors, enhancing accuracy and customer satisfaction while reducing costly re-shipments.

NEW QUESTION # 80

The basic elements of HAZMAT training required by OSHA for new HAZMAT employees include the following EXCEPT

- A. safety
- **B. Globally Harmonized System**
- C. function specific
- D. general awareness training

Answer: B

Explanation:

The CLT curriculum aligns with OSHA's HAZWOPER / Hazard Communication training: new hazmat employees require general awareness, safety training, and function-specific training (the tasks they'll perform). GHS (Globally Harmonized System) is a chemical classification/labeling standard incorporated into SDS and labeling, but it is not typically listed as a training "element" separate from those core categories in OSHA's training rubric. Thus GHS is integrated but not a separate training element per se. Reference:

NEW QUESTION # 81

.....

It is known that our CLT valid study guide materials have dominated the leading position in the global market with the decades of painstaking efforts of our experts and professors. There are many special functions about CLT study materials to help a lot of people to reduce the heavy burdens when they are preparing for the CLT Exams for the CLT study practice question from our company can help all customers to make full use of their sporadic time. Must buy our CLT exam questions, you will be able to pass the CLT exam easily.
