

Dumps CWAP-405 Free Download - Free CWAP-405 Download Pdf

The banner features a blue and white geometric background. At the top right is the 'EXAMSLEAD' logo with an open book icon. Below it are three hexagonal badges: '100% SATISFACTION GUARANTEED', 'BEST PRICE GUARANTEED', and 'MONEY BACK GUARANTEE'. The main text reads 'CWNP CWAP-402 Exam' followed by 'Certified Wireless Analysis Professional'. Below this is 'Questions & Answers (Demo Version)' and a URL: <https://examslead.com/CWAP-402-practice-exam-dumps/>. A call to action says 'Buy Full Product Here:' with an 'ADD TO CART \$59' button. On the right, a cartoon boy is opening a cardboard box. The website 'www.examslead.com' is at the bottom left.

It is all due to the top features of Certified Wireless Analysis Professional CWAP-405 exam dumps. These features are three Certified Wireless Analysis Professional exam questions formats, free exam dumps download facility, three months updated Salesforce CWAP-405 exam dumps download facility, affordable price and 100 exams passing money back guarantee. All these Certified Wireless Analysis Professional dumps features are designed to assist you in Certified Wireless Analysis Professional CWAP-405 Exam Preparation and enable you to pass the exam with flying colors.

The exam solutions has three formats and one of them is CWNP CWAP-405 practice exam software (desktop and web-based). These CWNP CWAP-405 practice exams are specially built for the students so that they can evaluate what they have studied. These CWAP-405 Practice Tests are customizable which means that users can adjust the time and questions according to their needs which will teach them how to overcome mistakes so they can pass CWAP-405 exam.

Precise CWAP-405 Training Materials: Certified Wireless Analysis Professional Present Outstanding Exam Dumps - ExamBoosts

In addition to the environment, we also provide simulations of papers. You really have to believe in the simulation paper of our CWAP-405 study materials. With our CWAP-405 practice engine, you can know that practicing the questions and answers are a

enjoyable experience and it is an interactive system. If you are answering the questions rightly, then the result will show right, and if you choose the wrong answer, then it will show wrong. And when you finish the CWAP-405 Exam Questions, the scores will come up as well.

CWNP Certified Wireless Analysis Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

After examining a Beacon frame decode you see the SSID Element has a length of 0. What do you conclude about this frame?

- A. The frame is corrupted
- B. SSID elements always have a length of 0
- C. This is a common attack on WISP backend SQL databases
- **D. The beacon is from a BSS configured to hide the SSID**

Answer: D

Explanation:

If the SSID element has a length of 0 in a Beacon frame decode, it means that the beacon is from a BSS configured to hide the SSID. The SSID element is a part of the Beacon frame that contains the name or identifier of the BSS. The SSID element has two fields: length and value. The length field indicates how many bytes are used for the value field, which contains the actual SSID string. If the length field is 0, it means that there is no value field or SSID string in the element. This is a common technique used by some APs to hide their SSID from passive scanning clients or potential attackers. However, this technique does not provide much security, as there are other ways to discover or reveal the hidden SSID, such as active scanning or capturing probe response or association frames. NEW QUESTION # 28

Given a protocol analyzer can decrypt WPA2-PSK data packets providing the PSK and SSID are configured in the analyzer software. When performing packet capture (in a non-FT environment) which frames are required in order for PSK frame decryption to be possible?

- A. Reassociation
- **B. 4-Way Handshake**
- C. Authentication
- D. Probe Response

Answer: B

Explanation:

The 4-way handshake is the process that establishes the pairwise transient key (PTK) between the client and the AP in WPA2-PSK. The PTK is derived from the PSK, the SSID, and some random numbers exchanged in the handshake frames. The PTK is used to encrypt and decrypt the data frames between the client and the AP. Therefore, in order to decrypt WPA2-PSK data packets, a protocol analyzer needs to capture the 4-way handshake frames and have the PSK and SSID configured in the analyzer software. References:

NEW QUESTION # 29

What is the formula used to calculate the Duration field value in an RTS frame?

- A. RTS Duration field = Data or management to be sent frame duration
- B. RTS Duration field = CTS duration
- C. RTS Duration field = Data or management frame to be sent duration + CTS duration
- **D. RTS Duration field = Data or management frame to be sent duration + CTS duration + one ACK duration + three SIFS**

Answer: D

NEW QUESTION # 30

What is an AIFS?

- A. The shortest period of time a STA can sleep
- B. A form of aggregation performed at the PHY layer based on 802.11e UP values interpreted from DSCP values
- C. A medium access method introduced by 802.11n, but never implemented
- **D. A variable Interframe Space introduced by 802.11e to help prioritize medium access for different Access Categories**

Answer: D

Explanation:

An AIFS is a variable interframe space introduced by 802.11e to help prioritize medium access for different Access Categories (ACs). An interframe space is a period of time that a STA (station) has to wait before attempting to access the medium. An AIFS is a type of interframe space that varies depending on the AC of the traffic. An AC is a logical queue that corresponds to a QoS (Quality of Service) level for different types of traffic. There are four ACs defined by 802.11e: AC_VO (Voice), AC_VI (Video), AC_BE (Best Effort), and AC_BK (Background). Each AC has a different AIFSN (Arbitration Interframe Space Number) value, which determines how long it has to wait before attempting to access the medium. A lower AIFSN value means a higher priority and a shorter waiting time. The other options are not correct, as they do not describe what an AIFS is. An AIFS is not a medium access method introduced by 802.11n, but never implemented, as it is part of the 802.11e standard and widely used in QoS-enabled WLANs. An AIFS is not a form of aggregation performed at the PHY layer based on 802.11e UP values interpreted from DSCP values, as aggregation is a technique that combines multiple frames into one larger frame to improve efficiency and throughput, not prioritization or medium access. An AIFS is not the shortest period of time a STA can sleep, as sleeping is a power saving mode that allows a STA to conserve battery power by periodically turning off its radio, not accessing the medium. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 7: QoS Analysis, page 194-195

NEW QUESTION # 31

You are evaluating a protocol capture file in Wireshark. The following filter is applied:

wlan_radio.11ac.bandwidth - - 4

What kind of frames are displayed?

- A. Only 40 MHz frames
- **B. Only 80 MHz frames**
- C. Only frames supporting 4 spatial streams
- D. Only frames supporting 4 radio chains

Answer: B

NEW QUESTION # 32

.....

To practice for a Certified Wireless Analysis Professional in the software (free test), you should perform a self-assessment. The CWNP CWAP-405 practice test software keeps track of each previous attempt and highlights the improvements with each attempt. The CWNP CWAP-405 Mock Exam setup can be configured to a particular style & arrive at unique questions.
