

Dumps FCP_FAZ_AN-7.4 Download & FCP_FAZ_AN-7.4 Reliable Braindumps Book

BTW, DOWNLOAD part of DumpStillValid FCP_FAZ_AN-7.4 dumps from Cloud Storage: <https://drive.google.com/open?id=1PrHQI-gChfArA4AIKTp5r7LvRXsGpVki>

Our FCP_FAZ_AN-7.4 test prep embrace latest information, up-to-date knowledge and fresh ideas, encouraging the practice of thinking out of box rather than treading the same old path following a beaten track. As the industry has been developing more rapidly, our FCP_FAZ_AN-7.4 exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest FCP_FAZ_AN-7.4 Exam practices. What's more, we won't charge you in one-year cooperation; if you are pleased with it, we may have further cooperation. We will inform you of the latest preferential activities about our FCP_FAZ_AN-7.4 test braindumps to express our gratitude towards your trust.

Maybe you have desired the FCP_FAZ_AN-7.4 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our FCP_FAZ_AN-7.4 study materials will change your mind. With our FCP_FAZ_AN-7.4 exam questions, you will soon feel the happiness of study. Just look at the three different versions of our FCP_FAZ_AN-7.4 learning quiz: the PDF, Software and APP online which can apply to study not only on the paper, but also can apply to study on IPAD, phone or laptop.

FCP_FAZ_AN-7.4 Reliable Braindumps Book - Reliable FCP_FAZ_AN-7.4 Exam Materials

At DumpStillValid, we stand behind our Fortinet FCP_FAZ_AN-7.4 Exam Questions and offer a money-back guarantee in the event of failure. We are confident that our FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam questions and practice test engine will provide you with all the information and tools you need to pass the exam with flying colors. Plus, for a limited time, we are offering a 20% discount on your purchase. Don't wait – invest in your future and advance your career with DumpStillValid today.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q28-Q33):

NEW QUESTION # 28

What statements are true regarding the "store and upload" log transfer option between FortiAnalyzer and FortiGate? (Choose three.)

- A. Disk logging is enabled by default on the FortiGate.
- **B. Only FortiGate models with hard disks can send logs to FortiAnalyzer using the store and upload option.**
- **C. Disk logging is enabled on the FortiGate through the CLI only.**
- **D. Both secure communications methods (SSL and IPsec) allow the store and upload option.**
- E. All FortiGates can send logs to FortiAnalyzer using the store and upload option.

Answer: B,C,D

NEW QUESTION # 29

What is the purpose of the following CLI command?

```
# configure system global
    set log-checksum md5
end
```

- **A. To add a log file checksum**
- B. To add the MD's hash value and authentication code
- C. To add a unique tag to each log to prove that it came from this FortiAnalyzer
- D. To encrypt log communications

Answer: A

NEW QUESTION # 30

What is the purpose of running the command `diagnose sql status sqlreportd`?

- A. To list the current SQL processes running
- **B. To display the SQL query connections and hcache status**
- C. To identify the database log insertion status
- D. To view a list of scheduled reports

Answer: B

Explanation:

The command `diagnose sql status sqlreportd` is used in FortiAnalyzer to obtain specific information about the SQL reporting process and caching status. Here's what this command accomplishes and an analysis of each option:

Command Functionality:

`sqlreportd` is the FortiAnalyzer daemon responsible for managing SQL-based reporting processes.

The `diagnose sql status sqlreportd` command provides information on active SQL query connections and the hcache (historical cache) status, which helps in monitoring and troubleshooting SQL report generation.

Option Analysis:

Option A - To View a List of Scheduled Reports:

This option is incorrect because the command does not list scheduled reports. Instead, it focuses on SQL reporting processes and cache details.

Option B - To List the Current SQL Processes Running:

While the command may show active SQL connections, its primary focus is not a detailed list of all SQL processes but rather the connections and cache status for reporting.

Option C - To Display the SQL Query Connections and hcache Status:

This is correct. The command specifically provides information on SQL query connections related to the reporting process (`sqlreportd`) and displays the hcache status.

Option D - To Identify the Database Log Insertion Status:

This is incorrect. The command does not provide details on log insertion status. Log insertion status is typically monitored through different diagnostic commands focused on database processes and log handling.

Conclusion:

Correct Answer: C. To display the SQL query connections and hcache status. This command is used to monitor SQL reporting activities and cache status, aiding in the analysis of report generation performance and connection health.

Reference:

FortiAnalyzer 7.4.1 documentation on SQL diagnostic commands, particularly those related to reporting (sqlreportd) and caching mechanisms.

NEW QUESTION # 31

Exhibit.

FortiAnalyzer partial configuration output:

FortiAnalyzer1# get system status Platform Type : FAZVM64-KVM Platform Full Name : FortiAnalyzer-VM64-KVM Version : v7.4.1-build2308 230831 (GA) Serial Number : FAZ-VM0000065040 BIOS version : 04000002 Hostname : FortiAnalyzer1 Max Number of Admin Domains : 5 Admin Domain Configuration : Enabled FIPS Mode : Disabled HA Mode : Stand Alone Branch Point : 2308 Release Version Information : GA Time Zone : (GMT-8:00) Pacific Time (US & Canada) Disk Usage : Free 43.60GB, Total 58.80GB File System : Ext4 License Status : Valid FortiAnalyzer1# get system global adom-mode : normal adom-select : enable adom-status : enable console-output : enable country-flag : standard enc-algorithm : enable ha-member-auto-grouping : high hostname : enable log-checksum : FortiAnalyzer1 log-forward-cache-size : md5 log-mode : 5 longitude : analyzer max-aggregation-tasks : {null} max-running-reports : 0 : 1 : tsv1.2 : disable : tsv1.3 tsv1.2 : 2000 : tsv1.3 tsv1.2	FortiAnalyzer2# get system status Platform Type : FAZVM64-KVM Platform Full Name : FortiAnalyzer-VM64-KVM Version : v7.4.1-build2308 230831 (GA) Serial Number : FAZ-VM0000065041 BIOS version : 04000002 Hostname : FortiAnalyzer2 Max Number of Admin Domains : 5 Admin Domain Configuration : Enabled FIPS Mode : Disabled HA Mode : Stand Alone Branch Point : 2308 Release Version Information : GA Time Zone : (GMT-8:00) Pacific Time (US & Canada) Disk Usage : Free 45.75GB, Total 58.80GB File System : Ext4 License Status : Valid FortiAnalyzer2# get system global adom-mode : normal adom-select : enable adom-status : enable console-output : enable country-flag : standard enc-algorithm : enable ha-member-auto-grouping : high hostname : enable log-checksum : FortiAnalyzer2 log-forward-cache-size : md5 log-mode : 5 longitude : analyzer max-aggregation-tasks : {null} max-running-reports : 0 : 1 : tsv1.2 : disable : tsv1.3 tsv1.2 : 2000 : tsv1.3 tsv1.2	FortiAnalyzer3# get system status Platform Type : FAZVM64-KVM Platform Full Name : FortiAnalyzer-VM64-KVM Version : v7.4.1-build2308 230831 (GA) Serial Number : FAZ-VM0000065042 BIOS version : 04000002 Hostname : FortiAnalyzer3 Max Number of Admin Domains : 5 Admin Domain Configuration : Enabled FIPS Mode : Disabled HA Mode : Stand Alone Branch Point : 2308 Release Version Information : GA Time Zone : (GMT-8:00) Pacific Time (US & Canada) Disk Usage : Free 53.06GB, Total 79.80GB File System : Ext4 License Status : Valid FortiAnalyzer3# get system global adom-mode : normal adom-select : enable adom-status : enable console-output : standard country-flag : enable enc-algorithm : high ha-member-auto-grouping : enable hostname : FortiAnalyzer3 log-checksum : md5 log-forward-cache-size : 5 log-mode : analyzer longitude : {null} max-aggregation-tasks : 0 max-running-reports : 5 : tsv1.2 : disable : tsv1.3 tsv1.2 : 2000 : tsv1.3 tsv1.2

Based on the partial outputs displayed, which devices can be members of a FortiAnalyzer Fabric?

- A. All devices listed can be members.
- B. FortiAnalyzer2 and FortiAnalyzer3
- C. FortiAnalyzer1 and FortiAnalyzer3
- D. FortiAnalyzer1 and FortiAnalyzer2

Answer: A

Explanation:

In a FortiAnalyzer Fabric, devices can participate in a cluster or grouping if they meet specific compatibility criteria. Based on the outputs provided, let's evaluate these criteria:

* Version Compatibility:

* All three devices, FortiAnalyzer1, FortiAnalyzer2, and FortiAnalyzer3, are running version v7.

4.1-build0238, which is the same across the board. This version alignment is crucial because FortiAnalyzer Fabric requires that devices run compatible firmware versions for seamless communication and management.

* Platform Type and Configuration:

* All three devices are configured as Standalone in the HA mode, which allows them to operate independently but does not restrict their participation in a FortiAnalyzer Fabric. Each device is also on the FAZVM64-KVM platform type, ensuring hardware compatibility.

* Global Settings:

* Key settings such as adm-mode, adm-status, and adom-mode are consistent across all devices (adm-mode: normal, adm-status: enable, adom-mode: normal), which aligns with requirements for fabric integration and role assignment flexibility.

* Each device also has the log-forward-cache-size set, which is relevant for forwarding logs within a fabric environment.

Based on the above analysis, all devices (FortiAnalyzer1, FortiAnalyzer2, and FortiAnalyzer3) meet the requirements to be part of a FortiAnalyzer Fabric.

References: FortiAnalyzer 7.4.1 documentation outlines that devices within a FortiAnalyzer Fabric should be on the same or compatible firmware versions and hardware platforms, and they must be configured for integration. Given that all devices match the version, platform, and mode criteria, they can all be part of the FortiAnalyzer Fabric.

NEW QUESTION # 32

What is the purpose of the following CLI command?

```
# configure system global
  set log-checksum md5
end
```

- A. To add a log file checksum
- B. To add the MD's hash value and authentication code
- C. To add a unique tag to each log to prove that it came from this FortiAnalyzer
- D. To encrypt log communications

Answer: A

NEW QUESTION # 33

.....

With our motto "Sincerity and Quality", we will try our best to provide the big-league FCP_FAZ_AN-7.4 exam questions for our valued customers like you. Our company emphasizes the interaction with customers on our FCP_FAZ_AN-7.4 Study Guide. We not only attach great importance to the quality of FCP - FortiAnalyzer 7.4 Analyst exam, but also take the construction of a better after-sale service on our FCP_FAZ_AN-7.4 learning materials into account.
