2025 Latest NewPassLeader NCS-Core PDF Dumps and NCS-Core Exam Engine Free Share: <https://drive.google.com/open?id=1tu1sFmLXZbT7qzGDAJTBmoWvgcRiKFSu>

There is no doubt that it is very difficult for most people to pass the exam and have the certification easily. If you are also weighted with the trouble about a NCS-Core certification, we are willing to soothe your trouble and comfort you. We have compiled the NCS-Core test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our NCS-Core Exam Questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our NCS-Core latest question.

Being respected and gaining a high social status maybe what you always long for. But if you want to achieve that you must own good abilities and profound knowledge in some certain area. Passing the NCS-Core certification can prove that and help you realize your goal and if you buy our NCS-Core Quiz prep you will pass the NCS-Core exam successfully. Our product is compiled by experts and approved by professionals with years of experiences. You can download and try out our latest NCS-Core quiz torrent freely before your purchase.

## Nutanix NCS-Core Test Answers - Valid Braindumps NCS-Core Sheet

You have the option to change the topic and set the time according to the actual Nutanix Certified Services Core Infrastructure Professional (NCS-Core) exam. The Nutanix Certified Services Core Infrastructure Professional (NCS-Core) practice questions give you a feeling of a real exam which boost confidence. Practice under real Nutanix Certified Services Core Infrastructure Professional (NCS-Core) exam situations is an excellent way to learn more about the complexity of the Nutanix Certified Services Core Infrastructure Professional (NCS-Core) exam dumps.

The NCS-Core certification exam is intended for IT professionals who are responsible for designing, implementing and maintaining Nutanix solutions. NCS-Core exam covers the essential concepts of Nutanix's core infrastructure services, including storage, networking and virtualization. Candidates who Pass NCS-Core Exam will have the skills and knowledge required to implement and manage Nutanix solutions in enterprise environments.

## Nutanix Certified Services Core Infrastructure Professional Sample Questions (Q68-Q73):

### NEW QUESTION # 68

A consultant and customer agree on a scope of services regarding the deployment of a new Nutanix cluster. Which two products does this scope apply to? (Choose two.)

- **A. Foundation**
- B. Flow
- C. X-Ray
- **D. Prism Central**

**Answer: A,D**

Explanation:

The scope of services for the deployment of a new Nutanix cluster would apply to both Foundation and Prism Central. Foundation is the initial software used for deploying Nutanix nodes and creating clusters, essential for setting up the environment. Prism Central is used for managing multiple clusters and is integral to the operational scope of the service, providing centralized management capabilities. References: Nutanix Bible, Nutanix University NCS-Core 6.8 learning materials

#### NEW QUESTION # 69

After the migration, some SQL queries take longer to execute than prior to migration.

The following SQL best practices were applied while creating the SQL VM on Nutanix:

\*8 vDisks per SQL server VM

\*Database and Log files on separate vDisk

\*2 TempDB database drives and 1 TempDB log drive

What should the administrator do to improve the SQL Server performance?

- A. Redistribute existing data by creating additional database files and disable autogrowth
- B. Create multiple TempDB data files and enable autogrowth
- **C. Redistribute existing data by creating additional database file and enable autogrowth**
- D. Create multiple SQL log files and disable autogrowth

**Answer: C**

#### NEW QUESTION # 70

A consultant runs the Foundation Applet and discovers all the nodes. The consultant wants to use the latest version of Foundation for imaging for support purposes and to cover the latest hardware and software hypervisor support.

What should the consultant do to upgrade Foundation on a node?

- A. Use crash cart and manually upgrade Foundation files on one node.
- B. Use the Foundation Applet to upgrade Foundation on a single node.
- C. Use latest version of Foundation to reimage all the nodes.
- **D. Use the Foundation VM to upgrade Foundation on all nodes.**

**Answer: D**

Explanation:

To ensure that the Foundation Applet is up-to-date across all nodes, the best approach is to use the Foundation VM. The Foundation VM allows consultants to manage and upgrade Foundation on all nodes centrally. This method avoids the necessity of manual upgrades on each node individually, thus ensuring a more efficient and error-free process, aligning with Nutanix's best practices for scalability and management of infrastructure.

References: The Nutanix Bible, the Nutanix University's NCS-Core 6.8 materials, and official Nutanix documentation on the Foundation VM.

To ensure the latest version of Foundation is used for imaging to support the latest hardware and software hypervisor configurations, the consultant should utilize the Foundation VM. This tool allows for upgrading the Foundation on all nodes simultaneously, ensuring consistency across the cluster. It streamlines the process by leveraging the existing Foundation infrastructure rather than requiring manual updates via a crash cart or the limited capabilities of the Foundation Applet for single node upgrades.

\* Nutanix Foundation Documentation: <https://portal.nutanix.com>

\* Nutanix Upgrade Guide: Nutanix Foundation Upgrade Process

#### NEW QUESTION # 71

A consultant deployed a Nutanix Files cluster using separate networks for client and storage.

For testing a SMB standard share, a VM has been deployed on storage network. However, the consultant cannot access the share.

What is the cause of the issue?

- A. The CVM network segmentation is configured.
- B. Clients on the same subnet as the storage network can only access the distributed shares.

- C. An iSCSI Data Services IP is not configured for the cluster.
- **D. Clients on the same subnet as the storage network cannot access the shares.**

**Answer: D**

Explanation:

If a VM deployed on the storage network cannot access a SMB standard share, the likely issue is that:

\* Clients on the same subnet as the storage network cannot access the shares: This scenario typically occurs due to network segmentation policies or firewall rules that restrict access to the storage network from clients within the same subnet, intended to segregate traffic types for security and performance reasons.

References:

\* Nutanix Bible (<https://www.nutanixbible.com>), specifically sections on network segmentation and Nutanix Files configurations.

\* Nutanix Technical Documentation on Nutanix Files, which covers network configuration and troubleshooting issues related to file access.

## NEW QUESTION # 72

A consultant is attempting to deploy an AHV cluster, but Foundation did not discover any factory-imaged nodes. The consultant then uses the crash cart script to configure all IP addresses manually.

What step is required for the consultant to continue cluster creation?

- A. Create a new cluster by using the flag `--multicast_static-group`.
- B. Use the cluster `-s IP1, IP2, IP3, IPn create` command to create the cluster.
- C. Create a new cluster, bypassing discovery, by using the flag `--skip_discovery`.
- **D. Remove the VLAN `igmp unknown-mcast-flood` option from the switch configuration.**

**Answer: D**

Explanation:

Foundation uses multicast-based discovery to detect nodes. If nodes are not discovered, one common issue is that multicast traffic is being blocked or restricted by the switch configuration.

\* Option D (Removing IGMP unknown-mcast-flood restriction) ensures multicast packets are forwarded properly.

\* Option A (Manually creating cluster) is possible but does not address the root cause.

\* Option B (Skipping discovery) is not a valid Foundation option.

\* Option C (Using `multicast_static-group`) does not resolve multicast filtering issues.

## NEW QUESTION # 73

.....

In actuality, the test center around the material is organized flawlessly for self-review considering the way that the competitors who are working in Nutanix working conditions don't get the sufficient opportunity to go to classes for Nutanix Certified Services Core Infrastructure Professional certification. Thusly, they need to go for self-study and get the right test material to fire scrutinizing up for the Nutanix Certified Services Core Infrastructure Professional (NCS-Core) exam. By utilizing Nutanix NCS-Core dumps, they shouldn't stress over any additional assistance with that.
