

# Dumps Oracle 1z1-076 Questions, Pass 1z1-076 Rate

P.S. Free 2025 Oracle 1z1-076 dumps are available on Google Drive shared by LatestCram: <https://drive.google.com/open?id=1MzICQDPcZl4vtrzcOT6hKMr-lc693yG2>

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the 1z1-076 practice exam. Our 1z1-076 exam dumps are indispensable tool to pass it with high quality and low price. By focusing on how to help you effectively, we encourage exam candidates to buy our 1z1-076 practice test with high passing rate up to 98 to 100 percent all these years. Our Oracle exam dumps almost cover everything you need to know about the exam. As long as you practice our 1z1-076 Test Question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass 1z1-076 practice exam without any stress.

LatestCram also offers a demo version of the 1z1-076 exam dumps for free. This way you can easily evaluate the validity of the 1z1-076 prep material before buying it. Downloading a free demo will remove your doubts about purchasing the Oracle 1z1-076 Questions. Most of the brands that offer Oracle Database 19c: Data Guard Administration study material provide it at high rates.

## Oracle 1z1-076 Actual Exam Dumps Materials are the best simulate product - LatestCram

If you face any problem while using the offline or online software Oracle Database 19c: Data Guard Administration (1z1-076) practice exam of LatestCram, contact our customer service team. Our team of experts is available 24/7 for your assistance while using updated 1z1-076 Exam Prep material. Many takers of the Oracle Database 19c: Data Guard Administration (1z1-076) practice test suffer from money loss because it introduces new changes in the content of the test.

## Oracle Database 19c: Data Guard Administration Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Which THREE statements are true about Far Sync instances?

- A. They work with any protection level.
- B. A primary database can ship redo directly to multiple Far Sync instances.
- C. They enable standby databases to be configured at remote distances from the primary without impacting performance on the primary.
- D. The Data Guard Broker must be used to deploy and manage Far Sync instances.
- E. They use an spfile, a standby controlfile, and standby redo logs.

**Answer: B,C,D**

Explanation:

Far Sync instances are a feature of Oracle Data Guard designed to support zero data loss protection over long distances:

\* The Data Guard Broker must be used to deploy and manage Far Sync instances (A): Data Guard Broker simplifies the

deployment and management of Far Sync instances, which are an integral part of zero data loss protection configurations.

\* They enable standby databases to be configured at remote distances from the primary without impacting performance on the primary (C): Far Sync instances are designed to receive redo from the primary database and then forward it to a remote standby database, thereby avoiding any performance

\* impact on the primary database itself.

\* A primary database can ship redo directly to multiple Far Sync instances (E): A primary database can be configured to send redo logs to more than one Far Sync instance, which can then forward the redo to their respective remote standby databases. References:

#### NEW QUESTION # 66

Which TWO are TRUE about offloading backups to a physical standby database in a Data Guard environment?

- A. The standby database can not be registered in an RMAN catalog if the primary database has not been registered.
- B. The standby database must be registered in an RMAN catalog before the primary database has been registered.
- C. Backups of the standby control file taken while connected to the catalog where the database is registered, may be used to restore the control file on the primary database.
- D. The standby database must be registered in an RMAN catalog after the primary database has been registered.

**Answer: C,D**

Explanation:

In a Data Guard environment, offloading backups to a physical standby database has certain requirements:

\* A: Once the primary database is registered in an RMAN catalog, the standby database can also be

\* registered. This allows RMAN to manage backups coherently across both databases and leverage the standby database for backup purposes without interfering with the primary database's workload.

\* C: Backups of the standby control file taken while connected to the catalog where the database is registered can be used to restore the control file on the primary database. This ensures that backup metadata is consistent across the Data Guard configuration.

Options B and D are incorrect because there is no strict requirement for the order in which the primary and standby databases must be registered in an RMAN catalog. However, it is a common practice to register the primary database first.

References: The Oracle Database Backup and Recovery User's Guide provides detailed procedures on how to manage RMAN backups in a Data Guard environment, including offloading backups to a standby database.

#### NEW QUESTION # 67

Which THREE are true about using flashback database in a Data Guard environment?

- A. You can use it when real-time apply is enabled in case the phylyt may not be used to flash back a primary database after a failover to a logical standby.
- B. It may not be used to flash back a primary database after a failover to a physical standby.
- C. It may be used to flash back a physical standby that receives redo from a far sync instance.
- D. When a flashback database operation is performed on a primary database, a physical standby database is also flashed back automatically.
- E. When a flashback database operation is performed on a primary database, a logical standby database is also flashed back automatically.
- F. You can use it when real-time apply is enabled in case the physical standby suffers from logical corruption.

**Answer: B,C,F**

#### NEW QUESTION # 68

Which FOUR database parameters might be affected by or influence the creation of standby databases?

- A. ARCHIVE\_LAG\_TARGET
- B. DB\_NAME
- C. COMPATIBLE
- D. FALSERVER
- E. db\_file\_name\_convert

- **F. STANDBY\_ARCHIVE\_DEST**

**Answer: B,C,E,F**

Explanation:

DB\_NAME (A): The name of the database, which should remain consistent across the primary and standby databases.

db\_file\_name\_convert (C): This parameter helps define the mapping of data file names from the primary to the standby database, which is crucial during the creation and operation of a standby database.

COMPATIBLE (D): The compatibility level can influence the features that can be used on the standby database and must be consistent with or higher than that of the primary database, especially after upgrades.

STANDBY\_ARCHIVE\_DEST (F): This parameter specifies the destination of archived redo log files on the standby database, which is important for log transport and apply services.

### NEW QUESTION # 69

Your expertise is requested for these customer requirements:

The Data Guard environment must be in maximum protection mode.

Reports must be offloaded to a physical standby database.

There must be no lag between the primary and standby databases that affect the reports produced.

The primary database must be resilient in case of a single network failure.

Which solution is correct for these requirements?

- **A. Two standby databases, at least one of them a physical standby with Real-Time Query enabled and the STANDBY\_MAX\_DATA\_DELAY parameter set to zero, receiving redo from the primary with synchronous transport**
- B. Two physical standby databases with Real-Time Query enabled, receiving redo from the primary with the LOG\_ARCHIVE\_DEST\_n attributes SYNC NOAFFIRM to minimize the performance impact on the primary
- C. One physical standby database with Real-Time Query enabled, receiving redo from two Far Sync instances that are connected to the primary
- D. Two standby databases, at least one of them a physical standby with Real-Time Query enabled and the STANDBY\_MAX\_DATA\_DELAY parameter set to zero, receiving redo from the primary with asynchronous transport
- E. One physical standby database with Real-Time Query enabled and STANDBY\_MAX\_DATA\_DELAY parameter set to zero, receiving redo from the primary with synchronous transport

**Answer: A**

### NEW QUESTION # 70

.....

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the 1z1-076 certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a 1z1-076 certification can help them find a better job. Our 1z1-076 test guides have a higher standard of practice and are rich in content. If you are anxious about how to get 1z1-076 Certification, considering purchasing our 1z1-076 study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification. Our 1z1-076 qualification test closely follow changes in the exam outline and practice.

**Pass 1z1-076 Rate:** <https://www.latestcram.com/1z1-076-exam-cram-questions.html>

Our designed 1z1-076 braindumps are not only authentic but approved by the expert Oracle Database 19c faculty, And we can help you get success and satisfy your eager for 1z1-076 certificate, All 1z1-076 study materials you should know are written in them with three versions to choose from: the PDF, Software and APP online versions, So, it is very important to choose a Oracle 1z1-076 exam prep material that helps you to practice actual Oracle 1z1-076 questions.

Listening to Radio, This data type should never be used for precise values, such as currency, Our designed 1z1-076 braindumps are not only authentic but approved by the expert Oracle Database 19c faculty.

**Complete Dumps 1z1-076 Questions | Amazing Pass Rate For 1z1-076 Exam |**

## Correct 1z1-076: Oracle Database 19c: Data Guard Administration

And we can help you get success and satisfy your eager for 1z1-076 certificate, All 1z1-076 study materials you should know are written in them with three versions to choose from: the PDF, Software and APP online versions.

So, it is very important to choose a Oracle 1z1-076 exam prep material that helps you to practice actual Oracle 1z1-076 questions. Here, I think it is a good choice to pass the exam at the first time with help of the Oracle Database 19c: Data Guard Administration actual questions & answer rather than 1z1-076 to take the test twice and spend more money, because the money spent on the Oracle Database 19c: Data Guard Administration exam dumps must be less than the actual exam fees.
