SAP C-S4CPB-2508 Exam Syllabus Topics:

Topic	Details

Topic 1	• System Landscapes and Identity Access Management: This section of the exam measures the skills of Implementation Consultants and covers the understanding of SAP system landscapes, tenants, and environments. It also assesses knowledge of identity and access management to ensure secure user provisioning, authentication, and role assignments.
Topic 2	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops:
Topic 3	• Data Migration and Business Process Testing: This section of the exam measures skills of Business Process Experts and focuses on preparing, migrating, and validating business data within SAP S • 4HANA Cloud. It also includes setting up and executing business process testing to ensure smooth operations after go-live.
Topic 4	• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of Implementation Consultants and covers the fundamental understanding of cloud computing principles along with the basics of SAP S • 4HANA Cloud ERP. It ensures that candidates know the value of cloud solutions, the key concepts of ERP in the cloud, and how SAP's offering supports digital transformation for businesses.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q33-Q38):

NEW QUESTION # 33

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. System consistency checks
- B. Added partner content
- C. The selected deployment target
- D. The selected scope

Answer: C,D

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 34

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Completed"

- B. When the project status is "Finished"
- C. When the project status is "Not Started"
- D. When the project status is "In Progress"

Answer: B

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings. References = The Migration Project Screen, Migrating Data to the SAP S/4HANA System

NEW QUESTION # 35

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. Core Data Services
- B. SAP Fiori
- C. SAP Business Suite
- D. SAP HANA

Answer: A

Explanation:

Core Data Services (CDS) is a layer of SAP S/4HANA that provides a universal language to read and process data across different applications. CDS is based on SQL and extends it with domain-specific features and annotations. CDS views are reusable and can be consumed by various interfaces such as SAP Fiori, OData, or SQL. CDS views also enable the definition of semantic data models that expose the business logic and meaning of the underlying data sources. References = [SAP S/4HANA Cloud Public Edition - Introduction to Core Data Services], [SAP S/4HANA Cloud Public Edition - Core Data Services in SAP S/4HANA Cloud]

NEW QUESTION # 36

You want to restrict end user activities for an application.

Where would you look up the business catalog(s) that grant access to the app?

- A. In the SAP Fiori Apps Reference Library
- B. In the Define Your Scope app
- C. In the Configure Your Solution app
- D. In the App Finder app

Answer: A

NEW QUESTION # 37

To which partner role does the IT Contact first assign access permission for SAP Cloud ALM?

- A. LoB configuration expert
- B. Communication contact
- C. Project manager
- D. Lead configuration expert

Answer: C

Explanation:

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the

* **Project manager:** The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.
