SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q51-Q56):

NEW QUESTION # 51

When do you use the SAP Fiori app "Launchpad App Manager?" Note: There are 2 correct answers to this question.

- A. To view where launchpad content is used
- **B. To create custom catalogs**
- **C. To maintain technical catalogs**
- D. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs

Answer: B,C

Explanation:

The "Launchpad App Manager" Fiori app in SAP S/4HANA Cloud Private Edition is used to manage Fiori Launchpad content, such as catalogs and tiles. Let's evaluate its uses:

- * A. To create custom catalogs: This is correct. The Launchpad App Manager allows administrators to create custom catalogs, grouping Fiori app tiles for specific roles or purposes, enhancing user access in the Launchpad.
- * B. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs: This is incorrect. Business catalogs are managed via the "Maintain Business Roles" app, not the Launchpad App Manager. The latter focuses on technical and custom catalogs, not business catalog references.
- * C. To maintain technical catalogs: This is correct. The app is used to maintain technical catalogs, which contain references to Fiori apps and their configurations (e.g., OData services). These catalogs are then linked to business roles.
- * D. To view where launchpad content is used: This is incorrect. Viewing usage of Launchpad content (e.g., where tiles are assigned) is handled by tools like the "Launchpad Content Manager" or role analysis, not the Launchpad App Manager's primary function.

In summary, the Launchpad App Manager is used for A (To create custom catalogs) and C (To maintain technical catalogs).

NEW QUESTION # 52

What are some prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- **A. You have to create the migration projects.**
- B. You have to create the migration objects.
- C. You have to activate a certain business process.

- D. You have to set up the integration.

Answer: A,D

NEW QUESTION # 53

What is in scope of Fit-to-Standard workshops in a new implementation? Note: There are 2 correct answers to this question.

- A. Teaching the customer LOB experts how to navigate end-to-end business processes
- B. Providing feedback if changes are necessary to make the process fit the customer's needs
- C. Estimating relative effort of the planned changes
- D. Completing the user acceptance testing on the business processes

Answer: A,B

NEW QUESTION # 54

In which system do you carry out business process testing before any changes or extensions are transported to the production system?

- A. Trial system
- B. Development system
- C. Sandbox system
- D. Quality system

Answer: D

NEW QUESTION # 55

You have assigned a business role to an end user who has been granted access to only one app. The app does NOT show up on the user's launchpad and you are not available to support.

What can the user do?

- A. Assign a launchpad space to the business role.
- B. Create a page and assign it to the launchpad space.
- C. Assign a different business role that provides access.
- D. Use the search function to find the app.

Answer: D

Explanation:

When an end user is assigned a business role granting access to only one app, but the app does not appear on their SAP Fiori launchpad, the user can utilize the search function to locate and access the app.

Option A: Assign a different business role that provides access.

This option is not feasible for the end user, as assigning business roles typically requires administrative privileges.

Option B: Create a page and assign it to the launchpad space.

This option is not applicable, as creating pages and assigning them to launchpad spaces are tasks performed by administrators, not end users.

Option C: Use the search function to find the app.

This option is correct. The SAP Fiori launchpad includes a search function that allows users to find and access apps directly, even if the apps are not visible on their launchpad.

Option D: Assign a launchpad space to the business role.

This option is not within the end user's capabilities, as assigning launchpad spaces to business roles requires administrative access.

In summary, if an app does not appear on the user's launchpad, the user can use the search function to find and access the app directly.
