#### NEW QUESTION # 42

What does the Side-by-Side extensibility option mean?

- A. There are two SAP S/4HANA instances: one for standard code and another for custom developments
- B. Extending SAP S/4HANA using SAP ABAP Development Workbench.
- C. SAP S/4HANA extensions are context-aware and focused on tight integration.
- **D. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.**

**Answer: D**

Explanation:

Step 1 - Understanding the Question

The question refers to the Side-by-Side extensibility concept in SAP S/4HANA Cloud, which is one of the three extensibility approaches defined by SAP:

- \* In-App extensibility- Extensions made directly inside the SAP S/4HANA system using key-user tools.
- \* Classic extensibility- Custom developments using ABAP in the SAP core system.
- \* Side-by-Side extensibility- Building and running extensions outside the SAP S/4HANA core on the SAP Business Technology Platform (BTP).

Step 2 - Evaluate Each Option

A). Extending SAP S/4HANA using SAP ABAP Development Workbench

- \* This is classic extensibility, not Side-by-Side.
- \* It modifies the core ABAP stack directly, which contradicts the clean-core principle for cloud environments.

Result: Incorrect.

B). Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub

- \* Side-by-Side extensibility leverages SAP BTP for building external applications and services that communicate with SAP S/4HANA using standard APIs and events.
- \* The APIs used for these extensions are published on the SAP Business Accelerator Hub (formerly API Business Hub).
- \* This approach allows creating custom UIs, workflows, or integrations without modifying the core system.

Result: Correct - This defines the Side-by-Side extensibility model.

C). There are two SAP S/4HANA instances: one for standard code and another for custom developments

- \* SAP does not create a separate instance for custom code in Side-by-Side extensibility.
- \* Extensions are built externally on SAP BTP, not as a second SAP S/4HANA instance.

Result: Incorrect.

D). SAP S/4HANA extensions are context-aware and focused on tight integration

- \* This describes the In-App extensibility model, where extensions are embedded within the core system and maintain contextual awareness.

Result: Incorrect.
