HPE Compute Solutions Interactive Testing Engine & HPE0-S59 Latest Training Guide & HPE Compute Solutions Self-Paced Training

You must want to receive our HPE0-S59 practice questions at the first time after payment. Don't worry. As long as you finish your payment, our online workers will handle your orders of the HPE0-S59 study materials quickly. The whole payment process lasts a

few seconds. And if you haven't received our HPE0-S59 Exam Braindumps in time or there are some trouble in opening or downloading the file, you can contact us right away, and our technicals will help you solve it in the first time.

HPE Compute Solutions Sample Questions (Q87-Q92):

NEW QUESTION # 87

Which statement about a new HPE SimpliVity deployment is true?

- A. All new HPE SimpliVity models are software optimized
- B. All new HPE SimpliVity models are based on mid CPUs
- C. A new HPE SimpliVity node can be a member of multiple clusters
- D. New HPE SimpliVity deployments gives customer flexible choice of hypervisor

Answer: D

Explanation:

New HPE SimpliVity deployments offer customers the flexibility to choose between different hypervisors, such as VMware vSphere and Microsoft Hyper-V. This flexibility allows customers to select the hypervisor that best fits their existing infrastructure and operational preferences.

NEW QUESTION # 88

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components. Put the steps on the left into the correct order on the right to perform this task.

The interface shows a list of steps on the left and a numbered list on the right for ordering. The steps are:

- Enter show health command.
- Confirm health status.
- Open SSH client.
- Open session to RMC.

The numbered list on the right is:

- 1
- 2
- 3
- 4

Answer:

Explanation:

The interface shows the correct order of steps for verifying health status. The steps are:

- 1 Open SSH client.
- 2 Open session to RMC.
- 3 Enter show health command.
- 4 Confirm health status.

* Open SSH client: Begin by opening an SSH client on your computer. This client will be used to establish a secure connection to the Rack Management Controller (RMC).

* Open session to RMC: Use the SSH client to open a session to the RMC. The RMC is the central management component for the HPE Superdome Flex system.

* Enter show health command: Once connected to the RMC, enter the show health command. This command will provide detailed information about the health status of various components within the Superdome Flex system.

* Confirm health status: Review the output of the show health command to confirm the health status of the Superdome Flex components. This step ensures that all components are functioning correctly and identifies any potential issues.

NEW QUESTION # 89

You modified a logical interconnect group that is used to configure logical interconnects in five different logical enclosures. What will be the impact of that change?

- A. All logical interconnects configured using this logical interconnect group will be automatically updated
- **B. All logical interconnects configured using this logical Interconnect group will report inconsistency**
- C. All physical interconnects from affected logical interconnects will be placed in a maintenance mode
- D. All physical interconnects from the affected logical interconnects must be rebooted to activate the new configuration

Answer: B

Explanation:

When a logical interconnect group (LIG) that is used to configure logical interconnects in multiple logical enclosures is modified, all logical interconnects configured using this LIG will report inconsistency. This is because the configuration of the logical interconnects will no longer match the new settings defined in the modified LIG, and the inconsistencies must be resolved to ensure the configurations are synchronized.

NEW QUESTION # 90

Your customer is implementing an HPE Synergy solution based on three frames. Click each of the ports that can be used to connect satellite modules.

Answer:

Explanation:

Explanation:

The QSFP+ ports (Q1 and Q2) on the HPE Virtual Connect SE 100Gb F32 Module for HPE Synergy can be used to connect satellite modules. These ports are designed to handle high-speed connectivity required for linking additional frames and expanding the Synergy infrastructure.

NEW QUESTION # 91

Your customer uses HPE OneView to manage their HPE Synergy environment.

They plan to use it to manage a new set of equipment that includes.

- 20 HPE ProLiant DL365 Gen10 Plus servers
- 20 HPE ProLiant DL380 Gen10 Plus servers
- 5 HPE Primera 650
- 5 HPE MSA 2062 Storage Array

Which statements about how OneView will work with this new equipment are true? (Select two)

- Answer: A,D**

HPE MSA 2062 Storage Array is not supported in HPE OneView: HPE OneView does not provide management capabilities for the HPE MSA series, which includes the MSA 2062. These arrays must be managed using their dedicated management tools.

HPE Primera 650 can be managed using HPE OneView: HPE OneView supports the management of HPE Primera storage arrays, including the Primera 650, allowing for integrated management and monitoring within the OneView environment.
