- D. Realize

Answer: A,C

### NEW QUESTION # 67

How should an implementation consultant customize SAP Best Practices business processes?

- A. Make a copy of the original process and edit the copy
- B. Use SAP Signavio Process Manager to edit the process
- C. Make edits to the original process
- D. Use SAP Cloud ALM to edit the process

Answer: A

### NEW QUESTION # 68

How should an implementation consultant customize SAP Best Practices business processes?

- A. Make a copy of the original process and edit the copy
- B. Use SAP Signavio Process Manager to edit the process
- C. Make edits to the original process
- D. Use SAP Cloud ALM to edit the process

Answer: A

Explanation:

Step 1 - Understanding the question

This question asks how an implementation consultant should customize SAP Best Practices business processes in SAP S/4HANA Cloud, Private Edition.

SAP Best Practices are pre-delivered standard processes that provide ready-to-run configurations.

To maintain a clean core, SAP discourages editing the original process directly.

Step 2 - Evaluate each option

Option A: Make a copy of the original process and edit the copy

This is correct.

The correct approach is to copy the original Best Practice process into a customer workspace (for example, within SAP Signavio or SAP Solution Manager) and make necessary adjustments there.

This preserves the original SAP content and ensures that future updates or upgrades remain compatible.

Example 1:

A company copies the "Standard Order-to-Cash" process, modifies one approval step, and saves it as a new variant under its own namespace.

Example 2:

A finance consultant copies the "Journal Entry Posting" process to adjust document approval rules without touching the original Best Practice template.

Option B: Use SAP Cloud ALM to edit the process

This is incorrect.

SAP Cloud ALM is used to manage and monitor project tasks and test execution, not to directly edit Best Practice process content.

Option C: Use SAP Signavio Process Manager to edit the process

This is partially true in concept but not correct in this question's context.

While SAP Signavio can model and document processes, editing SAP Best Practice processes directly in Signavio is not the recommended or typical customization method for implementation consultants.

Option D: Make edits to the original process

This is incorrect.

Editing the original Best Practice process would violate clean-core principles and risk losing SAP-provided updates.

### NEW QUESTION # 69

Where can an implementation consultant find configuration information for each level in the configuration hierarchy?

- A. In the SAP GUI
- B. In the SAP Fiori apps reference library
- C. In the SAP Signavio Process Manager
- **D. In the SAP Help Portal**

**Answer: D**

Explanation:

Step 1 - Understanding the question

The question asks where implementation consultants can find configuration information for each level in the configuration hierarchy in SAP S/4HANA Cloud, Private Edition.

Step 2 - Explanation

The SAP Help Portal provides structured documentation on:

\* Configuration hierarchy levels (e.g., scope items, business areas, processes, activities).

\* Configuration guides, setup instructions, and links to SAP Best Practices Explorer content.

\* End-to-end setup details for each module and scenario.

The SAP Help Portal organizes information by hierarchy and is the official source for all configuration documentation.

Step 3 - Evaluate options

Option A: In the SAP Fiori apps reference library

Incorrect - It lists app-specific information (installation, roles, etc.), not configuration hierarchies.

Option B: In the SAP Signavio Process Manager

Incorrect - Signavio focuses on process modeling and design, not configuration documentation.

Option C: In the SAP Help Portal

Correct - Configuration hierarchy and detailed setup documentation are available here.

Option D: In the SAP GUI

Incorrect - Configuration activities happen in the GUI, but documentation of configuration hierarchies does not reside there.
