

ACD101認證考試解析，ACD101考題資訊

P.S. VCESoft在Google Drive上分享了免費的、最新的ACD101考試題庫：https://drive.google.com/open?id=1uUjBkv04Cbc1_I8ir-dvnmkBkU2WsuGil

適當的選擇培訓是成功的保證，但是選擇是相當重要的，VCESoft的知名度眾所周知，沒有理由不選擇它。當然，如果涉及到完善的培訓資料給你，如果你不適用那也是沒有效果的，所以在利用我們VCESoft的培訓資料之前，你可以先下載部分免費試題及答案作為試用，這樣你可以做好最真實的考試準備，以便輕鬆自如的應對ACD101測試，這也是為什麼成千上萬的考生依賴我們VCESoft的重要原因之一，我們提供的是最好最實惠最完整的ACD101考試培訓資料，以至於幫助他們順利通過測試。

Appian ACD101 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• Data Persistence: Here, the Appian Associate Developer test examines your skills in managing data and relational databases, including the use of CDTs and query entities. You will need to demonstrate proficiency in handling records, querying data, and updating data models.
主題 2	<ul style="list-style-type: none">• Appian Development: Interface Design: The exam evaluates capabilities of Appian developers to design and construct interfaces, configure local variables, and use interface components like drop-downs and grids. The ACD101 exam also tests your adherence to best practices in interface design, as well as your skills in testing and troubleshooting interfaces.
主題 3	<ul style="list-style-type: none">• Appian Development: Expression Rules: The ACD101 exam evaluates the ability of aspiring Appian developers to interpret and build expression rules, implement functions, and use test cases to ensure rule quality. It also assesses your understanding of best practices for expression rules.
主題 4	<ul style="list-style-type: none">• Appian Development: Process Models: This topic of the ACD101 exam focuses on your ability to create, debug, and publish process models within Appian. It includes configuring workflow nodes, Smart Services, and understanding data flow in processes.
主題 5	<ul style="list-style-type: none">• Appian Development: Records: This topic of the Appian Associate Developer exam assesses skills of developers in configuring records, including linking to data sources and designing views and lists. You will need to show proficiency in setting up record actions and relationships.

ACD101考題資訊 - ACD101參考資料

我們VCESoft網站的Appian培訓資料是沒有網站可以與之比較的。它是空前絕後的真實，準確，為了幫助每位考生順利通過考試，我們的ACD101精英團隊不斷探索。我可以毫不猶豫的說這絕對是一份具有針對性的培訓資料。我們VCESoft網站不僅產品真實，而且價格也很合理，當你選擇我們的產品，我們還提供一年的免費更新，讓你更在充裕的時間裏準備ACD101考試，這樣也可以消除你對考試緊張的心理，達到一個兩全其美的辦法了。

最新的 Associate Developer ACD101 免費考試真題 (Q41-Q46):

問題 #41

Which condition must be true in order to establish record type relationships?

- A. Data sync must be enabled for the record types.
- B. All record types in the relationship must be backed by an integration.
- C. The record types must have many-to-many relationships.

答案: A

問題 #42

You need to remove an unused field from an existing record type Product, which has data sync enabled and is backed by a database table.

What should you do?

- A. Delete the field from the product Custom Data Type (CDT) and perform a full resync of the record type.
- B. Delete the column from the database table and perform a full resync of the record type.
- C. Delete the field from the record type and optionally delete the column from the database table.

答案: A

解題說明:

In Appian, when dealing with a record type that has data sync enabled and is backed by a database table, changes to the structure of the underlying data model, such as removing a field, should be carefully managed.

The correct approach involves deleting the unused field from the Custom Data Type (CDT) that defines the structure of the data for the record type. Following this change, a full resynchronization of the record type is necessary to ensure that the changes in the CDT are reflected in the record type and its associated data in Appian. This process ensures data integrity and consistency across the application and the database.

Appian Documentation on Data Management: Provides guidelines on managing data structures, including CDTs and record types, within Appian applications.

問題 #43

You have two record types: ACME_Student and ACME_Class.

You need to add a many-to-many relationship between these two record types.

What should you do?

- A. This relationship cannot be modeled using record type relationships.
- B. Create a new record type with data sync enabled, then add a one-to-many relationship from each record type (ACME_Student and ACME_Class) to the new mapping record type.
- C. Add the relationship from either ACME_Student or ACME_Class, then select Many-to-Many under Relationship Type, and add the corresponding keys.

答案: B

解題說明:

To establish a many-to-many relationship between two record types in Appian, you should create a junction or mapping record type that will handle the many-to-many association. This new record type should have two one-to-many relationships, one to each of the original record types (ACME_Student and ACME_Class). This setup allows each student to be associated with multiple classes and each class to be associated with multiple students.

Reference: Appian Documentation - Record Type Relationships

問題 #44

You are constructing an interface that is used as the form of a User Input Task in a process model.

The data entered on the form must be available in the process after the form is submitted.

Which domain prefix should be used for variables in the interface?

- A. local!
- **B. pv!**
- C. ril

答案： B

問題 #45

What are three ways to start a process from an interface? (Choose three.)

- A. a!recordLink()
- **B. a!startProcessLink()**
- **C. Record Actions**
- D. Subprocesses
- **E. a!startProcess()**

答案： B,C,E

問題 #46
