

Penetration Testing: JN0-105 Pre-assessment Test

P.S. Free & New JN0-105 dumps are available on Google Drive shared by TrainingDumps: https://drive.google.com/open?id=1UwsuNWStuevsM_a2pkT1FsA7ELN66r3n

The Juniper JN0-105 certification is on trending nowadays, and many Juniper aspirants are trying to get it. Success in the Junos, Associate (JNCIA-Junos) (JN0-105) test helps you land well-paying jobs. Additionally, the Juniper JN0-105 certification exam is also beneficial to get promotions in your current company. But the main problem that every applicant faces while preparing for the JN0-105 Certification test is not finding updated Juniper JN0-105 practice questions.

We guarantee you that our top-rated Juniper JN0-105 practice exam (PDF, desktop practice test software, and web-based practice exam) will enable you to pass the Junos, Associate (JNCIA-Junos) (JN0-105) certification exam on the very first go. The authority of TrainingDumps in JN0-105 Exam Questions rests on its being high-quality and prepared according to the latest pattern.

JN0-105 Valid Test Tips - JN0-105 Guaranteed Questions Answers

Juniper JN0-105 pdf dumps format contains actual JN0-105 exam questions. With Juniper JN0-105 pdf questions you don't have to spend a lot of time on Junos, Associate (JNCIA-Junos) Networking Solutions JN0-105 exam preparation. You just go through and memorize these real JN0-105 exam questions. TrainingDumps has designed this set of valid Juniper Exam Questions with the assistance of highly qualified professionals. Preparing with these JN0-105 Exam Questions is enough to get success on the first try. However, this format of TrainingDumps JN0-105 exam preparation material is best for those who are too much busy in their life and don't have enough time to prepare for Juniper JN0-105 exam.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q94-Q99):

NEW QUESTION # 94

Click the Exhibit button.

Referring to the exhibit, what is the source IP address of the ping that was executed?

- A. 10.24.0.4
- B. 10.23.0.2
- C. 10.23.0.3
- D. 10.12.0.2

Answer: B

Explanation:

The exhibit shows a ping test being executed from router R2 to the IP address 10.23.0.3. Since the ping command is issued on R2 and we see successful replies from 10.23.0.3, it means the source of the ping must be an interface on R2. Given the network diagram and the IP address scheme, the source IP address of the ping is on the interface ge-0/0/2 of R2, which is in the subnet 10.23.0.0/24. The only logical IP address for R2's interface in this subnet, based on standard networking practices and the given options, would be 10.23.0.2. The other addresses provided in the options belong to different subnets or are the destination of the ping itself.

NEW QUESTION # 95

Exhibit

```

policy-options {
  policy-statement Load-Balance-Policy {
    term Load-Balance {
      then {
        load-balance per-flow;
      }
    }
  }
}
  
```

```

routing-options {
  router-id 192.168.100.11;
  autonomous-system 65201;
  forwarding-table {
    export Load-Balance-Policy;
  }
}
  
```

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The policy must be applied under the protocols hierarchy.
- B. The policy enables per-packet load balancing.
- C. The policy enables flow-based load balancing.

- D. The policy enables equal cost load balancing in the forwarding table.

Answer: C,D

Explanation:

The load-balance per-flow statement in the Junos OS policy-options configuration enables flow-based load balancing in the forwarding table. This means that the traffic is distributed across multiple paths based on flows, where a flow is typically identified by attributes such as source and destination IP addresses, and possibly layer 4 information like TCP/UDP ports. This allows for more granular and efficient utilization of available paths, avoiding overloading a single path. The policy does not enable per-packet load balancing, which would send individual packets of the same flow over different paths, potentially causing out-of-order delivery issues. The policy's placement in the forwarding-table export suggests it's intended to influence forwarding behavior, not just routing protocol decisions, and does not necessarily have to be applied under the protocols hierarchy.

NEW QUESTION # 96

After the factory default configuration is loaded, which configuration object must be created prior to the first commit?

- A. out-of-band connectivity
- B. root authentication
- C. host name
- D. loopback IP address

Answer: B

Explanation:

In Juniper Networks devices, when the factory default configuration is loaded, the first step before committing any configuration is to set up root authentication. This is crucial because it secures the device by ensuring that only authorized users have administrative access. Without setting up a root password, the device will not allow any commit operations, which is a safety measure to prevent unauthorized access. This requirement emphasizes the importance Juniper places on security right from the initial setup of the device.

NEW QUESTION # 97

A network administrator is attempting to route traffic on a Juniper switch to one of three different VLANs: Prod, Test, and Dev. Each VLAN has been assigned a numerical value. In this scenario, what are these numerical values called?

- A. names
- B. interfaces
- C. tags
- D. defaults

Answer: C

Explanation:

In the context of VLANs (Virtual Local Area Networks) on a Juniper switch, the numerical values assigned to each VLAN, such as those for Prod, Test, and Dev, are known as VLAN tags. These tags are part of the 802.1Q VLAN standard, which allows multiple VLANs to coexist on a single physical network. Each tag uniquely identifies the VLAN to which a frame belongs, enabling the switch to segregate and manage traffic based on VLAN membership. This tagging mechanism allows for efficient traffic separation and management, ensuring that devices within one VLAN do not receive traffic intended for another, thus maintaining network security and efficiency.

NEW QUESTION # 98

You issue the telnet 10.10.10.1 source 192.168.100.1 command. Which two statements are correct in this scenario? (Choose two.)

- A. The telnet session will have a source address of 192.168.100.1.
- B. The telnet session will have a source address of 10.10.10.1.
- C. The telnet session will have a destination address of 192.168.100.1.
- D. The telnet session will have a destination address of 10.10.10.1.

Answer: A,D

Explanation:

In the given telnet command, "telnet 10.10.10.1 source 192.168.100.1," the destination address of the telnet session is 10.10.10.1, and the source address of the session is specified as 192.168.100.1, making C and D the correct answers. This command instructs the telnet client to use the specified source IP address when establishing the connection to the destination.

NEW QUESTION # 99

.....

Despite the complex technical concepts, our JN0-105 exam questions have been simplified to the level of average candidates, posing no hurdles in understanding the various ideas. It is also the reason that our JN0-105 study guide is famous all over the world. We also have tens of thousands of our loyal customers who support us on the JN0-105 Learning Materials. Just look at the feedbacks on our website, they all praised our JN0-105 practice engine.

JN0-105 Valid Test Tips: https://www.trainingdumps.com/JN0-105_exam-valid-dumps.html

If you are satisfied with our JNCIA JN0-105 study guide, you can buy our study material quickly, Our JNCIA JN0-105 test review dumps concluded the useful lessons from successful experiences and lessons from failure, summarizes the commonness training material and high frequency tests which can be a great help to passing the Junos, Associate (JNCIA-Junos) actual test, Except the JN0-105 PDF files, the JN0-105 online test engine are also popular among IT candidates.

Apply various machine and deep learning techniques, Rex Gantenbein, University of Wyoming, Laramie, If you are satisfied with our JNCIA JN0-105 study guide, you can buy our study material quickly.

Latest Juniper New Test Simulator – Pass-Sure JN0-105 Valid Test Tips

Our JNCIA JN0-105 Test Review dumps concluded the useful lessons from successful experiences and lessons from failure, summarizes the commonness training material and JN0-105 high frequency tests which can be a great help to passing the Junos, Associate (JNCIA-Junos) actual test.

Except the JN0-105 PDF files, the JN0-105 online test engine are also popular among IT candidates, Support includes a 24/7 ticketing system, complemented by a live chat open for 24 hours a day.

JN0-105 prep torrent provides students with a new set of learning modes which free them from the rigid learning methods.
