Relevant Slack-Admn-201 Exam Dumps, Valid Test Slack-Admn-201 Bootcamp

Slack-Admn-201 exam certification is very useful in your daily work in IT industry. When you decide to attend the Slack-Admn-201 exam test, it is not an easy thing at begin. First, you should have a detail study plan and have a basic knowledge of the Slack-Admn-201 actual test. Here, Salesforce Slack-Admn-201 test pdf dumps are recommended to you for preparation. Slack-Admn-201 Pdf Torrent will tell you the basic question types in the actual test and give the explanations where is available. With the help of the Slack-Admn-201 vce dumps, you will be confident to attend the Slack-Admn-201 actual test and get your certification with ease.

Salesforce Certified Slack Administrator Sample Questions (Q21-Q26):

NEW QUESTION # 21

You're a Workspace Owner for a Slack Business+ workspace, working with your security team to launch Slack globally. You want members to integrate Slack with their daily productivity apps from day one.

What should you do?

- A. Use an Admin API to manage and approve apps automatically.
- B. Turn on app approvals, and have users individually request to install each app.
- C. Pre-approve daily productivity apps, and restrict apps that are not commonly used.
- **D. Pre-approve daily productivity apps, and restrict apps that security has already deemed too risky.**

Answer: D

Explanation:

Slack best practices recommend:

"Pre-approving key apps ensures fast adoption while restricting high-risk apps maintains security compliance." Admin API (B) is more technical and unnecessary at launch. Individual requests (C) create friction. Pre- approving apps and restricting non-common ones (D) isn't optimal unless based on risk evaluation.

(Reference: Slack Administration Study Guide - App Management Best Practices)

-

NEW QUESTION # 22

GoodAdvertisements Inc works with several companies to support global advertising campaigns and are on a paid plan. They are preparing for a campaign launch that requires input from multiple companies.

GoodAdvertisements Inc wants the ability to coordinate effectively with the companies before and during their respective launch in a private channel, but it is not clear whether the companies use paid Slack plans.

The Admins at the company want to take security precautions before inviting any outside individuals into their Slack workspace.

What is the best way for the Admins to have the individuals from the outside companies join the Slack workspace and ensure the process scales for future launches with other companies?

- A. Ask the outside companies to upgrade to the paid plan. Then, share the launch channel externally to the companies, and set a reminder to unshare the channel when the launch is complete.
- **B. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Single-Channel Guests. Set expiry dates for the Single-Channel Guests.**
- C. Have the Admins individually send out Single-Channel Guest invitations.
- D. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Multi-Channel Guests. Set expiry dates for the Multi-Channel Guests.

Answer: B

Explanation:

The best practice in Slack for securely collaborating with external partners is:

"Use Single-Channel Guests for external users when collaboration is limited to specific channels. Admins should control guest approvals, ideally via a private approval workflow, and set expiry dates for guest accounts to ensure access is revoked after projects end." Multi-Channel Guests (Option B) provide broader access than necessary, and manually inviting guests (Option C) does not scale well. Asking companies to upgrade (Option D) is unrealistic for scalable collaboration.

(Reference: Slack Administration Study Guide - Guest Management and External Collaboration)

-

NEW QUESTION # 23

As an Org Admin in your organization's Slack Enterprise Grid instance, you manage the existing four workspaces. Since your org is rapidly growing, you need a way to communicate upcoming trainings that are available to the entire company.

What is the best action to ensure these communications are seen in each current and future workspace?

(Select the best answer.)

- A. Have each Workspace Admin post in the correct public training channel.
- B. Create a multi-workspace channel for training that exists in each workspace.
- **C. Create an org-wide channel dedicated to company trainings.**
- D. Create a Slack Connect channel dedicated to company trainings.

Answer: C

Explanation:

According to Slack Enterprise Grid administration best practices:

"Org-wide channels allow messages to be broadcast to every member of an Enterprise Grid organization, across all current and future workspaces." Creating an org-wide channel ensures that the training communications are visible everywhere, without needing coordination with individual Workspace Admins or external partners. Multi-workspace channels (B) are helpful but only span selected workspaces, not automatic inclusion in all future workspaces.

(Reference: Slack Administration Study Guide - Org-wide Channels)

-

NEW QUESTION # 24

You're upgrading your organization to Slack Enterprise Grid.

You want to be thoughtful about your channel and workspace strategy before finalizing your design.

What should you do?

- **A. Survey a selection of end users to determine whether existing knowledge networks are already in place.**
- B. Migrate existing workspaces into your Enterprise Grid org so that employees can familiarize themselves with its features as you plan the design.
- C. Review the technical requirements for your single sign-on (SSO) system to ensure it is compatible with Slack.
- D. Develop a Champions Network of interested users to help share the design with others.

Answer: A

Explanation:

Slack recommends:

"Before finalizing your Enterprise Grid design, survey teams to understand how they collaborate, where informal knowledge networks exist, and what natural groupings of people and work already exist." Migrating before design (A) is premature. SSO review (C) is important but unrelated to channel and workspace structure design. Champions networks (D) are helpful for rollout, but not initial design.

(Reference: Slack Administration Study Guide - Planning Your Enterprise Grid Design)

-

NEW QUESTION # 25

Your company is on the Slack Business+ plan and is interested in setting up SCIM provisioning in their identity provider (IdP) to more efficiently manage their Slack user base.

Which two benefits would the company gain from using SCIM provisioning? (Select the TWO best answers.)

- **A. They can deactivate users automatically from their IdP.**
- **B. They can pre-provision Multi-Channel and Single-Channel Guests to their workspace.**
- C. They do not have to pre-provision any users; employees will automatically create an account when they attempt to log in for the first time.
- D. They can sync custom profile fields to obtain more useful analytics about employees' Slack usage.
- E. Users only need to remember one set of credentials for all the applications they use.

Answer: A,B

Explanation:

SCIM provisioning offers two major benefits:

"Automatically deactivating user accounts when they are deactivated in the identity provider (IdP)."

"Pre-provisioning Multi-Channel and Single-Channel Guests in Slack."

SSO (Option B) relates to authentication, not provisioning. Automatic account creation upon login (Option D) is tied to Just-in-Time (JIT) provisioning with SSO, not SCIM.

(Reference: Slack Administration Study Guide - SCIM Provisioning Benefits)
